CHRISTIANITY AND DEMOCRACY

THE RIGHTS OF MAN AND NATURAL LAW

Ignatius Press Few political philosophers have laid such stress upon the organic and dynamic characters of human rights, rooted as they are in natural law, as did the great 20th century philosopher, Jacques Maritain. Few Christian scholars have placed such emphasis upon the influence of evangelical inspiration, or of the Gospel message, upon the temporal order as has Maritain. As this important work reveals, the philosophy of Jacques Maritain on natural law and human rights is complemented by and can only be properly understood in the light of his teaching on Christianity and democracy and their relationship. Maritain takes pains to point out that Christianity cannot be made subservient to any political form or regime, that democracy is linked to Christianity and not the other way around, and that every just regime, such as the classic forms of monarchy, aristocracy and republic, is compatible with Christianity and in it a person is able to achieve some measure of fulfillment even in the temporal order. At the same time he argues his distinctive thesis that personalist or organic democracy provides a fuller measure of freedom and fulfillment and that it emerges or begins to take shape under the inspiration of the Gospel. Even the modern democracies we do in fact have, with all their weaknesses, represent an historic gain for the person and they spring, he urges, from the very Gospel they so wantonly repudiate!

THE OXFORD HANDBOOK OF NEO-LATIN

Oxford University Press From the dawn of the early modern period around 1400 until the eighteenth century, Latin was still the European language and its influence extended as far as Asia and the Americas. At the same time, the production of Latin writing exploded thanks to book printing and new literary and cultural dynamics. Latin also entered into a complex interplay with the rising vernacular languages. This Handbook gives an accessible survey of the main genres, contexts, and regions of Neo-Latin, as we have come to call Latin writing composed in the wake of Petrarch (1304-74). Its emphasis is on the period of Neo-Latin's greatest cultural relevance, from the fifteenth to the eighteenth centuries. Its chapters, written by specialists in the field, present individual methodologies and focuses while retaining an introductory character. The Handbook will be valuable to all readers wanting to orientate themselves in the immense ocean of Neo-Latin literature and culture. It will be particularly helpful for those working on early modern languages and literatures as well as to classicists working on the culture of ancient Rome, its early modern reception and the shifting characteristics of post-classical Latin language and literature. Political, social, cultural and intellectual historians will find much relevant material in the Handbook, and it will provide a rich range of material to scholars researching the history of their respective geographical areas of interest.

WHAT I BELIEVE

Bloomsbury Publishing Hans Kung is one of the most celebrated theologians of the present day. His audience, which is strong within his own Roman Catholic Church, is equally solid among Christians of other denominations, among those outside the churches and indeed among those at the frontiers of organised religion. From the start, he has been a rebel, being Swiss and a lover of personal freedom. Many of his books such as *Infallible?* and *On Being a Christian* have rocked the Papal boat. Now after publishing two magnificent and acclaimed volumes of memoirs, Kung has written a much shorter and more personal book to explain his own beliefs. If one sets aside all scientific knowledge and learning, all formal theological language and the skilful construction of theories, what remains as the core of faith? What do we need for our lives? What is indispensable to us? Kung writes of trust in life, joy in life and suffering in life and in so doing gives us a summa of his own faith - and life.

AS A MAN GROWS OLDER

Pickle Partners Publishing Not so long ago Emilio Brentani was a promising young author. Now he is an insurance agent on the fast track to forty. He gains a new lease on life, though, when he falls for the young and gorgeous Angiolina—except that his angel just happens to be an unapologetic cheat. But what begins as a comedy of infatuated misunderstanding ends in tragedy, as Emilio's jealous persistence in his folly—against his friends' and devoted sister's advice, and even his own best knowledge—leads to the loss of the one person who, too late, he realizes he truly loves. Marked by deep humanity and earthy humor, by psychological insight and an elegant simplicity of style, *As a Man Grows Older* (Senilità, in Italian; the English title was the suggestion of Svevo's great friend and admirer, James Joyce) is a brilliant study of hopeless love and hapless indecision. It is a masterwork of Italian literature, here beautifully rendered into English in Beryl de Zoete's classic translation. —Print ed. "The poem of our complex modern madness." —EUGENIO MONTALE "Svevo has the capacity—so rare as to be almost unknown in the English novel—of handling emotional relationships with a combined tenderness, humour and realism." —THE TIMES LITERARY SUPPLEMENT

