GROCERY

THE BUYING AND SELLING OF FOOD IN AMERICA

Abrams *The New York Times*-bestselling author "digs deep into the world of how we shop and how we eat. It's a marvelous, smart, revealing work" (Susan Orlean, #1 bestselling author). In a culture obsessed with food—how it looks, what it tastes like, where it comes from, what is good for us—there are often more questions than answers. Ruhlman proposes that the best practices for consuming wisely could be hiding in plain sight—in the aisles of your local supermarket. Using the human story of the family-run Midwestern chain Heinen's as an anchor to this journalistic narrative, he dives into the mysterious world of supermarkets and the ways in which we produce, consume, and distribute food. *Grocery* examines how rapidly supermarkets—and our food and culture—have changed since the days of your friendly neighborhood grocer. But rather than waxing nostalgic for the age of mom-and-pop shops, Ruhlman seeks to understand how our food needs have shifted since the mid-twentieth century, and how these needs mirror our cultural ones. A mix of reportage and rant, personal history and social commentary, *Grocery* is a landmark book from one of our most insightful food writers. "Anyone who has ever walked into a grocery store or who has ever cooked food from a grocery store or who has ever eaten food from a grocery store must read *Grocery*. It is food journalism at its best and I'm so freakin' jealous I didn't write it." —Alton Brown, television personality "If you care about why we eat what we eat—and you want to do something about it—you need to read this absorbing, beautifully written book." —Ruth Reichl, *New York Times*-bestselling author

PARENTOLOGY

EVERYTHING YOU WANTED TO KNOW ABOUT THE SCIENCE OF RAISING CHILDREN BUT WERE TOO EXHAUSTED TO ASK

Simon and Schuster An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
