Meet eight iconoclastic leaders who helmed firms where returns on average outperformed the S&P 500 by more than 20 times.

Merchants in the Temple **Inside Pope Francis's Secret Battle Against Corruption in the Vatican** *Henry Holt and Company* From a bestselling author with unprecedented access to Pope Francis, an investigative look at the recent financial scandals at the highest levels of the Vatican A veritable war is waging in the Church: on one side, there is Pope Francis's strong message for one church of the poor and all; on the other, there is the old Curia with its endless enemies, and the old and new lobbies struggling to preserve their not-so-Christian privileges. The old guard do not back down, they are ready to use all means necessary to stay in control and continue the immoral way they conduct their business. They resist reforms sought by Pope Francis and seek to delegitimize their opponents, to isolate those who want to eliminate corruption. It's a war that will determine the future of the church. And if he loses the battle against secular interests and blackmail, Pope Francis could resign, much like his predecessor. Based on confidential information—including top secret documents from inside the Vatican, and actual transcripts of Pope Francis's admonishments to the papal court about the lack of financial oversight and responsibility—*Merchants in the Temple* illustrates all the undercover work conducted by the Pope since his election and shows the reader who his real enemies are. It reveals the instruments Francis is using to reform the Vatican and rid it, once and for all, of the

overwhelming corruption traditionally encrusted in the Roman Catholic Church. *Merchants in the Temple* is a startling book that will shock every reader. It's a story worthy of a Dan Brown novel, with its electrifying details of the trickery and scheming against the papacy—except that it is real. **Radar Instruction Manual** Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. A groundbreaking book that pulls back the curtain on the terrorist movement no one is talking about Women's rights activist Laura Bates has been the target of many misogynistic attacks online: from hate-fueled Twitter rants to vivid descriptions of her own rape and even death threats. At first, the vitriol seemed to be the work of a small handful of individual men... but over time, the volume and consistency of the attacks hinted at something bigger and more ominous. As Bates followed the thread of online misogyny farther into the corners of the internet, the spiral of hateful and toxic rhetoric deepened until she found an unseen, organized movement of thousands of anonymous men wishing violence (and worse) upon women—the terrorism no one is talking about. *Men Who Hate Women* examines the rise of secretive extremist communities who despise women as Bates traces the roots of misogyny across a complex spider web of groups extending from Men's Rights Activists to trolls and the incel movement. Drawing parallels to other extremist movements around the world, including white nationalism, Bates shows what attracts men to the movement, how it grooms and radicalizes boys, how it operates, and what can be done to stop it. Most urgently of all, she follows the pathways this extreme ideology has taken from the darkest corners of the internet to emerge covertly in our mainstream media, our playgrounds, and our government. Going undercover on and offline, Bates provides the first comprehensive look at this under-

the-radar phenomenon, including eye-opening interviews with former members of these communities, the academics studying this movement, and the men fighting back. By turns fascinating and horrifying, *Men Who Hate Women* is a broad, unflinching account of the deep current of loathing toward women and anti-feminism that underpins our society and is a must-read for parents, educators, and anyone who believes in equality for women. "Men Who Hate Women has the power to spark social change."—*Sunday Times*

Grown Up Digital: How the Net Generation is Changing Your World McGraw Hill Professional **SELECTED AS A 2008 BEST BUSINESS BOOK OF THE YEAR BY THE ECONOMIST** *The Net Generation Has Arrived. Are you ready for it? Chances are you know a person between the ages of 11 and 30. You've seen them doing five things at once: texting friends, downloading music, uploading videos, watching a movie on a two-inch screen, and doing who-knows-what on Facebook or MySpace. They're the first generation to have literally grown up digital--and they're part of a global cultural phenomenon that's here to stay. The bottom line is this: If you understand the Net Generation, you will understand the future. If you're a Baby Boomer or Gen-Xer: This is your field guide. A fascinating inside look at the Net Generation, Grown Up Digital is inspired by a \$4 million private research study. New York Times bestselling author Don Tapscott has surveyed more than 11,000 young people. Instead of a bunch of spoiled "screenagers" with short attention spans and zero social skills, he discovered a remarkably bright community which has developed revolutionary new ways of thinking, interacting, working, and socializing. Grown Up Digital reveals: How the brain of the Net Generation processes information Seven ways to attract and engage young talent in the workforce Seven guidelines for educators to tap the Net Gen potential Parenting 2.0: There's no place like the new home Citizen Net: How young people and the Internet are transforming democracy Today's young people are using technology in ways you could never imagine. Instead of passively watching television, the "Net Geners" are actively participating in the distribution of entertainment and information. For the first time in history, youth are the authorities on something really important. And they're changing every aspect of our society--from the workplace to the marketplace, from the classroom to the living room, from the voting booth to the Oval Office. The Digital Age is here. The Net Generation has arrived. Meet the future.*

