JUDGMENT IN BERLIN

A SPY STORY

Independently Published 'Judgment in Berlin' is the third book in Noel Hynd's Berlin series. It is 1948. World War Two is over, Hitler is dead. The Nuremberg trials have concluded. The Marshall Plan attempts to rebuild Europe, though Germany remains occupied by American, British, French, and Soviet military forces. William

Thomas Cochrane, an American intelligence agent, is in England with his wife, Laura, visiting friends and family. Bill Cochrane has accepted an invitation to be a guest lecturer for one year at the University of Cambridge. But when summer arrives, so does the first major international crisis of the postwar years. Under Joseph Stalin's orders, the Soviet Union employs the Red Army to block the Western Allies' railway, road, and canal access to the sectors of Berlin under Western control. The Berlin Blockade is retaliation for the Western powers' attempt to institute a pro-Western currency, the Deutschmark, throughout Germany, including Berlin, the former capital. The Soviets offer to end the blockade if the Western Allies withdraw the newly introduced currency from West Berlin. The Allies refuse. But there is no mistaking Soviet tenacity. Soviet Foreign Minister Vyacheslav Molotov proclaims, "What happens to Berlin, happens to Germany. What happens to Germany, happens to Europe." "And what happens to Europe, happens to the world," President Harry Truman angrily retorts in Washington. "If we can't supply Berlin by train or truck or boat, well, then, we'll damned well bring everything in by airplane!" There is no mistaking the irony: the United States may have been on the winning side of World War Two, but the postwar years quickly have turned old alliances upside down. Americans now defend the enemy capital they bombed just a few years earlier. Truman's words are barely dry in the ink of world newspapers when American and British military aircraft begin a joint operation in support of Berlin, the Berlin Airlift, one of the most iconic "peacetime" operations of the twentieth century. Military aircrews from Canada, New Zealand, France, and South Africa soon join the Americans and the British, flying more than two hundred thousand sorties in the next fifteen months. The airlift will provide West Berliners essentials such as fuel, fresh water, and food. But is it also a potential flashpoint for another world war? As the airlift begins, Bill Cochrane's phone rings in the middle of a balmy, summer night in Cambridge. The lecturing plans and a month of vacationing will have to wait. There are other events surrounding the Blockade and the Airlift that do not make the front pages, and those are the events dealt with in back alleys and dark corridors by men like Bill Cochrane. Cochrane's country is calling him back to active duty for a special assignment in the newly divided Germany, one which will take him behind newly drawn enemy lines and into a perilous netherworld of ruthless black marketeers, petty criminals, prostitutes, ex-Nazis, and Soviet spies. Cochrane has participated in dangerous covert operations in Germany twice in the past, barely escaping with his life both times. But now things are different. Onetime Soviet peers are now suspected enemies and an assortment of ex-Nazis may or may not be his new best friends. Old acquaintances from his previous visits to Germany reemerge, but why? An old gang of adversaries still lurks in the shadows that surround Cochrane's new operation, waiting perhaps for a moment of lethal payback. Espionage fans who read and enjoyed 'Flowers from Berlin' and 'Return to Berlin' will savor the return of Thomas Cochrane. Rich in detail, compelling in its re-creation of history, 'Judgment in Berlin' is historical World War Two spy fiction at its best. ***"The Berlin Airlift was the first clear Soviet defeat in the Cold War. It's the one thing that the Soviets started and failed to finish." - Diplomatic historian John Gaddis of Yale University.

A STRANGER'S GIFT

TRUE STORIES OF FAITH IN UNEXPECTED PLACES

Simon and Schuster True Stories of Faith in Unexpected Places In this very personal, welcoming book, Pulitzer Prize-winning author Tom Hallman, Jr., shares his journey of faith from indifferent agnostic to growing believer. Faith, Hallman tells us, is looking in the mirror in the morning and wondering why. It's about doubt and hope. It's catching a glimpse of a beacon piercing the fog of life and walking toward it, never knowing if you're headed in the right direction, but pressing onward. You'll meet ordinary people and be drawn into conversations that ask probing, almost intrusive questions—conversations that linger in your mind and resonate with your heart—from the ache of a mother who watched her baby die after only twenty days of struggling for life to the peaceful strength of a man working with those whose present situations mirror his past. Within these pages, you'll find real and honest accounts of everyday people whose discoveries of faith will inspire and comfort you on your own journey. *** The security lock thumped open, and I stepped into Level 3, a neonatal unit where I had been drawn to a drama played out minute by minute. As I stood above two cribs along a back wall, I wondered less about doctors, nurses, and medicine and more about God. Two babies had been born with a congenital diaphragmatic hernia. Both had been placed on a heart-lung bypass machine to let their organs rest. One boy had no name. His mother was a crack addict. After giving birth, she abandoned her baby and never returned to the hospital. In the adjacent crib lay Jonah Van Arnam. His parents were active members of a church and visited their son daily to pray for him and the nurses and doctors. One afternoon, a nurse pulled me aside and told me a miracle was taking place: the crack addict's baby was getting better. But . . . Jonah was dying. Why had God abandoned this couple and their son? Where was this so-called loving God? —from chapter 6

