Making British Defence Policy

Continuity and Change

Routledge This book explores the process by which defence policy is made in contemporary Britain and the institutions, actors and conflicting interests which interact in its inception and continuous reformulation. Rather than dealing with the substance of defence policy, this study focuses upon the institutional actors involved in this process. This is a subject which has commanded far more interest from public, Parliament, government and the armed forces since the protracted, bloody and ultimately unsuccessful British military involvement in Iraq and Afghanistan. The work begins with a discussion of two contextual factors shaping policy. The first relates to the impact of Britain's 'special relationship' with the United States over defence and intelligence matters, while the second considers the impact of Britain's relatively disappointing economic performance upon the funding of British defence since 1945. It then goes on to explore the role and impact of all the key policy actors, from the Prime Minister, Cabinet and core executive, to the Ministry of Defence and its relations with the broader 'Whitehall village', and the Foreign Office and Treasury in particular. The work concludes by examining the increasing influence of external policy actors and forces, such as Parliament, the courts, political parties, pressure groups and public opinion. This book will be of much interest to students of British defence policy, security studies, and contemporary military history.

Nuclear Disarmament and Non-Proliferation Towards a Nuclear-Weapon-Free World?

Routledge A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform, www.oapen.org. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book examines the current debate on nuclear non-proliferation and disarmament, notably the international non-proliferation regime and how to implement its disarmament provisions. Discussing the requirements of a new international consensus on nuclear disarmament and non-proliferation, this book builds on the three pillars of the nuclear non-proliferation treaty (NPT):

non-proliferation, disarmament and peaceful uses of nuclear energy. It reviews the impact of Cold War and post-Cold War policies on current disarmament initiatives and analyses contemporary proliferation problems: how to deal with the states that never joined the NPT (India, Pakistan and Israel); how states that have been moving toward nuclear weapons have been brought back to non-nuclear-weapon status; and, in particular, how to deal with Iran and North Korea. The analysis centres on the relationship between disarmament and non-proliferation in an increasingly multi-centric world involving China and India as well as the US, the European powers and Russia. It concludes with a description and discussion of three different worlds without nuclear weapons and their implications for nuclear disarmament policies. This book will be of great interest to all students of arms control, strategic studies, war and conflict studies, and IR/security studies in general Sverre Lodgaard is a Senior Research Fellow at the Norwegian Institute of International Affairs, Oslo

All Options on the Table

Leaders, Preventive War, and Nuclear Proliferation

Cornell University Press When is preventive war chosen to counter nuclear proliferation? In *All Options on the Table*, Rachel Elizabeth Whitlark looks beyond systemic and slow-moving factors such as the distribution of power. Instead, she highlights individual leaders' beliefs to explain when preventive military force is the preferred strategy. Executive perspective—not institutional structure—is paramount. Whitlark makes her argument through archivally based comparative case studies. She focuses on executive decision making regarding nuclear programs in China, North Korea, Iraq, Pakistan, and Syria. This book considers the actions of US presidents John F. Kennedy, Lyndon B. Johnson, George H. W. Bush, Bill Clinton, and George W. Bush, as well as Israeli prime ministers Menachem Begin, Yitzhak Rabin, and Ehud Olmert. *All Options on the Table* demonstrates that leaders have different beliefs about the consequences of nuclear proliferation in the international system and their state's ability to deter other states' nuclear activity. These divergent beliefs lead to variation in leaders' preferences regarding the use of preventive military force as a counter-proliferation strategy. The historical evidence amassed in *All Options on the Table* bears on strategic assessments of aspiring nuclear powers such as Iran and North Korea. Whitlark argues that only those leaders who believe that nuclear proliferation is destabilizing for the international system will consider preventive force to counter such

challenges. In a complex nuclear world, this insight helps explain why the use of force as a counter-proliferation strategy has been an extremely rare historical event.

Higher Education in Nepal Policies and Perspectives

Routledge This book presents a showcase of discussions and critical perspectives about Nepalese higher education. Its chapters cover topics such as the impacts of local sociopolitical changes and global forces on public and private education, emerging online and distance education, administrative and intellectual leadership, quality assessment, graduate employability, global mobility of students, and the contributions of global diaspora of Nepalese scholars. The central questions of the book are: What are some of the local and global academic interactions in Nepalese higher education and what are the current challenges and pathways for advancements and improvements? How can Nepalese higher education absorb twenty-first century values of quality education as external forces, while adapting new developments to local needs? How can scholars interested in Nepalese, South Asian, and international higher

education create opportunities for scholarship and professional collaboration around research on higher education in this region of South Asia? What issues and perspectives can research and scholarship about Nepal's higher education offer to international discourse in higher education? The book offers information and resources to international educators interested in the dynamics of Nepalese and, by implication, South Asian higher education by introducing key challenges in policy and programs, innovative changes in curricula, effective approaches in technology application, and strategies for future integration of global reforms in education.

