Mastering the Financial Dimension of Your Psychotherapy Practice

The Definitive Resource for Private Practice

Taylor & Francis **Written by two therapists with extensive business experience, Mastering the Financial Dimension of Your Psychotherapy Practice addresses the clinical and financial challenges of establishing and maintaining a successful private practice. This book contains updated content on investing strategies, changes in the insurance marketplace, and trends in the marketing of a psychotherapy practice. The first of five sections explores the life cycle of the modern therapy practice, offering best business and investing practices for each phase. In the second and third sections, the authors consider the emotional dimension in the development of a private practice. The fourth section offers a basic course in financial planning, including an investigation into five common financial mistakes therapists make and various solutions to each situation. The fifth section is designed to offer a road map of actions to take in establishing a financial plan. Concluding the book is an inspirational discussion of how the therapist in private practice can create a career with meaning, fulfillment, personal satisfaction, and solid financial rewards.**

Mastering Reflective Practice

Corwin Press **Master the Downey Walk-Through for reflective dialogue with this must-have sequel! This sequel to the best-selling The Three-Minute Classroom Walk-Through gives school leaders an expanded examination of the Downey Walk-Through model of coaching and supervision. Clarifying common misconceptions and misapplications, the authors focus on how to engage teachers in reflection and professional dialogue after the walk-through to improve their practice. The resource provides examples, activities, and guidelines for changing schools one teacher at a time, and shows leaders how to: Provide effective follow-up discourse without criticizing or demoralizing teachers Build collegial relationships with staff Help teachers see their power to become continuously improving professionals**

Mastering the Niger

James MacQueen's African Geography and the Struggle over Atlantic Slavery

University of Chicago Press **In Mastering the Niger, David Lambert recalls Scotsman James MacQueen (1778-1870) and his publication of A New Map of Africa in 1841 to show that Atlantic slavery—as a practice of subjugation, a source of wealth, and a focus of political struggle—was entangled with the production, circulation, and reception of geographical**

knowledge. The British empire banned the slave trade in 1807 and abolished slavery itself in 1833, creating a need for a new British imperial economy. Without ever setting foot on the continent, MacQueen took on the task of solving the “Niger problem,” that is, to successfully map the course of the river and its tributaries, and thus breathe life into his scheme for the exploration, colonization, and commercial exploitation of West Africa. Lambert illustrates how MacQueen’s geographical research began, four decades before the publication of the New Map, when he was managing a sugar estate on the West Indian colony of Grenada. There MacQueen encountered slaves with firsthand knowledge of West Africa, whose accounts would form the basis of his geographical claims. Lambert examines the inspirations and foundations for MacQueen’s geographical theory as well as its reception, arguing that Atlantic slavery and ideas for alternatives to it helped produce geographical knowledge, while geographical discourse informed the struggle over slavery.

Geosystems

An Introduction to Physical Geography, Global Edition

For Introductory Physical Geography Courses Among the most highly regarded in physical geography, Robert Christopherson's bestselling texts are known for their meticulous attention to detail, currency, accuracy, and rich integration of climate change science. *Geosystems: An Introduction to Physical Geography, Ninth Edition* is uniquely organized to present Earth systems topics as they naturally occur: atmosphere, hydrosphere, lithosphere and biosphere. This interconnected and organic systems-based approach is highlighted in the strong pedagogical tools, structured learning path, and up-to-date information found in the text. This new edition presents bold new features that cultivate an active learning environment both in and outside the classroom. The Ninth Edition can be made available with MasteringGeography(TM), the most effective and widely used online tutorial, homework, and assessment system for the sciences. **Note:** You are purchasing a standalone product; MasteringGeography does not come packaged with this content. MasteringGeography is not a self-paced technology and should only be purchased when required by an instructor. MasteringGeography will provide an interactive and engaging learning experience for your students. **Here's how:** *Personalize learning with MasteringGeography: MasteringGeography provides students with engaging and interactive experiences that coach them through introductory physical geography with specific wrong-answer feedback, hints, and a wide variety of educationally effective content. *Leverage strong pedagogical tools and a structured active learning path: The text reinforces central hallmark physical geography themes of Earth systems, human-Earth relations, and global climate change by providing a consistent framework for mastering chapter concepts. *Teach with current and relevant content. An emphasis on currency provides students with compelling reasons for learning physical geography.

