Principles of Cyberbullying Research Definitions, Measures, and Methodology

Routledge In 2010, the International Cyberbullying Think Tank was held in order to discuss questions of definition, measurement, and methodologies related to cyberbullying research. The attendees' goal was to develop a set of guidelines that current and future researchers could use to improve the quality of their research and advance our understanding of cyberbullying and related issues. This book is the product of their meetings, and is the first volume to provide researchers with a clear set of principles to inform their work on cyberbullying. The contributing authors, all participants in the Think Tank, review the existing research and theoretical frameworks of cyberbullying before exploring topics such as questions of methodology, sampling issues, methods employed so far, psychometric issues that must be considered, ethical considerations, and implications for prevention and intervention efforts. Researchers as well as practitioners seeking information to inform their prevention and intervention programs will find this to be a timely and essential resource.

Coverage includes: The definition and measurement of cyberbullying. The legal challenges in tackling cyberbullying across a number of international contexts. The role of mobile phone companies and Internet service providers in monitoring and prevention. How the media frame and present the issue, and how that influences our understanding. How victims can cope with the effects of cyberbullying, and the guidelines and advice provided in different countries. How cyber-bullying can continue from school into further education, and the strategies that can be used to prevent it. The ways in which accessing 'youth voice', or maximising the contribution of young people themselves to the research process, can enhance our understanding. The book concludes with practical guidance to help confront the trauma that cyberbullying can cause. Narratives in Research and Interventions on Cyberbullying among Young People

Springer This book describes innovative ways to do research about, and design interventions for, cyberbullying by children and adolescents. It does this by taking a narrative approach. How can narrative research methods complement the mostly quantitative methods (e.g. surveys, experiments, ...) in cyberbullying research? And how can stories be used to inform young people about the issue and empower them? Throughout the book, special attention is paid to new information and communication technologies, and the opportunities ICTs provide for narrative research (e.g. as a source of naturally occurring stories on cyberbullying), and for narrative health interventions (e.g. via Influencers). The book thus integrates research and insights from the fields of cyberbullying, narrative methods, narrative health communication, and new information and communication technologies.

School Bullying in Different Cultures Eastern and Western Perspectives

Cambridge University Press School bullying is widely recognized as an international problem, but publications have focussed on the Western tradition of research. A long tradition of research in Japan and South Korea, and more recently in mainland China and Hong Kong, has had much less exposure. The third part examines possible reasons for these differences - methodological issues, school systems, societal values and linguistic issues. The final part looks at the implications for interventions to reduce school bullying and what we can learn from experiences in other countries. This is the first volume to bring together these perspectives on school bullying from a range of Eastern as well as Western countries.

Embedded in research and theory, the book reflects the belief that all of our dealings with children and young people in whatever role, whether as parent or teacher or in some other capacity, are bounded by theory, either implicit or explicit. The book highlights the role of partnerships and linkages in addressing school-based well-being and anti-bullying programs. It pays special attention to the barriers and facilitators that schools must address in engaging with external agencies to deliver strong evidence-based initiatives. The international concern with school bullying is given particular consideration in relation to its impact on the well-being of all involved. A feature of the text is the focus given to the implementation of programs into the busy and complex world of schools and classrooms recognizing that the effectiveness and impact of any school-based program is strongly related to the quality of its implementation. The text reflects a commitment of the authors to a broad-based systemic view of development, taking into account family, school, community and culture as influential factors. The text incorporates

a number of pedagogical features e.g. classroom based activities and discussion starters, reflections on points raised in the text, and case studies. This book is of special interest to teachers, school counselors, educational psychologists and mental health professionals working in school settings.

Handbook of Social Work Practice with Vulnerable and Resilient Populations

Columbia University Press When community and family support systems are weak or unavailable, and when internal resources fail, populations that struggle with chronic, persistent, acute, and/or unexpected problems become vulnerable to physical, cognitive, emotional, and social deterioration. Yet despite numerous risk factors, a large number of vulnerable people do live happy and productive lives. This best-selling handbook examines not only risk and vulnerability factors in disadvantaged populations but also resilience and protective strategies for managing and overcoming adversity. This third edition reflects new demographic data, research findings, and theoretical developments and accounts for changing economic and political realities, including immigration and health care policy reforms. Contributors have expanded their essays to include practice with individuals, families, and groups, and new chapters consider working with military members and their families, victims and survivors of terrorism and torture, bullied children, and young men of color.