ASHES FROM A BURNING CORPSE

On a hot rainy summer night in Nassau, the Bahamas, in 1943, someone murdered Sir Harry Oakes, one of the richest men in the world, as he slept. When police found him the next morning, there were four wounds to his skull. His corpse had been abused, covered ritualistically with feathers and set on fire. The murder was perverse, horrific and jaded by anyone's standards. A few evenings later in New York City, the phone rang in the home of Alan Hynd, identified in that era by the NY Times as America's highest paid true crime reporter. The Oakes case would send the writer, with a quarter of a century of experience covering murders, to the Bahamas in wartime. He would try to bring truth to a case that was littered with a colorful cast of international characters and which, in its resolution, became unique in the annals of true crime. "Ashes From A Burning Corpse" is the fictionalized story of that writer's coverage of the case - and how it changed his life forever. It is also a literary and cultural journey into New York and the colonial Bahamas of the World War Two era, a story touching upon Hemingway, Sinatra and FDR, big-shot film and Broadway producers, crooked cops, gangsters and a murder trial so big that it knocked the world war off the front pages. Welcome to what is also a literary journey into true

crime, politics, book publishing and magazine work in the World War Two era, with allusions to writers from Edmond Pearson to Scott Fitzgerald. "Ashes" is part of a trilogy titled "An American True Crime Reporter in the 20th Century," three cases which were the centerpieces of a veteran real-life crime reporter's legacy. The trilogy will also include first person novels on the original Charles Ponzi swindling case, "The Pied Piper of Boston" and the Charles Lindbergh kidnapping case, "The Crimes of The Century." The latter two titles will appear in early 2018 and feature the same writer/reporter at earlier stages of his long career. Noel Hynd is the author of more than a dozen novels, originally published by Doubleday, Dial, Bantam, Tor, Kensington, Zondervan/HarperCollins, and currently, his own imprint, Red Cat Tales LLC Publishing of Los Angeles, California. He has sold more than 7 million books worldwide, including hardcover, trade paperback, mass market paperback, Literary Guild and digital editions. His best known titles in the espionage genre are "Flowers From Berlin" and "Truman's Spy." In the supernatural genre, his best known titles are "Ghosts" and "Cemetery of Angeles." "Ingenious...Suspense fiction that stands out!" - New York Times "Noel Hynd knows the ins and outs of Washington's agencies both public and private" - Publishers Weekly "A few notches above the Ludlums and Clancys of the world." - Booklist

THE SUMMER OF CHARLIE PONZI

One sweltering afternoon late in June 1919, a thirty-seven-year-old clerk named Charles Ponzi, who was employed by a Boston, Massachusetts brokerage house, opened an envelope from Spain and made a startling discovery. The envelope contained a postal reply coupon, something Ponzi had never heard of. The coupon, which the writer in Spain had enclosed to cover the postal reply from the brokerage house, had been purchased in Madrid for the equivalent of one cent in U.S. currency. Yet it was redeemable at any post office or bank in the United States for five cents. Ponzi pursed his lips and looked off into space. Here, he decided, was something worthy of serious investigation. So began a unique story in the history of American crime, and so begins 'The Summer of Charlie Ponzi, ' the newest novel by