Emergency War Plan

The American Doomsday Machine, 1945–1960

U of Nebraska Press Emergency War Plan examines the theory and practice of American nuclear deterrence and its evolution during the Cold War. Previous examinations of nuclear strategy during this time have, for the most part, categorized American efforts as “massive retaliation” and “mutually assured destruction,” blunt instruments to be casually dismissed in favor of more flexible approaches or summed up in inflammatory and judgmental terms like “MAD.” These descriptors evolved into slogans, and any nuanced discussion of the efficacy of the actual strategies withered due to a variety of political and social factors. Drawing on newly released weapons effects information along with new information about Soviet capabilities as well as risky and covert espionage missions, Emergency War Plan provides a completely new examination of American nuclear deterrence strategy during the first fifteen years of the Cold War, the first such study since the 1980s. Ultimately what emerges is a picture of a gargantuan and potentially devastating enterprise that was understood at the time by the public in only the vaguest terms but that was not as out of control as has been alleged and was more nuanced than previously understood.

China and Global Nuclear Order

From Estrangement to Active Engagement

Oxford University Press, USA This book offers an empirically rich study of Chinese nuclear weapons behaviour and the impact of this behaviour on global nuclear politics since 1949. China's behaviour as a nuclear weapons state is a major determinant of global and regional security. For the United States, there is no other nuclear actor -- with the exception of Russia-- that matters more to its long-term national security. However, China's behaviour and impact on global nuclear politics is a surprisingly under-researched topic. Existing literature tends to focus on narrow policy issues, such as misdemeanours in China's non-proliferation record, the uncertain direction of its military spending, and nuclear force modernization, or enduring opaqueness in its nuclear policy. This book proposes an alternative context to understand both China's past and present nuclear behaviour: its engagement with the process of creating and maintaining global nuclear order. The concept of global nuclear order is an innovative lens through which to consider China as a nuclear weapons state because it draws attention to the inner workings --institutional and normative-- that underpin nuclear politics. It is also a timely subject because global nuclear order is considered by many actors to be under serious strain and in need of reform. Indeed, today the challenges to nuclear order are numerous, from Iranian and North Korean nuclear ambitions to the growing threat of nuclear terrorism. This book considers these challenges from a Chinese perspective, exploring how far Beijing has gone to the aid of nuclear order in addressing these issues.

Forged in Crisis

India and the United States Since 1947

Oxford University Press Rudra Chaudhuri's book examines a series of crises that led to far-reaching changes in India's approach to the United States, defining the contours of what is arguably the imperative relationship between America and the global South. Forged in Crisis provides a fresh interpretation of India's advance in foreign affairs under the stewardship of Prime Ministers Jawaharlal Nehru, Indira Gandhi, Atal Bihari Vajpayee, and finally, Manmohan Singh. It

reveals the complex and distinctive manner in which India sought to pursue at once material interests and ideas, while meticulously challenging the shakier and largely untested reading of 'non-alignment' palpable in most works on Indian foreign policy and international relations. From the Korean War in 1950 to the considered debate within India on sending troops to Iraq in 2003, and from the loss of territory to China and the subsequent talks on Kashmir with Pakistan in 1962-63 to the signing of a civil nuclear agreement with Washington in 2008, Chaudhuri maps Indian negotiating styles and behaviour and how these shaped and informed decisions vital to its strategic interest, in turn redefining its relationship with the United States.

Continental Defense in the Eisenhower Era

Nuclear Antiaircraft Arms and the Cold War

Springer Thousands of nuclear antiaircraft arms were designed, tested and deployed in the United States during Dwight D. Eisenhower's presidency. These Army "Nike-Hercules" missiles, Air Force "Genie" rockets, and "BOMARC" and "Falcon" missiles were meant to counter a raid by attacking Soviet bombers. U.S. policy makers believed that the American weapons could safely compensate for technological limitations which otherwise made it difficult to destroy high flying, fast moving airplanes. Continental Defense in the Eisenhower Era traces this armament from conception through deployment. Bright recounts official actions, doctrinal decisions, and public policies. It also discusses the widespread acceptance of these weapons by the American public, a result of being touted in news releases, featured in films and television episodes, and disseminated throughout society as a whole.

Each chapter has a strong theory and scientific base, but is heavily focused on real world applications. As such, a significant number of case studies, examples, figures, and tables are included to aid in the understanding and application of the material covered.

