## The Role of International Law in the Elimination of Child Labor

**BRILL** Offering a contribution to the debates on child labor, this book presents child labor as a problem to which various branches of international law have made a response. It treats a range of international law sub-disciplines, and analyses child labor in the context of social, economic and cultural issues.

### Trade Unions and Child Labour

### A Guide to Action

**International Labour Organization** This publication sets out a practical framework for specific measures for trade union involvement at the local, national and international levels to protect against the use of child labour, based on the variety of approaches taken by workers' organisations around

the world. The book summarises the nature and extent of the child labour problem; gives examples of trade union activities in the campaign against child labour; sets out a framework for action based on these case studies; and examines the international response to child labour.

## International Labour Organization and Global Social Governance

Springer Nature **This open access book explores the role of the ILO (International Labour Organization) in building global social governance from multiple and mutually complementary perspectives. It explores the impact of this UN's oldest agency, founded in 1919, on the transforming world of work in a global setting, providing insights into the unique history and functions of the ILO as an organization and the evolution of workers' rights through international labour standards stemming from its regulatory mechanism. The book examines the persistent dilemma of balancing the benefits of globalization with the protection of workers. It critically assesses the challenges that emerge when international labour standards are implemented and enforced in highly diverse regulatory frameworks in international, regional, national and local contexts. The book also identifies feasible ways to achieve more inclusive labour protection, putting into perspective the tension between the economic and the social in the ILO's second century of operation. It includes reflections on the work of the ILO World Commission on the Social Dimension of Globalisation by Tarja Halonen, who as President of Finland co-chaired the Commission with Benjamin William Mkapa, President of Tanzania. Written by distinguished experts and scholars in the fields of international labour law and international law, the book provides an insightful and in-depth analysis of the role of the ILO as an international organization devoted to decent work and social justice. It also sheds light on tripartism and its particular role in the work of the ILO, examining the challenges that a profoundly changing working life presents in terms of labour protection and social justice, and examining the transnational dimension of labour law. Lastly, the book includes a postscript by Nobel economics laureate Professor Joseph E. Stiglitz.**

## The World of Child Labor

### An Historical and Regional Survey

M.E. Sharpe **"The World of Child Labor" details both the current and historical state of child labor in each region of the world, focusing on its causes, consequences, and cures. Child labor remains a problem of immense social and economic proportions throughout the developing**

world, and there is a global movement underway to do away with it. Volume editor Hugh D. Hindman has assembled an international team of leading child labor scholars, researchers, policy-makers, and activists to provide a comprehensive reference with over 220 essays. This volume first provides a current global snapshot with overview essays on the dimensions of the problem and those institutions and organizations combating child labor. Thereafter the organization of the work is regional, covering developed, developing, and less developed regions of the world. The reference goes around the globe to document the contemporary and historical state of child labor within each major region (Africa, Latin and South America, North America, Europe, Middle East, Asia, and Oceania) including country-level accounts for nearly half of the world's nations. Country-level essays for more developed nations include historical material in addition to current issues in child labor. All country-level essays address specific facets of child labor problems, such as industries and occupations in which children commonly work, the national child welfare policy, occupational safety regulations, educational system, and laws, and often highlight significant initiatives against child labor. Current statistical data accompany most country-level essays that include ratifications to UN and ILO conventions, the Human Development Index, human capital indicators, economic indicators, and national child labor surveys conducted by the Statistical Information and Monitoring Program on Child Labor. "The World of Child Labor" is designed to be a self-contained, comprehensive reference for high school, college, and professional researchers. Maps, photos, figures, tables, references, and index are included.

## Child Labour in a Globalized World

### A Legal Analysis of ILO Action

Routledge This volume examines the legal dimension of the ILO's action in the field of Child Labour. The authors investigate the implementation of the relevant legal instruments and assess the effectiveness of the ILO supervisory system. All relevant instruments are considered while particular attention is given to Convention 182 on the elimination of the worst forms of child labour. Child Labour in a Globalized World describes the ILO's activities concerning the eradication of child labour whilst assessing and evaluating the effectiveness of the relevant legal framework and functioning of the supervisory system. This book contextualizes the issue of the eradication of the worst forms of child labour in the recent doctrinal debate on the nature of labour standards and the transformation of the ILO. This important work will be a valuable resource for academics, researchers and policy-makers with an interest in labour law, international law, and children's rights.

