### ACCESS TO ESSENTIAL INNOVATION AND TECHNOLOGY

---

*Edward Elgar Publishing* **Abbe Brown's new work provides a welcome and extremely valuable addition of the human rights dimension to the long standing conflict over essential technologies between intellectual property and competition law. ð Steven Anderman, University of Essex, UK and University of Stockholm, Sweden ð Much has been written on the flexibilities available within the intellectual property system to address development and social needs. This book goes a step further: it explores how greater access to essential technologies can be ensured through human rights and competition law. Although the analysis is focused on UK and the European Union, the book provides valuable insights for assessing the situation in other jurisdictions. The author suggests an innovative approach for courts and legislators to overcome, in the light of public interest considerations, the limits imposed by intellectual property rights. This book is a much welcomed contribution to academic and policy debates on the subject. ð Carlos**

M. Correa, University of Buenos Aires, Argentina Intellectual property interacts (or clashes?) with human rights and competition law. The refreshing bit about this book is that a detailed practical approach to the inevitable balancing act is proposed. Abbe Brown explains how a human rights approach is the cornerstone of such a balancing approach and how positive results can be achieved towards unblocking essential technologies. And it can be done in the existing international legal framework, even if the latter could be improved. Well-researched, challenging and interesting reading!

Paul Torremans, University of Nottingham, UK Abbe Brown's study starts from the assumption that IP right owners, particularly those of innovative technologies, dispose of a disproportionate strong legal position in relation to that of competitors and customers, which is detrimental to society at large. Brown investigates how the power of the IP right owners can be limited by applying existing human rights law and competition law. To that aim it is suggested to widen the legal landscape and to develop a more tripartite substantive approach to IP law, human rights law and competition law. Brown's study offers a very welcome new contribution to the literature on the functioning of IP law, by stressing the joint role which competition law and human rights law can play in this respect.

F. Willem Grosheide, Utrecht University and Attorney at law, Van Doorne Amsterdam, The Netherlands This detailed book explores the relationship between intellectual property, competition and human rights. It considers the extent to which they can and must be combined by decision makers, and how this approach can foster innovation in key areas for society such as pharmaceutical drugs, communications software and technology to combat climate change. The author argues that these three legal fields are strongly interrelated and that they can be used to identify essential technologies. She demonstrates that in some cases, combining the fields can deliver new bases for wider access to be provided to technologies. The solutions developed are strongly based on existing laws, with a focus on the UK and the EU and the structures of existing forms of dispute resolution, including the European Court of Human Rights and the dispute settlement bodies of the World Trade Organisation. The final chapters also suggest opportunities for further engagement at international policy and activist level, new approaches to IP and its treaties, and wider adoption of the proposals. This timely book will appeal to academics and practitioners in IP, competition and human rights, as well as innovation-related industry groups and access to knowledge, health and environment activists.

## THE SUBSTANTIVE LAW OF THE EU

---

### THE FOUR FREEDOMS

---

*Oxford University Press* "The Substantive Law of the EU by Catherine Barnard is the perfect resource for anyone wishing to gain a thorough grasp of the four freedoms in EU law. An introductory chapter outlines the background to EU law in this area: the role of free trade theory, the evolution and expansion of the internal market and the fundamental principles underpinning this process. The following sections then provide a detailed examination of the four freedoms - goods, persons, services, and capital - which make up the core of EU law. The fully revised and updated third edition addresses the significant recent developments in EU legislation including expanded coverage of the free movement of services and more detailed consideration of the derogations and limitations to the four freedoms. Regular case studies help to unlock the subtleties of EU law in operation and frequent diagrams and flow charts clarify the more complex areas of substantive law. The book is accompanied by an Online Resource Centre providing: An additional chapter on Intellectual property and the free movement of goods - useful for anyone needing to study this topic, An interactive map of Europe with hot-spots on all EU Member States providing factual information on each country, A timeline of the EU tracing key dates in EU legal history \* Electronic copies of the figures from the book are available to lecturers for re-use in lectures and as handouts \* A treaty navigation resource enabling the user to look first hand at the key primary sources of law and trace its development and evolution \* Video clips from the EU archive demonstrate the important historical context to EU law helping students to appreciate the wider aspects of the EU's development \* Web links to useful sources of information provide the ideal platform to online research"--

*Springer Nature* The Commentary on the Treaty on the Functioning of the European Union (four volumes) is a major European project that aims to contribute to the development of ever closer conceptual and dogmatic standpoints with regard to the creation of "Europeanised research on Union law". Following on from the Commentary on the Treaty of the European Union, this book presents detailed explanations, article by article, of all the provisions of the TFEU, discussing the application of Union law in the national legal orders and its interpretation by the Court of Justice of the EU. The authors are academics and practitioners from twenty-eight European states and different legal fields, some from a constitutional law background, others experts in the field of international law and EU law. Reflecting the various approaches to European legal culture, this book promotes a system concept of European Union law toward more unity notwithstanding its rich diversity grounded in national traditions.

**VIRTUES AND FALLACIES OF VAT: AN EVALUATION AFTER 50 YEARS**

---

*Kluwer Law International B.V.* Value-added tax (VAT) is a mainstay of revenue systems in more than 160 countries. Because consumption is a more stable revenue base than other tax bases, VAT is less distorting and hence more likely to encourage investment, savings, optimum labor supply decisions, and growth. VAT is not without criticism however, and faces its own specific technical and policy challenges. This book, the first to thoroughly evaluate VAT from a global policy perspective after over 50 years of experience with its intricacies, offers authoritative perspectives on VAT's full spectrum—from its signal successes to the subtle ways its application can undermine revenue performance and economic neutrality. The contributors—leading tax practitioners and academics—examine the key policy issues and topics that are crucially relevant for measuring the success of the tax in the first part of the book, including: revenue generation and revenue efficiency; single rate versus multiple rates; susceptibility to fraud; exemptions and

---

exceptions; compliance cost for businesses; policy and compliance gaps in revenue collection; adjustment rules caused by the transactional nature of the tax; transfer pricing issues; treatment of vouchers; permanent establishments and holding companies; payment of refunds; cross-border digital transactions; and supplies for free or below cost price. The second part offers six country reports—on New Zealand, Japan, China, Colombia, Ethiopia, and India—to demonstrate the different ways in which VAT operates in a variety of national economies. Whether a government is contemplating the imposition of a general consumption tax for the first time or new rules for applying an existing one, it is important for policymakers to keep central the aim to design a tax that realizes optimal efficiency and causes minimal distortions. This invaluable book serves as an expert guide to VAT policy development in this area. It will be welcomed not only by concerned government officials but also by tax professionals (both lawyers and accountants) and academics in tax law.