espionage and crime author Noel Hynd. 'The Summer of Charlie Ponzi' is based on the true story of the involvement and reporting of his father, Alan Hynd, in the infamous Ponzi case in 1919 and 1920. Boston in the years after World War One was a bustling, booming metropolis, the fifth-largest city in the United States. The Roaring Twenties were underway. Immigrants from all over the world poured into Prohibition-era Boston. So did young, first-generation American men and women anxious to seek their fortune. America, and Boston in particular, was a wide-open place, filled with crime, jazz, flappers, a new easy morality, and speakeasies. There were two great baseball clubs - the Braves and the Red Sox - and six daily newspapers. Newspapers were everywhere. There were newsstands at North Station, in front of Symphony Hall, in front of Filene's, and in the streets of Charlestown, Southie and Dorchester. On the rare blocks with no newsstand, the hoarse, aggressive chant of newsboys filled the air. The Boston Post stood out among the daily papers. It was the fourth-leading morning newspaper in the country in circulation. There were many reasons The Post stood out, but one was city editor Eddie Dunn, the best newspaperman in Boston during the hard-drinking, two-fisted era of the 1920s. Eddie Dunn understood news, how to find it, get it, and sell it. By the end of 1919, Charlie Ponzi had hatched out his scheme: he would build his fortune on postal reply coupons and beat the banks in the money lending game. While banks were paying five percent per year, Ponzi promised investors fifty percent interest in forty-five days. He soon had people lining up at his office on School Street, practically throwing money at him. By April of 1920, Charlie Ponzi was taking in a \$250,000 every day in cash as his pyramid scheme swept the city. The offices of The Boston Post were also on School Street. Inevitably, The Post and Ponzi took notice and measure of each other. In the summer of 1920, their worlds collided. When the Ponzi swindle became the biggest local story of the year, even bigger than Sacco and Vanzetti, Eddie Dunn threw every spare reporter onto the story. By this time, Alan Hynd, still in his late teens, had cadged a job as a street reporter for The Post. He had only a few weeks of experience, but Dunn assigned him to his team of top reporters covering the case. 'The Summer of Charlie Ponzi' is the story of a young man covering the most brazen financial crime of the twentieth century. This hard-edged Jazz-Age tale is full of fascinating women and men drawn from the newsrooms, tenements, speakeasies, high social circles, financial boardrooms, streets, and sidewalks of Boston of the 1920s. Told in the young reporter's sly acerbic voice, the tale is at times brash and hilarious, at times heartbreaking, frequently astonishing, and always riveting.*'The Summer of Charlie Ponzi' joins 'Ashes from a Burning Corpse' in the series "An American True Crime Reporter in the 20th Century." The series recounts the major cases of the American reporter who would later become one of the best-known true crime writers of his era

A ROOM FOR THE DEAD

CreateSpace In this hard hitting and sharp-edged tale of the supernatural, Veteran New Hampshire State Police Detective Sergeant Frank O'Hara pursues a crazed serial killer whose crimes bear the grisly signature of Gary Ledbetter, a vicious murderer arrested by O'Hara and executed years earlier. Definitely not for the faint of heart. Mass market USA Today Best Seller in 1996. A Literary Guild Alternate Selection in 2005. It refuses to go away. Editorial Reviews From Publishers Weekly The chills come fast and hard in Hynd's latest, a riveting blend of ghost story and police procedural. New Hampshire state cop Frank O'Hara, approaching 50 and close to retirement, is given a case--a young woman is beheaded, her right hand cut off--that duplicates the M.O. of serial killer Gary Ledbetter. But Gary, a "low-rent Lothario" nabbed by O'Hara, was executed months ago in Florida, after political machinations moved the killer to a state with capital punishment. Since then, O'Hara's life has turned to ashes. He's taken seriously to booze, his wife has left him, his partner has committed suicide--and now, deep into another hated winter, something seems to be haunting his house: floors creak, doors slam, an empty rocking chair rocks. A tangle of right-wing state politics, skinhead thieves, a mysterious young woman and, increasingly, dialogues between O'Hara and what seems to be Gary's ghost lead the cop through past police corruption and malfeasance to a shattering conclusion. Throughout, the atmospheric are excellent and the local color first-rate: "There's ten months of winter and two months of bad skiing. The state animal is the skunk, the state bird is the black fly, the state citizen is the deadbeat, and the state sport is petty larceny." After several spy thrillers, Hynd switched to the occult with his previous novel, Ghosts . This spooky follow-up confirms that he's made the right choice. Copyright 1994 Reed Business Information, Inc. From Booklist Fans of Stephen King, John Saul, Dean Koontz, and the like will give Hynd a thumbs up for his latest shivery ghost story. Detective Frank O'Hara, a New Hampshire cop anticipating early retirement, has to rethink his plans when a case he closed six months earlier comes back to haunt him--literally. Gary Ledbetter was executed for torturing, killing, and dismembering at least five young women up and down the eastern seaboard. But now another murder has taken place, and this one has all the grisly trademarks of Gary's particularly gruesome style. Since it was O'Hara's dogged investigation that sent Gary to the electric chair, the detective finds himself assigned to reinvestigate one of the most puzzling and terrifying cases of his career. While Hynd doesn't quite invoke the same level of nightmarish terror as some of his fellow horror writers, he's good at macabre, mind-bending plots with plenty of grotesque details, and he effectively blends the horror and mystery genres.