## Child Labour in South Asia

Routledge **Child labour is a serious and contentious issue throughout the developing world and it continues to be a problem whose form and very meaning shifts with social, geographical, economic and cultural context. While the debate about child labour practice in developing countries appears to be motivated by growing competition in labour intensive products brought about by globalization, studies on this issue are both sparse and lopsided. This important book aims to shed light on this debate by documenting the experience of South Asian developing countries which have experienced rapid income and export growth. Based on evidence from Bangladesh, India, Nepal, Pakistan and Sri Lanka, this volume aims to improve our understanding about the link between trade, growth and child labour practices, as well as management of child labour in developing countries.**

## Children, Human Rights and Temporary Labour Migration

## Protecting the Child-Parent Relationship

Routledge This book focuses on the neglected yet critical issue of how the global migration of millions of parents as low-waged migrant workers impacts the rights of their children under international human rights law. The work provides a systematic analysis and critique of how the restrictive features of policies governing temporary labour migration interfere with provisions of the Convention on the Rights of the Child that protect the child-parent relationship and parental role in children's lives. Combining social and legal research, it identifies both potential harms to children's well-being caused by prolonged child-parent separation and State duties to protect this relationship, which is deliberately disrupted by temporary labour migration policies. The book boldly argues that States benefitting from the labour of migrant workers share responsibility under international

human rights law to mitigate harms to the children of these workers, including by supporting effective measures to maintain transnational child-parent relationships. It identifies measures to incorporate children's best interests into temporary labour migration policies, offering ways to reduce interferences with children's family rights. This book fills a gap that emerges at the intersection of child rights studies, migration research and existing literature on the purported nexus between labour migration and international development. It will be a valuable resource for academics, researchers and policymakers working in these areas.

### A Study on Magnitude, Dimension & Determinants

### World Report on Child Labour 2012

International Labour Organisation **How can we reduce child labor in the unfavorable circumstances of a global economic slowdown? This new flagship report, the first in a series to be published annually by the ILO's International Program on the Elimination of Child Labor, brings together research on child labor and social protection, identifying policies that are designed to achieve multiple social goals. This report includes analyses of national child labor trends based on the latest survey data, discussions of the role of poverty and economic shocks in rendering households vulnerable to child labor, and detailed consideration of income transfers, public employment programs, social insurance, and microcredit initiatives as they have been implemented around the world. The report distills a broad range of research in economic and social policy and should be of interest to those looking for ways to combat poverty in the present and reduce its burden on the next generation.**

## Child Labour

Polity **This disturbing new study provides a sharp and wide-ranging analysis of the economic exploitation of children. The author exposes the myth that child labour exists only in the third world, showing it to be an integral part of industrial societies both East and West. In the first comprehensive study of this issue, Alec Fyfe examines the economic and social conditions under which child labour flourishes in the USA, Britain, Europe, Central and South America and India. He looks at exploitation in the cities and in the country, and the impact of urbanization on patterns on child labour. Other areas discussed include the growth of child prostitution, the phenomenon of**

street children, child soldiers, and the impact of world recession on children's lives. The author discusses the role of international organizations such as the International Labour Organization and UNICEF in establishing international rights for children and in forming conceptions of what childhood should be. Fyfe concludes by calling for an overall anti-poverty strategy to combat world-wide exploitation, of which child labour is one particularly horrific aspect. This important work sets the agenda for debate in this area and will be of great interest to anyone working in the area of social work, child welfare, development studies and international politics.

## Combating Child Labour

### A Handbook for Labour Inspectors

International Labour Office This useful handbook provides those working in the field of labour inspection with basic information to understand and take action against children's work that is dangerous, exploitative and compromising to their future. It offers suggestions on how to assess abuse and risk, how to evaluate a particular situation holistically, and how to work towards action-oriented decisions. It contains advice on the training process as well as the elements to include in a training programme. It also offers an array of helpful tools labour inspectors can use to assess child labour problems. (ILO Website)

## The Right of the Child to a Clean Environment

Routledge This title was first published in 2000: A discussion on the right of a child to a clean environment. It links two important contemporary issues: human rights and the environment. The volume consists of the extended versions of some of the papers which were presented at a workshop on "The Right of a Child to a Clean Environment", held at Queen Mary and Westfield College, University of London, in 1997, and there are also some additional contributions. The workshop participants included Michael Anderson and Sylvia Bluck, Harry Post, Holly Cullen and Olufemi Elias. The additional contributors include Veronic Wright, Maria G. Doglioli and Soledad Aguilar. There are essays on general issues, selected case studies and annexes.

## Children and Youth in the Labour Process in Africa

African Books Collective It is increasingly clear that children and the youth today play a significant role in the labour process in Africa. But, to what extent is this role benign? And when and why does this role become exploitative rather than beneficial? This book on children and the youth in Africa sets out to address these questions. The book observes that in Africa today, children are under pressure to work, often engaged in the worst forms of child labour and therefore not living out their role as children. It argues that the social and economic environment of the African child is markedly different from what occurs elsewhere, and goes further to challenge all factors that have combined in stripping children of their childhood and turning them into instruments and commodities in the

labour process. It also explains the sources, dynamics, magnitude and likely consequences of the exploitation of children and the youth in contemporary Africa. The book is an invaluable contribution to the discourse on children, while the case studies are aimed at creating more awareness about the development problems of children and the youth in Africa, with a view to evolving more effective national and global responses.