After Hiroshima

The United States, Race and Nuclear Weapons in Asia, 1945–1965

Cambridge University Press By emphasising the role of nuclear issues, *After Hiroshima*, published in 2010, provides an original history of American policy in Asia between the dropping of the atomic bombs on Japan and the escalation of the Vietnam War. Drawing on a wide range of documentary evidence, Matthew Jones charts the development of American nuclear strategy and the foreign policy problems it raised, as the United States both confronted China and attempted to win the friendship of an Asia emerging from colonial domination. In underlining American perceptions that Asian peoples saw the possible repeat use of nuclear weapons as a manifestation of Western attitudes of 'white superiority', he offers new insights into the links between racial sensitivities and the conduct of US policy, and a fresh interpretation of the transition in American strategy from massive retaliation to flexible response in the era spanned by the Korean and Vietnam Wars.

Strategic thinking in Government without National Strategy, can viable Government strategy emerge?, twenty-fourth report of session 2010-12, Vol. 1: Report, together with formal minutes, oral and written evidence

The Stationery Office In the light of recent concerns about a strategic vacuum at the centre of Government, this Report explores the capacity of Ministers and officials to carry out long-term strategic thinking to tackle the complex, diverse and unpredictable domestic and global challenges the country faces. It finds that an absence of clear and precise definition of terms meant that policy and different levels of strategy became muddled, leading to unintended and unwelcome outcomes. Drawing on the evidence it received, the Report sets out clear definitions for national or 'grand' strategy, operational strategy and policy. PASC have produced a number of recommendations to overcome the barriers to working strategically in Government. Central to these recommendations is that the Government should publish an annual 'Statement of National Strategy' in Parliament which reflects the interests of all parts of the UK and the devolved policy agendas. The report states that the Cabinet and its committees are accountable for decisions, but there remains a critical unfulfilled role at the centre of Government in coordinating and reconciling priorities across departments, and of long-term and short-term goals. The report concludes that the government's six strategic aims as provided to PASC are "too meaningless to serve any useful purpose". The strategic aims of the Government, informed by public opinion, should reflect the UK's national character, assets, capabilities, interests and values, and provide an indication of the objectives which policies must achieve

Jimmy Carter in Africa

Race and the Cold War

Stanford University Press In the mid-1970s, the Cold War had frozen into a nuclear stalemate in Europe and retreated from the headlines in Asia. As Gerald Ford and Jimmy Carter fought for the presidency in late 1976, the superpower struggle overseas seemed to take a backseat to more contentious domestic issues of race relations and rising unemployment. There was one continent, however, where the Cold War was on the point of flaring hot: Africa. Jimmy Carter in Africa opens just after Henry Kissinger's failed 1975 plot in Angola, as Carter launches his presidential campaign. The Civil Rights Act was only a decade old, and issues of racial justice remained contentious. Racism at home undermined Americans' efforts to "win hearts and minds" abroad and provided potent propaganda to the Kremlin. As President Carter confronted Africa, the essence of American foreign policy—stopping Soviet expansion—slammed up against the most explosive and raw aspect of American domestic politics—racism. Drawing on candid interviews with Carter, as well as key U.S. and foreign diplomats, and on a dazzling array of international archival sources, Nancy Mitchell offers a timely reevaluation of the Carter administration and of the man himself. In the face of two major tests, in Rhodesia and the Horn of Africa, Carter grappled with questions of Cold War competition, domestic politics, personal loyalty, and decision-making style. Mitchell reveals an administration not beset by weakness and indecision, as is too commonly assumed, but rather constrained by Cold War dynamics and by the president's own temperament as he wrestled with a divided public and his own human failings. Jimmy Carter in Africa presents a stark portrait of how deeply Cold War politics and racial justice were intertwined.

