### **THE BRITISH BOOK TRADE AND SPANISH AMERICAN INDEPENDENCE**

---

---

### **EDUCATION AND KNOWLEDGE TRANSMISSION IN TRANSCONTINENTAL PERSPECTIVE**

---

Routledge The British Book Trade and Spanish American Independence is a pioneering study of the export of books from Britain to early-independent Spanish America, which considers all phases of production, distribution, reading, and re-writing of British books in the region, and explores the role that these works played in the formation of national identities in the new countries. Analysing in particular the publishing house of Rudolph Ackermann, which dominated the export of British books in Spanish to the former colonies in the 1820s, it discusses the ways in which the printed form of these publications affected the knowledge conveyed by them. After a survey of the peculiar characteristics of print culture in early-independent Spanish America and the trends in the import of European books in the region, the author examines the operation of Ackermann's publishing enterprise. She shows how the collaborative nature of this enterprise, involving a number of Spanish American diplomats as sponsors and Spanish exiles as writers and translators, shaped the characteristics of its publications, and how the notion of 'useful knowledge' conveyed by them was deployed in the service of both commercial and educational concerns. The hitherto unexplored mechanisms of book import, distribution, wholesale and retailing in Spanish America in the 1820s are also analysed as is the way in which the significance of the knowledge transmitted by those books shifted in the course of their production and distribution. The author examines how the question-and-answer form of Ackermann's textbooks constrained both publishers and writers and oriented their readers' relation with the texts. She then looks at the various ways in which foreign knowledge was appropriated in the construction of individual, social, national, and continental identities; this is done through the study of a number of individual reading experiences and through the analysis of the editions and adaptations of Ackermann's textbooks during the nineteenth century.

### **COUNT US IN**

---

---

### **HOW TO MAKE MATHS REAL FOR ALL OF US**

---

University of Wales Press Mathematics, like language, is a universal experience. Every society counts and is empowered by its ability to count and to measure. The mathematical processes developed within various cultures differ widely, and Count Us In explores these cultural links, drawing examples from the author's personal experiences. The process of counting, like the process of communicating with words, is common to all societies worldwide but, just as there is a rich variety of languages, so too is there a rich variety in methods of counting and of recording numbers - methods that have developed over centuries to meet the needs of various groups of people. The narrative of this book takes the form of a collection of short stories based on the author's personal experience, linked together by a number of sub-themes. As a popular book on mathematics and on the personalities who created that mathematics, there are no prerequisites beyond the reader's rudimentary and possibly hazy recollection of primary-school mathematics and a curiosity to know more.

### **CASE-BASED TEXTBOOK OF ECHOCARDIOGRAPHY**

---

Springer This volume is a step-by-step educational echocardiography textbook from basic principles to advanced concepts. It is designed to rationalise and instruct readers on the rapid development in echocardiographic techniques, including real-time three-dimensional echocardiography, strain/strain rate imaging, and speckle tracking, which have greatly expanded the capabilities of cardiac imaging while overshadowing the importance of the basics of echocardiography. Case-Based Textbook of Echocardiography offers a comprehensive review of echocardiography from basic skills to advanced techniques, including practical information from recently published ASE/EACVI guidelines and explanatory movies and figures. Providing balance between the science and clinical pearls, it is of great interest for all trainee cardiologists and echocardiographers and helpful to all clinicians in cardiology, internal medicine, cardiac surgery, interventional cardiology and paediatric cardiology.