## The Role of Social Protection in the Elimination of Child Labour

## Evidence Review and Policy Implications

This new report provides a rigorous review of what the latest research says about the power of social protection to combat child labour. Providing families with direct assistance to help them weather crises can help reduce negative coping strategies like child labour and child marriage. The report also shows that the impact of social protection measures is even greater if countries also put in place integrated systems that provide social protection benefits across the lifecycle. Unfortunately, too little progress has been made in expanding social protection services to reach the families in greatest need - and the children at greatest risk. Worldwide, the families of approximately 1.5 billion children 14 and under receive no family or child cash benefits at all. Authored jointly by the ILO and UNICEF, this report is intended to inform discussion at the 5th Global Conference on the Elimination of Child Labour, in South Africa in May 2022 - and to spur urgent action by governments to build comprehensive, child-sensitive

social protection systems. The joint endeavour of Alliance 8.7 and the Global Partnership for Universal Social Protection (USP2030) could also be an important vehicle to advance this effort and support Member State

## The Economics of Child Labour

Oxford University Press on Demand **Children throughout the world are engaged in a great number of activities classifiable as work. These range from relatively harmless, even laudable, activities like helping parents in their domestic chores, to morally and physically dangerous ones like soldiering and prostitution. If we leave out the former, we are left with what are generally called "economic" activities. Only a small minority, less than 4 percent of all working children, are estimated to be engaged in what ILO defines as the "unconditional" worst forms of child labour. The absolute number of children estimated to be engaged in the latter is, however, a stunning 8.4 million. Should we only be concerned about the worst forms of child labour? Most forms of child labour other than the worst ones have valuable learning-by-doing elements. Furthermore, child labour produces current income. If the family is credit rationed, child labour relaxes the liquidity constraint and increases current consumption. There is thus a trade-off between present and future consumption. To the extent that current consumption has a positive effect on future health (hence, on the child's future earning capacity and, more generally, utility), this trade-off may be lower than one might think. This book provides a blend of theory, empirical analysis and policy discussion. The first three chapters develop a fairly comprehensive theory of child labour, and related variables such as fertility, and infant mortality. Chapter 4, concerned with the effects of trade, contains both theory and cross-country empirical evidence. The remaining chapters are country studies, aimed at illustrating and testing different aspects of the theory in different geographical contexts. These chapters apply the latest developments in microeconomic methodology for dealing with endogeneity, unobserved heterogeneity, and the evaluation of public intervention.**

## Approaches to Reducing the Use of Forced or Child Labor

## Summary of a Workshop on Assessing Practice

National Academies Press **Globally, child labor and forced labor are widespread and complex problems. They are conceptually different phenomena, requiring different policy responses, though they may also**

overlap in practice. The Trafficking Victims Protection Act of 2000 (TVPA) was designed to reduce the use of child and forced labor in the production of goods consumed in the United States. The Act was reauthorized in 2003, 2005, and 2008. In response to provisions of TVPA, the the Bureau of International Labor Affairs requested that the National Research Council organize a two-day workshop. The workshop, summarized in this volume, discusses methods for identifying and organizing a standard set of practices that will reduce the likelihood that persons will use forced labor or child labor to produce goods, with a focus on business and governmental practices.

## Labor Literature

### Recent Additions to the Department of Labor Library

#### Hidden Hands

#### International Perspectives on Children's Work and Labour

Routledge **Hidden Hands** focuses on a specific and neglected area of contemporary child welfare; that of children's paid work and labour. This book provides the first cross-cultural examination of children's productive activities, their relationship to children's broader social lives, and their implications for the child's education, welfare and well-being. The contributors look at the situation both here and overseas. They discuss issues including conflicts between schooling, education and work in the UK, child poverty, motivating children to work, children from ethnic minorities, the work and labour of children in industrialised countries and the situation in the US, Denmark, Germany and Russia. The growth in the study of childhood encompasses anthropology, sociology, social policy and social work, as well as education. This book will be of use in all of these areas.

Springer Nature **This book discusses preventive actions that have led to reduction in the prevalence of child labor across the world over the 21st century. It identifies exemplary programs in the area of community prevention that have had exceptional results; for example, the involvement of children in hazardous work globally being reduced by half. It documents a wide range of contexts where concerted action has counteracted social permissiveness towards child labor, including psycho-educational interventions in preventing early school leaving and conditional cash benefits which counteract family poverty. The book presents a set of**

evidence-based practices that are particularly useful for psychologists, educators, and social workers. More broadly, this book is also of interest to policymakers, professionals, and activists involved in child protection policy or in implementing programs to promote the psychological well-being of children.