DE DOMINIO MARIS DISSERTATIO

DANTEAN DIALOGUES

ENGAGING WITH THE LEGACY OF AMILCARE IANNUCCI

University of Toronto Press *Dantean Dialogues* is a collection of essays by some of the world's most outstanding Dante scholars. These essays enter into conversation with the main themes of the scholarship of Amilcare Iannucci (d. 2007), one of the leading researchers on Dante of his generation and arguably Canada's finest scholar of the Italian poet. The essays focus on the major themes of Iannucci's work, including the development of Dante's early poetry, Dante's relation to classical and biblical sources, and Dante's reception. The contributors cover crucial aspects of Dante's work, from the authority of the *New Life* to the novelty of his early poetry, to key episodes in the *Comedy*, to the poem's afterlife. Together, the essays show how Iannucci's reading of central cruxes in Dante's texts continues to inspire Dante studies - a testament to his continuing influence and profound intellectual legacy.

PROBLEMS OF SCIENCE

Purchase of this book includes free trial access to www.million-books.com where you can read more than a million books for free. This is an OCR edition with typos. Excerpt from book: I. INTRODUCTION. 1. THE SPECIAL PROBLEMS AND GENERAL IDEAS OF SCIENCE A DOUBLE fatality hangs over one who has consecrated his days to science. If he would contribute to the advancement of science, he must prepare himself first of all by a patient study of the thousands of details which constitute its technique; he must learn the results obtained by numberless laborers whose researches tend toward the same aim. He must master their conceptions and subject them to a new criticism. This work so engrosses the attention of the investigator that he has little time left for casting a glance over the branches of science which are developing beside him. Yet this necessity also weighs upon his soul. If on the one hand he ought to study special problems, on the other, he cannot exempt himself from considering the ends set before special research by rising to a general outlook which shall command the view of a broader scientific basis. This double necessity causes a conflict of tendencies, and this conflict in our system of production results in a loss of time and of work from which the intellectual world suffers. Most investigators, if they are not rightly directed, shut themselves up in a narrow circle and fall into a blind empiricism. Others lose themselves in the region of confused generalities, while a few finer spirits find the way for themselves, and often must win again by fresh efforts that which

they should have a right to expect as the outcome of the completed work of their companions in labor. But the age of heroes, that of Descartes or Leibniz, whose genius opened all the doors of science, seems closed forever. The conquests of the past weigh upon the present and upon the future. And if it is permissible to hope that a happier use of our intellectual power...

WHO IS A CHRISTIAN?

Ignatius Press The title of this book is a short question. In its longer form, the question would be: "In the changed circumstances after the 2nd Vatican Council—with its theme of *aggiornamento* or 'updating', especially in the areas of the Bible, the Liturgy, Ecumenism, and openness to the modern world—what does it really mean to be a Christian today?" Balthasar begins by acknowledging the confusion of many in the post-Conciliar period. He then describes the valuable contributions of the Council in those four areas. But he also describes their "shadows": what could go wrong and often did go wrong. Finally he points out the path to genuine renewal in the personal life of the Christian and in the Christian's service of the world. Among the key topics and issues Balthasar discusses that are important for the authentic renewal of the Christian life include: The Primacy of Contemplation, Who Is a Mature Christian?, Love, The Form of the Christian Life, How Should a Christian Serve the World—and How Not?, Despite Everything, a Single Commitment, and Prayer, Hope, and the Profane. "We must therefore resolve to turn around and approach what seemed to be behind us as something before us. To have the question before us, 'Who is a Christian?', together with our effort to answer it, is the right approach, for the answer will necessarily come to us from the source from which our Christian life itself is given, namely, God's living Word. . . . We rightly find God in the sign of Word and Sacrament, but only in order to seek him ever more passionately where he is not and where we must bring him. Or, rather where he already dwells unseen, and where we must discover him." —Hans Urs von Balthasar

