## Conceptual Model-Based Problem Solving

### Teach Students with Learning Difficulties to Solve Math Problems

*Springer Science & Business Media* Are you having trouble in finding Tier II intervention materials for elementary students who are struggling in math? Are you hungry for effective instructional strategies that will address students' conceptual gap in additive and multiplicative math problem solving? Are you searching for a powerful and generalizable problem solving approach that will help those who are left behind in meeting the Common Core State Standards for Mathematics (CCSSM)? If so, this book is the answer for you. • The conceptual model-based problem solving (COMPS) program emphasizes mathematical modeling and algebraic representation of mathematical relations in equations, which are in line with the new Common Core. • "Through building most fundamental concepts pertinent to additive and multiplicative reasoning and making the connection between concrete and abstract modeling, students were prepared to go above and beyond concrete level of operation and be able to use mathematical models to solve more complex real-world problems. As the connection is made between the concrete model (or students' existing knowledge scheme) and the symbolic mathematical algorithm, the abstract mathematical models are no longer "alien" to the students." As Ms. Karen Combs, Director of Elementary Education of Lafayette School Corporation in Indiana, testified: "It really worked with our kids!" • "One hallmark of mathematical understanding is the ability to justify.... why a particular mathematical statement is true or where a mathematical rule comes from" (<http://illustrativemathematics.org/standards>). Through making connections between mathematical ideas, the COMPS program makes explicit the reasoning behind math, which has the potential to promote a powerful transfer of knowledge by applying the learned conception to solve other problems in new contexts. • Dr. Yan Ping Xin's book contains essential tools for teachers to help students with learning disabilities or difficulties close the gap in mathematics word problem solving. I have witnessed many struggling students use these strategies to solve word problems and gain confidence as learners of mathematics. This book is a valuable resource for general and special education teachers of mathematics. - Casey Hord, PhD, University of Cincinnati

### A Study of the Relationship Between Instrumental Music Education and Critical Thinking in 8th- and 11th-Grade Students

*Universal-Publishers* The purpose of this study was to explore the possible relationship between instrumental music education in Grades 8 and 11 and critical thinking as assessed by the Pennsylvania System of School Assessment. The subsets that were examined included Reading (B): Interpretation and Analysis of Fictional and Nonfictional Text, which assesses the academic standards 1.1, Learning to read independently; standard 1.2, Reading critically in all content areas; standard 1.3, Reading, analyzing and interpreting literature, and Mathematics, sections C.1 Geometry- Analyze characteristics of two and three dimensional shapes, D.2 Algebraic concepts- Analyze mathematical situations using numbers, symbols, words, tables and/or graphs, and E.1 Data analysis and probability- Interpret and analyze data by formulating answers or questions (Pennsylvania Department of Education,

2009-2010). The sample consisted of Instrumental students (N = 50) and Noninstrumental music students (N = 50) over 2 graduated high school classes. The results indicated that the Instrumental music sample consistently outscored the Noninstrumental music sample when comparing the Reading B, Mathematics M.C.1, M.D.2, and M.E.1 subsections of the Pennsylvania System of School Assessment with significant increases noted from 8th to 11th grade.