International Oceanographic Tables UNESCO Suzuki Carry Da63t Electrical Service Manual & Diagrams Empire of Illusion The End of Literacy and the Triumph of Spectacle Knopf Canada Pulitzer prize-winner Chris Hedges charts the dramatic and disturbing rise of a post-literate society that craves fantasy, ecstasy and illusion. Chris Hedges argues that we now live in two societies: One, the minority, functions in a print-based, literate world, that can cope with complexity and can separate illusion from truth. The other, a growing majority, is retreating from a reality-based world into one of false certainty and magic. In this "other society," serious film and theatre, as well as newspapers and books, are being pushed to the margins. In the tradition of Christopher Lasch's *The Culture of Narcissism* and Neil Postman's *Amusing Ourselves to Death*, Hedges navigates this culture — attending WWF contests as well as Ivy League graduation ceremonies — exposing an age of terrifying decline and heightened self-delusion.

US Troops in Europe Routledge This book, first published in 1984, analyses the contribution of the American military

presence to the security of Western Europe; examines the advantages and shortcomings of proposals for strengthening NATO's conventional capacity; and considers the consequences to the Cold War balance of power of a reduction in the American troop contingent. **Weedopedia An A to Z Guide to All Things Marijuana** Simon and Schuster Discover everything you've ever wanted to know about marijuana all in one place with this authoritative A-to-Z guide to cannabis! Although many attempts have been made to re-create the magnificent illustrations in Audubon's masterpiece, nothing equals the level of fidelity or scale achieved in this high-quality edition. Organized and annotated by Roger Tory Peterson, America's best-known ornithologist, and issued with the full endorsement and cooperation of the Audubon Society, this magnificent volume is as thorough in scientific classification as it is beautiful. Peterson's fascinating introduction places Audubon in the context of the history of American ornithological art and also reproduces a wide sampling of the work of Audubon's notable predecessors and disciples, including Peterson's own justly famous paintings. This new systematic arrangement of the prints, complete with informative commentaries about each bird, made it possible to correct many of the problems or errors in Audubon's original edition revealed by later scholarship. The colorful captions in the back provide fascinating commentaries on each featured bird. AUTHOR: Roger Tory Peterson has been regarded as America's most notable ornithologist following the publication of A Field Guide to the Birds in 1934. Like Audubon, Peterson received many honorary degrees and awards, including the Presidential Medal of Honor. Virginia Marie Peterson is a scientist and an expert on the environmental effects of oil spills. 917 colour illustrations **Raising Kanye Life Lessons from the Mother of a Hip-Hop Superstar** Simon and Schuster As the mother of hip-hop superstar Kanye West, Donda West has watched her son grow from a brilliant baby boy with all the intimations of fame and fortune to one of the hottest rappers on the music scene. And she has every right to be proud: she raised her son with strong moral values, teaching him right from wrong and helping him become the man he is today. In Raising Kanye, Donda not only pays homage to her famous son but reflects on all the things she learned about being his mother along the way. Featuring never-before-seen photos and compelling personal anecdotes, Donda's powerful and inspiring memoir reveals everything from the difficulties she faced as a single mother in the African-American community to her later experiences as Kanye's manager as he rose to superstardom. Speaking frankly about her son's

reputation as a "Mama's Boy," and his memorable public outbursts about gay rights and President George W. Bush, Donda supports her son without exception, and here she shares the invaluable wisdom she has taken away from each experience -- passion, tolerance, patience, and above all, always telling the truth. Ultimately, she not only expresses what her famously talented son has meant to her but what he has meant to music and an entire generation.

Intelligent Projects Using Python 9 real-world AI projects leveraging machine learning and deep learning with TensorFlow and Keras Packt Publishing Ltd Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learnBuild an intelligent machine translation system using seq-2-seq neural translation machinesCreate AI applications using GAN and deploy smart mobile apps using TensorFlowTranslate videos into text using CNN and RNNImplement smart AI Chatbots, and integrate and extend them in several domainsCreate smart reinforcement, learning-based applications using Q-LearningBreak and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book **Stages of the Heart** Berkley Includes an excerpt from the author's novel Touch of forever. **The**