IMPROVING ADULT LITERACY INSTRUCTION

OPTIONS FOR PRACTICE AND RESEARCH

National Academies Press A high level of literacy in both print and digital media is required for negotiating most aspects of 21st-century life, including supporting a family, education, health, civic participation, and competitiveness in the global economy. Yet, more than 90 million U.S. adults lack adequate literacy. Furthermore, only 38 percent of U.S. 12th graders are at or above proficient in reading. *Improving Adult Literacy Instruction* synthesizes the research on literacy and learning to improve literacy instruction in the United States and to recommend a more systemic approach to research, practice, and policy. The book focuses on individuals ages 16 and older who are not in K-12 education. It identifies factors that affect literacy development in adolescence and adulthood in general, and examines their implications for strengthening literacy instruction for this population. It also discusses technologies for learning that can assist with multiple aspects of teaching, assessment, and accommodations for learning. There is inadequate knowledge about effective instructional practices and a need for better assessment and ongoing monitoring of adult students' proficiencies, weaknesses, instructional environments, and progress, which might guide instructional planning. *Improving Adult Literacy Instruction* recommends a program of research and innovation to validate, identify the boundaries of, and extend current knowledge to improve instruction for adults and adolescents outside school. The book is a valuable resource for curriculum developers, federal agencies such as the Department of Education, administrators, educators, and funding agencies.

THE INCREDIBLE TITO

MAN OF THE HOUR

Open Road Media Fast's fascinating biography of Joseph Broz, known to the world as Tito, including his rise to power and his remarkable stand against fascism The world was mired in the Second World War when Howard Fast wrote The Incredible Tito. Upon the book's publication in 1944, there was still no united Yugoslavia, the Axis controlled most of Europe, and D-Day was only in the planning stages. In the Balkans, Tito was a beacon of hope against the advancing Nazis. He led a force of resistance fighters that bedeviled the occupying German army throughout Slavic regions and empowered people's committees to act as local government in all liberated areas. For observers on the political left, Tito seemed uniquely poised to unite the East and West against fascism—once and for all. NEURO-EDUCATION AND NEURO-REHABILITATION

Frontiers Media SA In the last decade, important discoveries have been made in cognitive neuroscience regarding brain plasticity and learning such as the mirror neurons system and the anatomo-functional organization of perceptual, cognitive and motor abilities.... Time has come to consider the societal impact of these

findings. The aim of this Research Topic of *Frontiers in Psychology* is to concentrate on two domains: neuro-education and neuro-rehabilitation. At the interface between neuroscience, psychology and education, neuro-education is a new inter-disciplinary emerging field that aims at developing new education programs based on results from cognitive neuroscience and psychology. For instance, brain-based learning methods are flourishing but few have been rigorously tested using well-controlled procedures. Authors of this Research Topic will present their latest findings in this domain using rigorously controlled experiments. Neuro-rehabilitation aims at developing new rehabilitation methods for children and adults with learning disorders. Neuro-rehabilitation programs can be based upon a relatively low number of patients and controls or on large clinical trials to test for the efficiency of new treatments. These projects may also aim at testing the efficiency of video-games and of new methods such as Trans Magnetic Stimulation (TMS) for therapeutic interventions in children or adolescents with learning disabilities. This Research Topic will bring together neuroscientists interested in brain plasticity and the effects of training, psychologists working with adults as well as with normally developing children and children with learning disabilities as well as education researchers directly confronted with the efficiency of education programs. The goal for each author is to describe the state of the art in his/her specific research domain and to illustrate how her/his research findings can impact education in the classroom or rehabilitation of children and adolescents with learning disorders.

