The State of the Environment in Asia

1999/2000

Springer Science & Business Media Why Asia? Significance and Purpose of The State of the Environment in Asia 1. Asia and the Future of the Global 2. From Swift Progress to Big Problems Environment Because in recent years Asia has been called the center of world economic growth, until now global attention fo Western social scientists used to regard Asia as a "stag cused on the region has regarded it solely as one of swift nant society," and, except for Japan, people have thought of progress. postwar Asia as a region that is typical of the continuing But while this East Asia-centered rapid economic "vicious circle of poverty." I growth gave Asia its momentum, industrialization and ur But in contrast to other developing regions, since the banization were causing environmental and urban problems latter half of the 1960s or 1970s South Korea, Taiwan, Hong throughout the region, as well as destroying rural communi Kong, and Singapore were the first to follow in Japan's foot ties and those countries' historical and cultural traditions.

Philippine Development

Environmental Challenges and Governance

Diverse perspectives from Asia

Routledge The economies located in East, South and Southeast Asia have witnessed an interesting growth-sustainability trade-off over the last decades. While growth considerations have paved ways for deepened ties with growing trade-investment waves and increasing population pressure necessitated exploitation of hitherto unutilized natural resources, focus on environmental sustainability has been a recent consideration. The growth impetus still playing a key role in these economies, it becomes imperative that the countries effectively address the key sustainability concerns, e.g. air and water pollution, land degradation, loss of biodiversity, climate change issues like CO2 emissions etc. But how prepared is the governance mechanism of these countries, covering not only the legislative and administrative framework but also involvement of the judiciary, presence of spirited civil society and active engagement of stakeholders in policy-framing dialogues, to rise up to these challenges? The book seeks an answer to this question through the environmental governance mechanism and natural resource conservation policies in three vibrant regions within Asia. A holistic development dimension of sustainable development path emerges, through discussion of policies adopted by developed (Japan, South Korea), upper-middle (China, Malaysia), developing (India, Indonesia, Philippines, Sri Lanka, Thailand) and least developed countries (Bangladesh, Myanmar, Nepal).

Water Policy in the Philippines

Issues, Initiatives, and Prospects

Springer This book describes challenges in the policy and practices of the various water sectors in the Philippines that have led to water conflicts. Such conflicts arise in the nature of rural-urban competition, trans-administrative boundary issues, and inconsistencies between customary and state rules, and even within state rules. Using inter-, multi- and trans-disciplinary approaches, and analysing from various scales - community, local and national governments - the book discusses policies and strategies needed towards achieving water security especially for the poor. Reflective of the complex and urgent water policy and governance issues in many developing countries, the book offers valuable lessons and insights to policy makers, water sector managers, planners and regulators as well as to academics, researchers and students.

Judicial Handbook on Environmental Law

UNEP/Earthprint "This handbook is intended to enable national judges in all types of tribunals in both civil law and common law jurisdictions to identify environmental issues coming before them and to be aware of the range of options available to them in interpreting and applying the law. It seeks to provide judges with a practical guide to basic environmental issues that are likely to arise in litigation. It includes information on international and comparative environmental law and references to relevant cases."--P. iii.

Asia-Pacific Legal Development

UBC Press This manuscript is a collection of essays on various issues in Asia-Pacific legal systems. It has been written within the framework of comparative legal research; thus, chapters address various of the ASEAN nations, as well as Canada, Australia, and New Zealand. The topics in this comprehensive volume, which offer Canadian perspectives on contemporary Asian law, include securities, prostitution, environmental, and constitutional law.

Strategies for Sustainable Development

Local Agendas for the Southern Hemisphere

John Wiley & Son Limited Expresses the trade-off between economic goals and mechanisms and their effects on the ecological systems which support human existence. Examines the potential of sustainable development as an idea, a focus for planning and a source of moral and political regeneration and points to problems in each of these areas. Explores the philosophical and epistemological dimensions of sustainability. Discusses the possibility of combining sustainability with development from the perspective of policy and management in a number of developing countries.

Environmental Law and Enforcement in the Asia-Pacific Rim

Designing for Consensus

The ASEAN Grid

Institute of Southeast Asian Studies This book examines the concept of the ASEAN electricity grid: its applications elsewhere in the world, its rudimentary beginnings in Southeast Asia, and the many factors affecting its feasibility in the ASEAN region. It also seeks to answer the question: Is it possible to design the electricity trading relationship for a politically feasible ASEAN grid? Can technology be adjusted to suit the political maturity of the regional grouping?