TiVo Hacks 100 Industrial-Strength Tips & Tools "O'Reilly Media, Inc." TiVo Hacks helps you get the most out of your TiVo personal video recorder. Armed with just a screwdriver and basic understanding of PC hardware (or willingness to learn), preeminent hackability awaits. This book includes hacks for changing the order of recorded programs, activating the 30-second skip to blaze through commercials, upgrading TiVo's hard drive for more hours of recording, use of TiVo's Home Media Option to remotely schedule a recording via the Web, log in to the serial port for command-line access to programming data, log files, closed-captioning data, display graphics on the TiVo screen, and even play MP3s. Readers who use advanced hacks to put TiVo on their home network via the serial port, Ethernet, USB, or wireless (with 802.11b WiFi) will watch a whole new world open up. By installing various open source software packages, you can use TiVo for mail, instant messaging, caller-ID, and more. It's also easy to run a web server on TiVo to schedule recordings, access lists of recorded shows, and even display them on a web site. While TiVo gives viewers personalized control of their TVs, TiVo Hacks gives users personalized control of TiVo. Note: Not all TiVos are the same. The original TiVo, the Series 1, is the most hackable TiVo out there; it's a box thrown together with commodity parts and the TiVo code is running on open hardware. The Series 2 TiVo, the most commonly sold TiVo today, is not open. You won't see hacks in this book that involve modifying Series 2 software.

Beyond the Body Farm A Legendary Bone Detective Explores Murders, Mysteries, and the Revolution in Forensic Science Harper Collins There is no scientist in the world like Dr. Bill Bass. A pioneer in forensic anthropology, Bass created the world's first laboratory dedicated to the study of human decomposition—three acres of land on a hillside in Tennessee where human bodies are left to the elements. His research at "the Body Farm" has revolutionized forensic science, helping police crack cold cases and pinpoint time of death. But during a forensics career that spans half a century, Bass and his work have ranged far beyond the gates of the Body Farm. In this riveting book, the bone sleuth explores the rise of modern forensic science, using fascinating cases from his career to take readers into the real world of C.S.I. Some of Bill Bass's cases rely on the simplest of tools and techniques, such as reassembling—from battered torsos and a stack of severed limbs—eleven people hurled skyward by an explosion at an illegal fireworks factory.

Other cases hinge on sophisticated techniques Bass could not have imagined when he began his career: harnessing scanning electron microscopy to detect trace elements in knife wounds; and extracting DNA from a long-buried corpse, only to find that the female murder victim may have been mistakenly identified a quarter-century before. In *Beyond the Body Farm*, readers will follow Bass as he explores the depths of an East Tennessee lake with a twenty-first-century sonar system, in a quest for an airplane that disappeared with two people on board thirty-five years ago; see Bass exhume fifties pop star "the Big Bopper" to determine what injuries he suffered in the plane crash that killed three rock and roll legends on "the day the music died"; and join Bass as he works to decipher an ancient Persian death scene nearly three thousand years old. Witty and engaging, Bass dissects the methods used by homicide investigators every day, leading readers on an extraordinary journey into the high-tech science that it takes to crack a case. **The Commander's Handbook on the Law of Land Warfare (FM 6-27) (MCTP 11-10C)** Lulu.com DOD policy requires "[m]embers of the DoD Components comply with the law of war during all armed conflicts, however such conflicts are characterized, and in all other military operations" (Department of Defense Directive [DODD] 2311.01E). This publication addresses topics that are also addressed in the DOD Law of War Manual. In the event of a conflict or discrepancy regarding the legal standards addressed in this publication and the DOD Law of War Manual, the latter takes precedence. In many cases, any apparent conflict or discrepancy may be due to this publication's efforts to provide guidance to Commanders by describing legal concepts more generally rather than exhaustively as found the DOD Law of War Manual. In certain instances, this publication will set out a current policy or practice for Army and Marine forces rather than a legal requirement. **Work's Intimacy** John Wiley & Sons This book provides a long-overdue account of online technology and its impact on the work and lifestyles of professional employees. It moves between the offices and homes of workers in the new "knowledge" economy to provide intimate insight into the personal, family, and wider social tensions emerging in today's rapidly changing work environment. Drawing on her extensive research, Gregg shows that new media technologies encourage and exacerbate an older tendency among salaried professionals to put work at the heart of daily concerns, often at the expense of other sources of intimacy and fulfillment. New media technologies from mobile phones to laptops and tablet computers, have been marketed as devices that give us the freedom to work where we want, when we want, but little attention has been paid to the consequences of this shift, which has seen work move out of the office and into cafés, trains, living rooms, dining rooms, and bedrooms. This professional "presence bleed" leads to work concerns impinging on the personal lives of employees in new and unforeseen ways. This groundbreaking book explores how aspiring and established professionals each try to cope with the unprecedented intimacy of technologically-mediated work, and how its seductions seem poised to triumph over the few remaining relationships that may stand in its way. **Manual of Home Health Nursing Procedures** Mosby Incorporated CD-ROM contains full text for all the procedures available in the manual. Network neutrality mandates to treat Internet traffic in a non-discriminatory fashion in order to maximise end users' freedom and safeguard an open Internet. This book is the result of a collective work aimed at providing deeper insight into what is network neutrality, how does it relates to human rights and free competition and how to properly frame this key issue through sustainable policies and regulations. The Net Neutrality Compendium stems from three years of discussions nurtured by the members of the Dynamic Coalition on Network Neutrality (DCNN), an open and multi-stakeholder group, established under the aegis of the United Nations Internet Governance Forum (IGF). **CyberBRICS Cybersecurity Regulations in the BRICS Countries** Springer Nature This book stems from the CyberBRICS project, which is the first major attempt to produce a comparative analysis of Internet regulations in the BRICS countries - namely, Brazil, Russia, India, China, and South Africa. The project has three main objectives: 1) to map existing regulations; 2) to identify best practices; and 3) to develop policy recommendations in the various areas that compose cybersecurity governance, with a particular focus on the strategies adopted by the BRICS countries to date. Each study covers five essential dimensions of cybersecurity: data protection, consumer protection, cybercrime, the preservation of public order, and cyberdefense. The BRICS countries were selected not only for their size and growing economic and geopolitical relevance but also because, over the next decade, projected Internet growth is expected to occur predominantly in these countries. Consequently, the technology, policy and governance arrangements defined by the BRICS countries are likely to impact not only the 3.2 billion people living in them, but also the individuals and businesses that choose to utilize increasingly popular applications and services developed in BRICS countries according to BRICS standards. Researchers, regulators, start-up innovators and other Internet stakeholders will find this book a valuable guide to the inner workings of key cyber policies in this rapidly growing region. **Everyone Loves Elwood** The true story of a Elwood, a funny-looking, unwanted puppy, who enjoys a wonderful life once he finds a loving home. Elwood wins the Ugliest Dog Contest and shows the world he doesn't need to be beautiful to be lovable. **After the Break Television Theory Today** Amsterdam University Press - T Television as we knew it is irrevocably changing. Some are gleefully announcing the death of television, others have been less sanguine but insist that television is radically changing underneath our eyes. Several excellent publications have dealt with television's uncertain condition, but few have taken the specific question of what television's transformations mean for the discipline of Television Studies as a starting point. The essays collected in this volume aim to fill this void. Two fundamental questions string the various contributions together. First, is television really in crisis or is the present not so extraordinary when revisiting television's development? Second, should we invent new theoretical concepts or are our old ones still perfectly relevant? To answer such questions the authors in this volume take up diverse case studies,