CEMETERY OF ANGELS AUTHOR'S NEW REVISED EDITION

Bill and Rebecca Moore are an ordinary middle-aged couple raising two children in suburban Connecticut when an unsuccessful attempt on Rebecca's life by a mysterious stranger leaves her with a nasty case of post-traumatic stress. To help her recover, Bill suggests a move to L.A., where they buy and renovate an old house in a posh neighborhood. It seems, however, that the house hosts a particularly persistent ghost named Ronny, an ex-actor who apparently has emerged from the small private cemetery adjacent to the backyard. When both children disappear from the house with no sign of forced entry, LAPD gumshoe Ed Van Allen suspects the Moores of murder, although Rebecca gamely tries to convince him the ghost did it. Turning the implausible into the possible as the case unfolds, Hynd lets the evidence build to a genuinely terrifying climax that features earthbound criminals as well as a not-so-subtle example of divine retribution.

CHANGING TELEVISION ENVIRONMENTS

6TH EUROPEAN CONFERENCE, EUROITV 2008, SALZBURG, AUSTRIA, JULY 3-4, 2008, PROCEEDINGS

Springer Science & Business Media Since the time when interactive television emerged as a medium for the home environment, it has been permanently evolving. Changing requirements and user behavior, e.g., the demand for being mobile and have access to information and entertainment anywhere and anytime, are challenging interactive TV. New kinds of interactive services have to be conceived for the increasing mobile, ubiquitous requirements of the different user groups. In these changing environments, a better understanding of emerging contexts and their implications is essential. This gave birth to the idea for the theme of the EuroITV 2008 Conference: "Changing Television Environments." EuroITV 2008, the 6th edition of the European Conference on Interactive Television, was organized and hosted by the HCI and Usability Unit, ICT&S Center, University of Salzburg, Austria. The EuroITV Conference Series started at Brighton University in 2003 and 2004. It was followed by Aalborg University in 2005, Athens University of Economics and Business in 2006 and by CWI (Centrum Voor Wiskunde en Informatica) in Amsterdam 2007. We would like to thank all former Chairs for making this great conference series happen and for providing us with the

opportunity to host EuroITV 2008.

HEART OF THE ASSASSIN

A NOVEL

Simon and Schuster The year is 2045 and a warrior battles to save America from an Islamic mastermind in this smart and violent futuristic thriller from New York Times bestselling author Robert Ferrigno. Time is running out for the Islamic

Republic and the Bible Belt, the two warring nations that arose when the former United States split apart after an economic collapse left tens of millions unemployed and desperate for leadership. Weakened by their endless conflict, both countries are now threatened by the expansionist dreams of the Aztlán Empire (formerly known as Mexico) to the south, which has steadily encroached deep into the regions once called California, Arizona, New Mexico, and Texas. Riven by intellectual and social decay, both the Islamic Republic and the Belt are at the brink of collapse. The only solution is to reunite the countries and regain America's former power and global standing. And there's only one man who can do it: Rakkim Epps, genetically enhanced shadow warrior and hero of the two previous books in Robert Ferrigno's astonishing Assassin Trilogy. Time is also running out for Epps's archenemy, the Old One, the sly, immensely rich Muslim fanatic who seeks to create one world under his domination. Now more than one hundred and fifty years old, he is dying and unhappily knows it. His solution is to reunite the Islamic Republic and the Bible Belt his way, and his plan involves his voluptuous but deadly daughter, Baby, and none other than Rakkim himself. The Old One is aided by his sadistic, carbon-skinned enforcer, Gravenholtz, whom Rakkim failed to kill in an earlier encounter and who now wishes to kill Rakkim and those he loves. Meanwhile, there is a rumor of a discovery of a sacred relic in the contaminated ruins of Washington, D.C., a radiation zone peopled by diseased zombies and daring treasure hunters. It is into this deadly wasteland that Rakkim must secretly travel and retrieve the icon if he is to defeat Gravenholtz, Baby, and the Old One, and have even a chance to unite the two halves of America. A stunning stand-alone read, Heart of the Assassin is a feast of cinematic violence, brilliant plotting, and futuristic scene-setting. Completing Ferrigno's Assassin Trilogy, Heart of the Assassin confirms his position as a master of thriller fiction.