World Regions in Global Context

Peoples, Places, and Environments

Prentice Hall For courses in world regional geography. **Conceptual Exploration of World Regions and the Myriad Issues Critical to Geography Today** *World Regions in Global Context* presents a strong global sensibility and an emphasis on current events, with examples of interdependent development, spatial and social inequality, and questions of spatial justice. The authors maintain that regions are the outcomes of the twin forces of globalization and regionalization. Therefore, each regional chapter stresses the global systems of connection that drive unique regional processes, making regions different. By studying regions, students not only learn the critical elements of different places, but also come to understand the fundamental processes that drive change. The Sixth Edition is a briefer, more visual text that still maintains its conceptual rigor by addressing today's critical geographic themes, incorporating deeper focus on sustainability issues, new human stories from the regions, cutting-edge data visualizations and infographics, including a

completely modernized cartography program, and much more. Also Available with MasteringGeography™ This title is also available with MasteringGeography—an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Interactive, self-paced tutorials provide individualized coaching to help students stay on track. With a wide range of activities available, students can actively learn, understand, and retain even the most difficult concepts. Interactive Evaluation Practice

Mastering the Interpersonal Dynamics of Program Evaluation

SAGE Publications You've taken your introduction to evaluation course and are about to do your first evaluation project. Where do you begin? *Interactive Evaluation Practice: Managing the Interpersonal Dynamics of Program Evaluation* helps bridge the gap between the theory of evaluation and its practice, giving students the specific skills they need to use in different evaluation settings. Jean A. King and Laurie Stevahn present readers with three organizing frameworks (derived from social interdependence theory from social psychology, evaluation use research, and the evaluation capacity building literature) for thinking about evaluation practice. These frameworks help readers track the various skills or strategies to use for distinctive evaluation situations. In addition, the authors provide explicit advice about how to solve specific evaluation problems. Numerous examples throughout the text bring interactive practice to life in a variety of settings.

Mastering Refractive IOLs

The Art and Science

SLACK Incorporated The IOL technical specifications, the clinical data, and the necessary clinical and surgical skills comprise the scientific foundation for achieving a "premium" refractive outcome. To consistently achieve patient satisfaction, however, requires mastering the art of patient and IOL selection, communicating and counseling effectively, and providing a "premium" patient experience. This is a nontraditional book in which multiple experts are separately asked to discuss controversial subjects in a reader-friendly format. There is balanced coverage of all of the available refractive IOLs, as well as those that may become available in the near future. A major emphasis is placed on avoiding and managing complications or potentially dissatisfied patients. There are more than 200 chapters that are organized into 14 major sections, over 300 images, 100 tables, and 12 sidebars that cover every aspect of refractive IOL clinical practice. This is a comprehensive educational resource addressing the most demanding and rapidly evolving area in cataract and refractive surgery today and the first book to cover both the clinical and nonclinical aspects of offering refractive IOL services.

Mastering Geospatial Analysis with Python

Explore GIS processing and learn to work with GeoDjango, CARTOframes and MapboxGL-Jupyter

Packt Publishing Ltd Explore GIS processing and learn to work with various tools and libraries in Python. Key Features Analyze and process geospatial data using Python libraries such as; Anaconda, GeoPandas Leverage new ArcGIS API to process geospatial data for the cloud. Explore various Python geospatial web and machine learning frameworks. Book Description Python comes with a host of open source libraries and tools that help you work on professional geoprocessing tasks without investing in expensive tools. This book will introduce Python developers, both new and experienced, to a variety of new code libraries that have been developed to perform geospatial analysis, statistical analysis, and data management. This book will use examples and code snippets that will help explain how Python 3 differs from Python 2, and how these new code libraries can be used to solve age-old problems in geospatial analysis. You will begin by understanding what geoprocessing is and explore the tools and libraries that Python 3 offers. You will then learn to use Python

code libraries to read and write geospatial data. You will then learn to perform geospatial queries within databases and learn PyQGIS to automate analysis within the QGIS mapping suite. Moving forward, you will explore the newly released ArcGIS API for Python and ArcGIS Online to perform geospatial analysis and create ArcGIS Online web maps. Further, you will deep dive into Python Geospatial web frameworks and learn to create a geospatial REST API. What you will learn Manage code libraries and abstract geospatial analysis techniques using Python 3. Explore popular code libraries that perform specific tasks for geospatial analysis. Utilize code libraries for data conversion, data management, web maps, and REST API creation. Learn techniques related to processing geospatial data in the cloud. Leverage features of Python 3 with geospatial databases such as PostGIS, SQL Server, and SpatiaLite. Who this book is for The audience for this book includes students, developers, and geospatial professionals who need a reference book that covers GIS data management, analysis, and automation techniques with code libraries built in Python 3.

Mastering Public Administration

From Max Weber to Dwight Waldo

CQ Press In *Mastering Public Administration*, each chapter spotlights a significant theorist in the field, covering his/her life, research, writings, and impact, introducing the discipline's most important scholarship in both a memorable and approachable manner. The combination of biographical narrative with explanation and analysis makes abstract theories understandable while showing how subject scholars relate to each other in their work, providing much needed context. The book's chronological organization shows the evolution of public administration theory over time. With the new edition, the authors will be adding mini-chapters that link contemporary scholars and their research to the seminal literature.

How People Learn

Brain, Mind, Experience, and School: Expanded Edition

National Academies Press First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.