ranging from the academic series *Reading Contemporary Television* to *Flemish Fiction*, from nostalgic programming on broadcast television to YouTube, from tell-sell television shows to public television art in the 1980s. **Dragon's Ark** Geologists warned it was inevitable that an earthquake would collapse the Three Gorges Dam. Key findings include: The global affected population numbers 258m widows with 585m children. Of these, 38m widows live in extreme

poverty where basic needs are unmet. Since an earlier Loomba Foundation study in 2010, there has been a significant exacerbation in conflict areas in the Middle East and North Africa, notably the Syrian civil war. Worst affected by conflict are widows in Afghanistan, Iraq, South Sudan, Central African Republic and Syria; by the Boko Haram insurgency, those in northeast Nigeria, southeast Niger, west Chad and north Cameroon. In Sub-Saharan Africa the worst conditions are faced by evicted and abandoned widows with dependants and by those caught up in the Ebola crisis areas, which is further exacerbated by traditional 'cleansing' rituals. Widows with only female children and child widows aged between 10 and 17 face severe discrimination in many developing countries. Social norms around sexual behaviour remain counterproductive with extreme poverty as a driver of 'exchange sex' and 'survival sex' relationships and poor quality healthcare. Widows in western and developed countries have also been affected by cutbacks in social welfare and increased insecurity. Customary 'cleansing' rituals, where widows are required to drink the water with which their dead husband's body has been washed and to have sex with a relative, continue to spread disease and violate the dignity of widows in many Sub-Saharan countries. Widows are regularly accused of killing their husbands either deliberately or through neglect - including by transmitting HIV/AIDS - in India, Nepal, Papua New Guinea and Sub-Saharan Africa. Systematic seizure of property and evictions by the late husband's family remains widespread in Angola, Bangladesh, Botswana, Republic of Congo, DR Congo, India, Ivory Coast, Ghana, Kenya, Lesotho, Malawi, Namibia, Nigeria, Rwanda, Senegal, Swaziland, Tanzania, Uganda, Zambia and Zimbabwe. The World Widows Report is published to coincide with the adoption of the Sustainable Development Goals by the United Nations and provides a basis for researchers, international and local agencies, governments and all who care about gender inequality and the desperate plight of widows to develop sound, evidence-based policy for a better world.
