Tales From the Loop

Simon and Schuster The basis for the new Amazon Prime Original Series! Perfect for fans of E.T. and Stranger Things—the first narrative artbook from acclaimed author and artist Simon Stålenhag about a fictionalized suburban town in the 1980s inhabited by fantastic machines and strange, imaginative beasts. In 1954, the Swedish government ordered the construction of the world's largest particle accelerator. The facility was complete in 1969, located deep below the pastoral countryside of Mälardalen. The local population called this marvel of technology The Loop. These are its strange tales. From the same author who wrote the imaginative artbook *The Electric State*, this "haunting," (The Verge) "sophisticated sci-fi" (The Nerdist) follows the bizarre stories from otherworldly creatures and is a page-turner you won't be able to put down.

An Episode of War

Harper Collins *Though best known for The Red Badge of Courage, his classic novel of men at war, in his tragically brief life and career Stephen Crane produced a wealth of stories—among them "The Monster," "The Upturned Face," "The Open Boat," and the title story—that stand among the most acclaimed and enduring in the history of American fiction. This superb volume collects stories of unique power and variety in which impressionistic, hallucinatory, and realistic situations alike are brilliantly conveyed through the cold, sometimes brutal irony of Crane's narrative voice.*

How Churchill Waged War

The Most Challenging Decisions of the Second World War

Grub Street Publishers *An analytical investigation into Prime Minister Winston Churchill's decision-making process during every stage of World War II. When Winston Churchill accepted the position of Prime Minister in May 1940, he insisted in also becoming Minister of Defence. This, though, meant that he alone would be responsible for the success or failure of Britain's war effort. It also meant that he would be faced with many monumental challenges and utterly crucial decisions upon which the fate of Britain and the free world rested. With the limited resources available to the UK, Churchill had to pinpoint where his country's priorities lay. He had to respond to the collapse of France, decide if Britain should adopt a defensive or offensive strategy, choose if Egypt and the war in North Africa should take precedence over Singapore and the UK's empire in the East, determine how much support to give the Soviet Union, and how much power to give the United States in controlling the direction of the war. In this insightful investigation into Churchill's conduct during the Second World War, Allen Packwood, BA, MPhil (Cantab), FRHistS, the Director of the Churchill Archives Centre, enables the reader to share the agonies and uncertainties faced by Churchill at each crucial stage of the war. How Churchill responded to each challenge is analyzed in great detail and the conclusions Packwood draws are as uncompromising as those made by Britain's wartime leader as he negotiated his country through its darkest days.*

Kickapoos

Lords of the Middle Border

University of Oklahoma Press *The Kickapoo Indians, members of the Algonquian linguistic community, resisted white settlement for more than three hundred years on a front that extended across half a continent. In turn, France, Great Britain, the United States, Spain, and Mexico sought to placate and exploit this fiercely independent people. Eventually forced to remove from their historic homeland to territory west of the Mississippi River, the Kickapoos carried their battle to the plains of the Southwest. Here not only did they wage active and imaginative war, but certain bands became area merchants, acting as middlemen between the Comanche and Kiowa Indians and the United States government. They developed a flourishing trade in plunder and stolen livestock, but their most lucrative "goods" were the white captives whom they obtained from the Comanches and others. In 1873, after several profitable years of raiding in Texas for the Mexican Republic, the Kickapoos reluctantly settled on a reservation in Indian Territory. Corrupt politicians, land swindlers, gamblers, and whisky peddlers preyed on the tribe, and it was not until the twentieth century that the Kickapoos received just treatment at the hands of the United States government.*

Tales from the Loop - Out of Time

There are rumors of a mechanical contraption that roams around the fields outside the small communities of the Mälaren Islands. At the same time, flyers asking for information on lost pets are increasing on the bulletin board outside the grocery store. On TV, the weatherman speaks of "random storm gusts" - and hasn't there been severely bad weather the past few nights? This is the beginning of a series of mysteries that lead the children out into the wilderness of The Loop and down into its secret tunnels. But what does this all have to do with the long-awaited summer camp, the magnetine ship Susi Talvi, and the 1969 moon landing? This is a 124-page full-color hardback module to the multiple award-winning Tales from the Loop roleplaying game. Made in the UK.

Red Carolinians

"At one time or another, as many as thirty tribes or bands lived within the borders of the present state, yet this number does not include half the Red Men who came under the influence of the Charles Town government. Through contacts made by such early explorers as Woodward and Hughes, trade agreements were entered into with Creek, Choctaw, and Chickasaw, as well as with the Cherokee and other tribes native to the province ... present knowledge of these nations comes from the manuscript records of the Indian Commission, the Council and Commons House Journals, and report of various officials ..."--Preface.

A History of Blairs Valley

Createspace Independent Publishing Platform *A History of Blairs Valley was started in 1967 by 28-year-old Gerald J. Sword, a descendant of the Blair family who settled in Blairs Valley, which encompasses lands in Washington County, Maryland and Franklin County, Pennsylvania. It was first published in 1968. Many years later, his niece, Debra Carbaugh Robinson, discovered a second manuscript with updates, additional information, and photographs while looking through Gerald's many historic research files. Gerald had sadly passed away on April 14, 1999 and was not able to complete his second work on Blairs Valley history. His family believed strongly that he would want the information to be made available to the public. We started a page of Facebook called Conococheague Memories to share all of our historical finds with the public. It became apparent that there were many people who were interested in learning more about the origins of Blairs Valley, its people, and their history through Conococheague Memories. Many people asked us how to get a copy of Gerald's original book on Blairs Valley which had been out of print for many years. That is how this new book became a reality. The reader will find information on the Shelby, Blair, Davis, Ruckert, Feidt, Bartle, Shirley, Clopper, Dodge, Sword, Bricker, Wise, Carbaugh, Repp and other families who resided in Blairs Valley in its earlier years. Information on the Mason and Dixon Line, the Feidt House, the Sword House, the Blair Mansion, the Blairs Valley Store, Clopper's Grove Picnic Grounds, the Blairs Valley School and so much more can be found in the pages of A History of Blairs Valley, presented by Conococheague Memories.*

Innovating Government

Normative, Policy and Technological Dimensions of Modern Government

Springer Science & Business Media Governments radically change under the influence of technology. As a result, our lives in interaction with public sector bodies are easier. But the creation of an electronic government also makes us more vulnerable and dependent. Dependent not just on technology itself, but also on the organizations within government that apply technology, collect and use citizen-related information and often demand the citizens submit themselves to technological applications. This book analyzes the legal, ethical, policy and technological dimensions of innovating government. Authors from diverse backgrounds confront the reader with a variety of disciplinary perspectives on persistent themes, like privacy, biometrics, surveillance, e-democracy, electronic government, and identity management. Clearly, the use of technology by governments demands that choices are made. In the search for guiding principles therein, an in-depth understanding of the developments related to electronic government is necessary. This book contributes to this understanding. This book is valuable to academics and practitioners in a wide variety of fields such as public administration and ICT, sociology, political science, communications science, ethics and philosophy. It is also a useful tool for policymakers at the national and international level. Simone van der Hof is Associate Professor at TILT (Tilburg Institute for Law, Technology, and Society), Tilburg University, The Netherlands.