CONCEPTUAL TRANSFER AS AN AREAL FACTOR

SPATIAL CONCEPTUALIZATIONS IN MAINLAND SOUTHEAST ASIA

Walter de Gruyter GmbH & Co KG By analyzing conceptual transfer this volume offers new insight in areal linguistics. Mainland Southeast Asia unifies great linguistic richness consisting of numerous languages and countless varieties of genetically diverse language families. Nevertheless, the area is known as a prime example for linguistic convergence. Exemplified by spatial reference in Thai, Khmer, Lao and Vietnamese, this study reveals conceptual borrowing due to language contact as an areal defining feature. The results from the field-based data analysis may help answer what extent cultural impact can be used as evidence for the existence of linguistic areas. A speaker's cultural background might have a stronger impact on the choice of spatial language encoding than expected. Method and structure of argumentation can provide a model for similar questions addressing the existence of linguistic areas as well as to other cognitive dimensions within the Southeast Asian area under consideration. Therefore, the study can be seen as a significant contribution to analyze possibly existing conceptual areas empirically and exemplarily. Additionally, the investigation can serve as an important complement to empirical assumptions of conceptual transfer.

MATHEMATICS LEARNING IN EARLY CHILDHOOD

PATHS TOWARD EXCELLENCE AND EQUITY

National Academies Press Early childhood mathematics is vitally important for young children's present and future educational success. Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics. Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's potential in mathematics is not fully realized, especially those children who are economically disadvantaged. This is due, in part, to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities. Improvements in early childhood mathematics education can provide young children with the foundation for school success. Relying on a comprehensive review of the research, Mathematics Learning in Early Childhood lays out the critical areas that should be the focus of young children's early mathematics education, explores the extent to which they are currently being incorporated in early childhood settings, and identifies the changes needed to improve the quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early childhood mathematics. It will be especially useful for policy makers and practitioners—those who work directly with children and their families in shaping the policies that affect the education of young children.

CODE NAME CAMELOT - A NOAH WOLF THRILLER

Musterion Publishing "AMAZON #1 BESTSELLING AUTHOR" ONE OF THE BEST NEW VOICES IN THE ACTION THRILLER GENRE David Archer is back with a vengeance with his newest hero, Noah Wolf. After fans raved about his debut series, *The Sam Prichard Novels*, Archer now is about to back even harder. People are already throwing out names like Mitch Rapp and Alex Cross, but don't take my word for it. See what all the fuss is about before Archer becomes a household name! After witnessing the murder-suicide of his parents as a child, Noah suffers from a form of PTSD that has left him without emotion, without a conscience and without the ability to function as a normal human being. With the help of childhood friends, he learns to watch others around him and mimic their behaviors, in order to conceal the fact that his mind operates more like a computer that he has spent years programming. That program is what allows Noah to pass himself off as normal, by establishing parameters of right and wrong that are completely inviolable to him. As a young adult, Noah finds structure in the U.S. Army, and becomes an excellent and exemplary soldier, but when his self-imposed programming is put to the test by the murderous acts of the superior officer, Noah finds himself quickly made expendable, charged with crimes he did not commit and facing the possibility of execution. Without any reasonable hope for a reprieve, Noah's logic-based mind accepts his fate. Sometimes, though, things are not all as they seem to be, and Noah is offered one chance to save himself. It was his disability, his lack of emotion, that made him the soldier he had become. Now, an ultrasecret organization known as E & E wants Noah's talents, offering him a chance to survive... As the most deadly assassin the world has ever known."

ACQUIRED APHASIA IN CHILDREN

ACQUISITION AND BREAKDOWN OF LANGUAGE IN THE DEVELOPING BRAIN

Springer Science & Business Media One of the most fascinating problems in Behavioural Neurology is the question of the cerebral organization for language during childhood. Acquired aphasia in children, albeit rare, is a unique circumstance in which to study the relations between language and the brain during cerebral maturation. Its study further contributes to our understanding of the recovery processes and brain plasticity during childhood. But while there is a great amount of information and experimental work on brain-behaviour relationships in adult subjects, the literature about the effects of focal brain lesions in children is both exiguous and scattered throughout scientific journals and books. We felt it was time to organize a meeting where scientists in this field could compare their experiences and discuss ideas coming from different areas of research. A workshop on Acquired Aphasia in Children was held in Sintra, Portugal, on September 13-15, 1990, and attended by 44 participants from 13 different countries. The atmosphere was relaxed and informal and the group was kept small to achieve this effect. It was a very lively and pleasant meeting. Some consensus was indeed arrived at concerning methodological problems, definition of terms, and guidelines for future research. The main contributions are collected in this book which, we hope, will serve the scientific community as a reference work on Childhood Aphasia. I.P.M., A.C.C.