PRO CLUENTIO, ED. BY G.G. RAMSAY

FRANCIS BACON ON MOTION AND POWER

Springer This book offers a comprehensive and unitary study of the philosophy of Francis Bacon, with special emphasis on the medical, ethical and political aspects of his thought. It presents an original interpretation focused on the material conditions of nature and human life. In particular, coverage in the book is organized around the unifying theme of Bacon's notion of appetite, which is considered in its natural, ethical, medical and political meanings. The book redefines the notions of experience and experiment in Bacon's philosophy of nature, shows the important presence of Stoic themes in his work as well as provides an original discussion of the relationships between natural magic, prudence and political realism in his philosophy. Bringing together scholarly expertise from the history of philosophy, the history of science and the history of literature, this book presents readers with a rich and diverse contextualization of Bacon's philosophy.

MÉMOIRES DE M. DE VOLTAIRE

CINE: 100 AÑOS DE FILOSOFÍA

UNA INTRODUCCIÓN A LA FILOSOFÍA A TRAVÉS DEL ANÁLISIS DE PELÍCULAS

Editorial GEDISA Julio Cabrera aún en este libro sus dos grandes pasiones: el cine y la filosofía. En cada capítulo de este libro Cabrera analiza una o más películas elegidas cuidadosamente para reflexionar sobre una cuestión filosófica central. Aristóteles y los ladrones de bicicletas; Bacon y Steven Spielberg; Descartes y los fotógrafos indiscretos, Schopenhauer, Buñuel y Frank Capra; Nietzsche, Clint Eastwood y los asesinos por naturaleza; o Wittgenstein y el cine mudo son algunos de los ejercicios filocinematográficos propuestos. Los comentarios de películas que el lector encontrará destacan aquellos puntos del filme que deben contribuir a la instauración de la experiencia vivida de un problema filosófico. Esta experiencia en sí es insustituible y nadie podrá tenerla por uno. Tan sólo señalo los lugares en donde el filme duele, en donde puede aprenderse alguna cosa padeciéndolo. Estamos ante el encuentro no programado y mutuamente esclarecedor entre una actividad milenaria del ser humano y uno de los más fascinantes lenguajes emergentes de los últimos tiempos: 100 años de imágenes tratando de representar 2.500 años de reflexión

IN DEFENCE OF THE ENLIGHTENMENT

Atlantic Books Ltd Tzvetan Todorov argues that although our liberal democracies are the offspring of the Enlightenment, they also illustrate the ways in which its ideas have been distorted and perverted. People living in contemporary democracies are often baffled by phenomena which resist easy judgement: globalisation and media omnipotence; disinformation and state-sponsored torture; moralism and the right of intervention; the dominance of economics and the triumph of technology. In this book, Todorov shows that we cannot learn lessons from the past unless we know how to relate them to the present. He demonstrates that what remains relevant to today is the spirit expressed in the core principles and values for which the Enlightenment stood. In a period of great uncertainty, In Defence of the Enlightenment could not be more timely.

THE MYTH OF EGYPT AND ITS HIEROGLYPHS IN EUROPEAN TRADITION

Erik Iversen describes the powerful effect of the "myth of Egypt," particularly Egyptian hieroglyphs, on European literature, art, religion, and philosophy. This is the story of a creative misunderstanding: an erroneous interpretation of the traditions of ancient Egypt became a rich source of inspiration for Europeans from ancient times through the medieval and Renaissance periods to the Baroque era. The misguided notion that hieroglyphs were allegorical, and that they constituted a sacred writing of ideas, exerted a dynamic influence in almost all fields of intellectual and artistic endeavor, as did conceptions of Egypt as the venerable home of true wisdom and of occult and mystic knowledge. The Baroque Piazza Navona in Rome, for instance, is only one of the many great public spaces that center on an Egyptian obelisk and an attempt to read its mysterious signs. Iversen

begins by discussing the nature of Egyptian writing. Then he explains, in detail and with apposite illustrations and quotations, the ways in which Europeans tried to understand and use the hieroglyphs. A final chapter sets Jean François Champollion's decipherment of the hieroglyphs into a vividly reconstructed historical context.