America's Forgotten Student Population

Creating a Path to College Success for GED® Completers

Stylus Publishing, LLC Constituting one in twelve of adult Americans, GED certificate holders comprise a major pool of underdeveloped human capital in our society. They are a resource that will be sorely needed as “boomers” reach retirement and the traditional pipeline of 17 - 23 year olds falls short of filling our growing workforce needs. Although these nontraditional students can potentially meet our future workforce demands, and although half of them enter post-secondary education, half of those who do so drop out of college for lack of basic support systems - often at the very same institutions that provided programs of retention while they were earning their GED and completing basic Adult Education classes. Yet national data collected by the National Center for Educational Statistics reveals that GED certificate holders who persist to their second year of community college studies accumulate grade point averages equal to high school graduates, refuting widely held beliefs that GED earners are not capable of rigorous academic work. This is the first book to remedy the dearth of data on this forgotten population, to present original research on these students, describing their characteristics and motivations, and to provide proven models for identifying, retaining and graduating this under-counted and underestimated cohort. It addresses the issue of the pipeline from GED centers to postsecondary education, and includes first-person narratives that offer vivid insights into GED earners’ resilience and needs. As this book reveals, more than 40 percent of community colleges responding to a 2010 ACT survey have no one responsible for coordinating retention efforts; and more than half have no goals for first-year student retention; and estimates that community colleges are cumulatively foregoing over \$1.5 billion in revenues as the result of failing to retain their GED populations. This book is a comprehensive resource for college administrators, and for educational policy makers and researchers, offering both broad policy recommendations and tested ideas and models that can be implemented at the state and institutional level.

Constructing Allied Cooperation

Diplomacy, Payments, and Power in Multilateral Military Coalitions

Cornell University Press How do states overcome problems of collective action in the face of human atrocities, terrorism and the threat of weapons of mass destruction? How does international burden-sharing in this context look like: between the rich and the poor; the big and the small? These are the questions Marina E. Henke addresses in her new book *Constructing Allied Cooperation*. Through qualitative and quantitative analysis of 80 multilateral military coalitions, Henke demonstrates that coalitions do not emerge naturally. Rather, pivotal states deliberately build them. They develop operational plans and bargain suitable third parties into the coalition, purposefully using their bilateral and multilateral diplomatic connections—what Henke terms diplomatic embeddedness—as a resource. As *Constructing Allied Cooperation* shows, these ties constitute an invaluable state capability to engage others in collective action: they are tools to construct cooperation. Pulling apart the strategy behind multilateral military coalition-building, Henke looks at the ramifications and side effects as well. As she notes, via these ties, pivotal states have access to private information on the deployment preferences of potential coalition participants. Moreover, they facilitate issue-linkages and side-payments and allow states to overcome problems of credible commitments. Finally, pivotal states can use common institutional contacts (IO officials) as cooperation brokers, and they can convert common institutional venues into fora for negotiating coalitions. The theory and evidence presented by Henke force us to revisit the conventional wisdom on how cooperation in multilateral military operations comes about. The author generates new insights with respect to who is most likely to join a given multilateral intervention, what factors influence the strength and capacity of individual coalitions, and what diplomacy and diplomatic ties are good for. Moreover, as the Trump administration promotes an "America First" policy and withdraws from international agreements and the United Kingdom completes Brexit, *Constructing Allied Cooperation* is an important reminder that international security cannot be delinked from more mundane forms of cooperation; multilateral military coalitions thrive or fail depending on the breadth and depth of existing social and diplomatic networks.

Care of the Well Newborn

Jones & Bartlett Learning Care of the Well Newborn is a unique text that focuses on care of the term newborn for the first month of life. Written by distinguished experts in the field, it teaches students and professionals how and what to assess in the care of the non-verbal newborn, while also providing criteria for recognizing deviations from normal and strategies for managing complications that arise. The first text of its kind, it provides easily accessible information on evidence-based neonatal care that follows current guidelines, standards, and recommendations. Also explored are physiology and pathophysiology, data collection, differential diagnosis, cultural considerations, and parental education. An ideal resource for both students and professionals, each chapter includes multiple choice questions, case studies, and activities to facilitate critical thinking and learning.

Who does UK national strategy?

first report of session 2010-11, report, together with formal minutes, oral and written evidence

The Stationery Office A lack of strategic thinking at the heart of Government threatens the UK's national interests, the Public Administration Committee warns. The MPs note Whitehall's tendency to 'muddle through' and point to the UK's military engagements in Iraq and Afghanistan, as examples where there has been a lack of overarching strategy. The report says clear strategic leadership is indispensable to advance British interests in an increasingly fast changing world. But it raises serious concerns about Whitehall's capacity to support the Foreign Secretary's aspiration to extend the UK's 'global reach and influence' with the necessary strategic analysis and assessment. This applies particularly to the Government's Strategic Defence and Security Review and the MPs question how far this can actually be 'strategic'? The Committee calls for: ministers to invest more time and energy into strategic leadership; the creation of a 'community of strategic thinkers' across Whitehall, to provide ministers with the capacity for strategic analysis and assessment; the National Security Council's remit to encompass national strategy; greater emphasis to be placed on

strategic studies and training both within Whitehall and in academia; Parliament's Joint Committee on National Security Strategy to extend its remit to include national strategy; a small central budget to be established to fund central coordination of departmental contributions to national strategy.
