Joan Didion Substance and Style *State University of New York Press* Explores how Didion's nonfiction prose style, often lauded for being beautiful and poetic, also works rhetorically. Much acclaimed and often imitated, Joan Didion remains one of the leading American essayists and political journalists of the twentieth and twenty-first centuries. The lone woman writer among the New Journalists in the 1960s and '70s, Didion became a powerful critic of public and political mythologies in the '80s and '90s, and was an inspiration for those, particularly women, dealing with aging and grief and loss in the early 2000s. An iconic figure, Didion is still much admired by readers, critics, and essayists, who speak of looking to her prose style as a model for their own. In Joan Didion: Substance and Style, Kathleen M. Vandenberg explores how Didion's nonfiction prose style, often lauded for its beauty and poetry, also works rhetorically. Through close readings of selected nonfiction from the last forty years—biographically, culturally, and politically situated—Vandenberg reveals how Didion deliberately and powerfully employs style to emphasize her point of view and enchant her readers. While Didion continues to publish and the "Cult of Joan," as one author calls it, grows seemingly stronger by the day, this book is the only extended treatment of Didion's later nonfiction and the first sustained and close consideration of how her essays work at the level of the sentence. Kathleen M. Vandenberg is Senior Lecturer in Rhetoric at Boston University. Handbook of Corporate Lending: A Guide for Bankers and Financial Managers Revised Banking experts review, simplify corporate lending process. James S. Sagner and Herbert Jacobs advise on corporate lending to help bankers, lenders and corporate finance managers avoid future credit problems in Handbook of Corporate Lending: A Guide for Bankers and Financial Managers. The authors argue for a fresh approach to improving bank lending to corporations. Historically, most banks spend their efforts in evaluating loan proposals from businesses before approving or denying credit. The authors argue persuasively and with examples that lending is a two-step process: the analysis of the company in the context of its industry and its competitors; and then a loan agreement that identifies the credit risks. The book demonstrates through the use of case studies how to limit those risks to the lenders and just as importantly, to the company. Sagner and Jacobs, former senior bankers and consultants and educators to the banking industry, systematically review the process of corporate credit decision-making. Too few banks are now providing adequate formal credit-training. This leaves bankers without the proper guidance to review credit requests and create precautions for corporate borrowers and lenders. Sagner and Jacobs show readers how such factors influence credit, funding, pricing decisions and proper structuring of loans. The book covers such topics as trends in commercial loan activity, the credit loan agreement, the banker's responsibilities, risk management measurement and the credit process. Eight cases in the book highlight a variety of credit issues. "The book is written from the perspective of the banker or other lender who makes these important decisions," said Sagner. "But business people, particularly global financial managers who must secure credit and maintain excellent relations with their lenders, need to understand this important information." Sagner and Jacobs help readers navigate the issues confronting financial and banking managers. The book aims to explain the financial processes lenders use to make decisions, and to analyze the strengths and weaknesses of credit measurements so that business and financial managers are better prepared to arrange credit facilities.
