Transnational America

Contours of Modern US Culture

Museum Tusculanum Press **This is an interdisciplinary analysis of the interaction between today's globalisation and Americanisation. Transnationalism involves a loosening of boundaries, a deterritorialisation of the nation-state, and higher degrees of interconnectedness among cultures and peoples across the globe. As people make transnational voyages and live lives of flexible citizenship in two or more cultures, they adhere to a new type of nationalism that creates an exclusionist discourse and builds the Other as conservative defenders of cruder territorial loyalties. This transnational solidarity -- a new communitarianism beyond the loyalties to any one place or ethnic group -- threatens the old order with its conceptions that assimilation and integration will remake the foreigner into a particular national citizen. The authors address the complex issues of globalisation, American mythology, Christian proselytising, modern slavery, conspiracy theory, apocalyptic terrorism, Vietnam stories, international feminism, changing gender roles, resurgent regionalism and the changing definitions of place.**

The Martians of Science

Five Physicists Who Changed the Twentieth Century

Oxford University Press **If science has the equivalent of a Bloomsbury group, it is the five men born at the turn of the twentieth century in Budapest: Theodore von Karman, Leo Szilard, Eugene Wigner, John von Neumann, and Edward**

Teller. From Hungary to Germany to the United States, they remained friends and continued to work together and influence each other throughout their lives. As a result, their work was integral to some of the most important scientific and political developments of the twentieth century. Istvan Hargittai tells the story of this remarkable group: Wigner won a Nobel Prize in theoretical physics; Szilard was the first to see that a chain reaction based on neutrons was possible, initiated the Manhattan Project, but left physics to try to restrict nuclear arms; von Neumann could solve difficult problems in his head and developed the modern computer for more complex problems; von Karman became the first director of NASA's Jet Propulsion Laboratory, providing the scientific basis for the U.S. Air Force; and Teller was the father of the hydrogen bomb, whose name is now synonymous with the controversial "Star Wars" initiative of the 1980s. Each was fiercely opinionated, politically active, and fought against all forms of totalitarianism. Hargittai, as a young Hungarian physical chemist, was able to get to know some of these great men in their later years, and the depth of information and human interest in *The Martians of Science* is the result of his personal relationships with the subjects, their families, and their contemporaries. "This is an important story that needs to be told, and Hargittai tells it well." - *Nature* "What a story! Hargittai, a Jewish-Hungarian like his heroes, tells the remarkable story of five immigrants, of vastly different politics, without whom American science (and the world) would not be the same." - Roald Hoffmann, Nobel laureate, Cornell University

Redefining Job and the Conundrum of Suffering

Wipf and Stock Publishers As a species, we are storytellers. Our best stories, those that endure for generations, are stories of trials and suffering and of surmounting the challenges set before us. The biblical Job is such a story, one that has become encrusted with centuries of interpretations. *Redefining Job and the Conundrum of Suffering* sets out to retell the story, to make "once upon a time" have meaning for us today. The best way to break old patterns is to start from scratch. *Redefining Job* dissects the story, the history of interpretations, and the history of how humanity has dealt with suffering. As the story is rebuilt with different insights gained from research in biblical studies, humanities, and science, the message can be viewed in a fresh light. The author of Job lived at a time when knowledge was expanding and our perception of our place in the universe was changing. From this perspective, Job becomes a hero. No longer patiently waiting for some ambiguous answer, he is demanding something more of his Maker. "Before I heard, but now I see" becomes an affirmation that he grasped a new path to discovering why we suffer and how we should respond.

Charles Taylor's Vision of Modernity Reconstructions and Interpretations

Cambridge Scholars Publishing **Charles Taylor is currently one the most renowned and influential contemporary philosophers. He is also widely quoted and discussed both in the social sciences and humanities. Taylor earns this attention through his remarkable capacity for presenting his conceptions in the broadest possible intellectual and cultural context. His philosophical intuition is fundamentally antinaturalistic, and tends toward developing broad syntheses without a trace of systematizing thinking, or any anarchic postmodernist methodology. His thought unites the past with the present, while culture is treated as a broad mosaic of discourses. Religion, art, science, philosophy, politics and ethics are all fields through which the Canadian philosopher deftly moves about in his search for their hidden structures and deepest sense. Taylor's philosophical output is prodigious. Recently, as his monumental study *A Secular Age* (2007) indicates, he has been concentrating much of his attention on the problem of secularization.. The selection of contributions in the current volume proffer a penetrating cross section of Taylor's thought. They are derived from a conference held in October 2008 in Lublin, Poland Although some of the articles are focused on a**

reconstruction of the philosopher's concepts, most either engage in a polemic with elements of his thought or find inspiration in it for their own reflections. The contributions are grouped in four parts: 1) philosophy and the modern self; 2) the problem of secularization; 3) between liberalism and communitarianism; and 4) language, literature, and culture.

Integral Dynamics

Political Economy, Cultural Dynamics and the Future of the University

Routledge The theory of integral dynamics is based on the view that the development of individual leaders or entrepreneurs requires the simultaneous development of institutions and societies. It seeks a specific way forward for each society, fundamentally different from, but drawing on, its past. Nearly every natural science has been transformed from an analytically-based approach to a dynamic one: now it is time for society and culture to follow suit locally and globally. Each culture, discipline and person is incomplete and is in need of others in order to develop and evolve. This book sets out a curriculum for a new integral, trans-cultural and trans-disciplinary area of study, inclusive of, but extending beyond, economics and enterprise. It embraces a trans-personal perspective, linking self with

community, enterprise and society, and focusing on the vital relationship between local identity and global integrity. For the government policy maker, the enlightened business practitioner, and the student and researcher into economics and enterprise, the new discipline is set out here in complete detail by a multi-national team of Gower's Transformation and Innovation Series authors. Illuminated with examples relating the conceptual to the practical, this is a text, not for a pre-modern, modern, or even post-modern era, but for what has been called our trans-modern age.

The Seven Godly Keys Towards Perfection

A Biblical Eternal Vision to Guide Achieving Permanent Meanings in Architecture and Worldview Exploring a Symbolism to Be Achieved in Canada and the Whole Globe

Xlibris Corporation **The history of human civilizations is lacking perfection. One theory replaces another, and no theory has ever been permanent in the worldview of all civilizations. In philosophy, the phenomenology philosophers admitted that all the history of philosophy included a meaningless conflict between two main attitudes the ideal and the natural standpoints. They added that the truth should be based on an interrelation between those two standpoints to start a third new standpoint, which is yet to have a lot of understanding to come! There is no agreement on any permanent timeless and placeless absolute truths, which are true keys toward perfection, neither in philosophy nor in any other field in worldview.**
