SWIFT BOATS AT WAR IN VIETNAM

Rowman & Littlefield You-are-there stories of ambushes and patrols on the Mekong in the Vietnam War Developed specifically for the Vietnam War (and made famous by the 2004 presidential campaign), Swift Boats were versatile craft "big enough to outrun anything they couldn't outfight" but too small to handle even a moderate ocean chop, too loud to sneak up on anyone, and too flimsy to withstand the mildest of rocket attacks. This made more difficult an already tough mission: navigating coastal waters for ships and sampans smuggling contraband to the Viet Cong, disrupting enemy supply lines on the rivers and canals of the Mekong Delta, and inserting SEALs behind enemy lines. The stories in this book cover the Swift Boats' early years, which saw search-and-inspect operations in Vietnam's coastal waters, and their later years, when the Swift Boats' mission shifted to the Mekong Delta's labyrinth of 3,000 miles of rivers, streams, and canals. This is an intimate, exciting oral history of Swift Boats at war in Vietnam.

PARENTOLOGY

EVERYTHING YOU WANTED TO KNOW ABOUT THE SCIENCE OF RAISING CHILDREN BUT WERE TOO EXHAUSTED TO ASK

Simon and Schuster An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