BLACK HOLES, WORMHOLES AND TIME MACHINES, SECOND EDITION

[Taylor & Francis](#) Bringing the material up to date, *Black Holes, Wormholes and Time Machines, Second Edition* captures the new ideas and discoveries made in physics since the publication of the best-selling first edition. While retaining the popular format and style of its predecessor, this edition explores the latest developments in high-energy astroparticle physics and Big Bang cosmology. The book continues to make the ideas and theories of modern physics easily understood by anyone, from researchers to students to general science enthusiasts. Taking you on a journey through space and time, author Jim Al-Khalili covers some of the most fascinating topics in physics today, including: Black holes Space warps The Big Bang Time travel Wormholes Parallel universes Professor Al-Khalili explains often complex scientific concepts in simple, nontechnical terms and imparts an appreciation of the cosmos, helping you see how time traveling may not be so far-fetched after all.

A PHILOSOPHY FOR EUROPE

FROM THE OUTSIDE

[John Wiley & Sons](#) Amid a devastating economic crisis, two tragic events coming from the outside - the wave of immigration and Islamic terrorism - have radically changed the profile and significance of the space we call Europe. Given a paradigm leap of this sort, philosophical reflection is in a position to exert its creative power more than other types of knowledge. But this can only happen if it is able to go beyond its own lexical boundaries, by turning its gaze outside itself. Here the leading Italian philosopher Roberto Esposito looks at how various strands of German, French, and Italian thought have achieved this outward turn and successfully captured international attention by breaking with the language of early nineteenth-century crisis philosophies. When analyzed from this novel perspective, the great texts of Adorno, Derrida, Foucault, and Deleuze, as well as works by the latest Italian thinkers, are cast in a new light. From the relationship and tension between them, reconstructed here with extraordinary theoretical sensitivity, a form of thought can arise that is equal to the challenges faced by Europe today. This erudite and wide-ranging analysis of European thought in the light of the crises facing the continent today will appeal to students and scholars of philosophy, critical theory, and beyond.

PYRRHONIAN SKEPTICISM IN DIOGENES LAERTIUS

[Mohr Siebeck](#) This volume offers the first bilingual edition of a major text in the history of epistemology, Diogenes Laertius's report on Pyrrho and Timon in his *Lives of Eminent Philosophers*. Leading experts contribute a philosophical introduction, translation, commentary, and scholarly essays on the nature of Diogenes's report as well as core questions in recent research on skepticism.

ON SECULARIZATION

TOWARDS A REVISED GENERAL THEORY

[Routledge](#) 'Secularization' has been hotly debated since it was first subjected to critical attention in the mid-sixties by David Martin, before he sketched a 'General Theory' in 1969. 'On Secularization' presents David Martin's reassessment of the key issues: with particular regard to the special situation of religion in Western Europe, and questions in the global context including Pentecostalism in Latin America and Africa. Concluding with examinations of Pluralism, Christian Language, and Christianity and Politics, this book offers students and other readers of social theory and sociology of religion an invaluable reappraisal of Christianity and Secularization. It represents the most comprehensive sociology of contemporary Christianity, set in historical depth.

THE ARCHIMEDES CODEX

REVEALING THE SECRETS OF THE WORLD'S GREATEST PALIMPSEST

[Hachette UK](#) The story of the amazing discovery of Archimedes' lost works Drawings and writings by Archimedes, previously thought to have been destroyed, have been uncovered beneath the pages of a 13th-century monk's prayer book. These hidden texts, slowly being retrieved and deciphered by scientists, show that Archimedes' thinking (2,200 years ago) was even ahead of Isaac Newton in the 17th century. Archimedes discovered the value of Pi, he developed the theory of specific gravity and made steps towards the development of calculus. Everything we know about him comes from three manuscripts, two of which have disappeared. The third, currently in the Walters Art Museum, is a palimpsest - the text has been scraped off, the book taken apart and its parchment re-used, in this case as a prayer book. William Noel, the project director, and Reviel Netz, a historian of ancient mathematics, tell the enthralling story of the survival of that prayer book from 1229 to the present, and examine the process of recovering the invaluable text underneath as well as investigating into why that text is so important.
