Susan Angeline Collins: with a Hallelujah Heart

WestBow Press Ten percent of book profits will go to the Susan Angeline Collins Scholarship at Upper Iowa University in Fayette, Iowa. Get ready to delve into a world of hardship, challenge, and fulfillment. Explore the life of African American Susan Angeline Collins and be inspired by her faith, pioneering attitude, missionary successes, unfailing courage, and belief in everyone's right to an education. As Miss Collins' life unfolds before you, relevant social issues affecting people of color are intertwined. Issues examined include economics, education, gender, race, religion, and Africa's colonization from her 1851 birth in Illinois until her 1940 death in Iowa. Her resourcefulness in overcoming obstacles during her 33-year commitment to missionary service in the Congo Delta Region and Angola is compelling. Miss Collins' story demonstrates the difference one person can make in the lives of an unknown number of women and children, some orphaned and homeless and others escaping early marriage and subservience. Her leadership is evidenced when starting a girls' school in the northern Angolan high plateau region years before Mary Jane McLeod Bethune initiated her school for African-American girls in Florida. You will be gratified to discover how this diminutive bundle of energy achieved recognition as a stalwart missionary, leader, teacher, nurse, construction manager, and surrogate mother to "her girls."

Rewilding the World

Dispatches from the Conservation Revolution

Metropolitan Books A gripping account of the environmental crusade to save the world's most endangered species and landscapes—the last best hope for preserving our natural home Scientists worldwide are warning of the looming extinction of thousands of species, from tigers and polar bears to rare flowers, birds, and insects. If the destruction continues, a third of all plants and animals could disappear by 2050—and with them earth's life-support ecosystems that provide our food, water, medicine, and natural defenses against climate change. Now Caroline Fraser offers the first definitive account of a visionary campaign to confront this crisis: rewilding. Breathtaking in scope and ambition, rewilding aims to save species by restoring habitats, reviving migration corridors, and brokering peace between people and predators. Traveling with wildlife biologists and conservationists, Fraser reports on the vast projects that are turning Europe's former Iron Curtain into a greenbelt, creating trans-frontier Peace Parks to renew elephant routes throughout Africa, and linking protected areas from the Yukon to Mexico and beyond. An inspiring story of scientific discovery and grassroots action, *Rewilding the World* offers hope for a richer, wilder future.

The Tallgrass Prairie

An Introduction

Northwestern University Press More than a region on a map, North America's vast grasslands are an enduring place in the American heart. Unfolding along and beyond the Mississippi River, the tallgrass prairie has entranced and inspired its natives and newcomers as well as American artists and writers from Willa Cather to Mark Twain. *The Tallgrass Prairie* is a new introduction to the astonishing

beauty and biodiversity of these iconic American spaces. Like a walking tour with a literate friend and expert, Cindy Crosby's *Tallgrass Prairie* prepares travelers and armchair travelers for an adventure in the tallgrass. Crosby's engaging gateway assumes no prior knowledge of tallgrass landscapes, and she acquaints readers with the native plants they'll discover there. She demystifies botanic plant names and offers engaging mnemonic tips for mastering Latin names with verve and confidence. Visitors to the prairie will learn to identify native plants using the five senses to discover what makes each plant unique or memorable. In the summer, for example, the unusual square stem of cup plant, *Silphium perfoliatum*, sets it apart from its neighbors. And its distinctive leaf cups water after the rain. A gifted raconteur, Crosby tells stories about how humankind has adopted the prairie as a grocery, an apothecary, and even as a shop for love charms. Rounding out this exceptional introduction are suggestions for experiencing the American prairie, including journaling techniques and sensory experiences, tips for preparing for a hike in tallgrass landscapes, ways to integrate native prairie plants into home landscapes (without upsetting the neighbors), and a wealth of resources for further exploration. An instant classic in the tradition of American naturalist writing, *The Tallgrass Prairie* will delight not only scholars and policy makers, but guests to tallgrass prairie preserves, outdoors enthusiasts and gardeners, and readers interested in American ecosystems and native plants.

Atlas of the Heart

Mapping Meaningful Connection and the Language of Human Experience

Random House #1 NEW YORK TIMES BESTSELLER • In her latest book, Brené Brown writes, “If we want to find the way back to ourselves and one another, we need language and the grounded confidence to both tell our stories and be stewards of the stories that we hear. This is the framework for meaningful connection.” In Atlas of the Heart, Brown takes us on a journey through eighty-seven of the emotions and experiences that define what it means to be human. As she maps the necessary skills and an actionable framework for meaningful connection, she gives us the language and tools to access a universe of new choices and second chances—a universe where we can share and steward the stories of our bravest and most heartbreaking moments with one another in a way that builds connection. Over the past two decades, Brown’s extensive research into the experiences that make us who we are has shaped the cultural conversation and helped define what it means to be courageous with our lives. Atlas of the Heart draws on this research, as well as on Brown’s singular skills as a storyteller, to show us how accurately naming an experience doesn’t give the experience more power—it gives us the power of understanding, meaning, and choice. Brown shares, “I want this book to be an atlas for all of us, because I believe that, with an adventurous heart and the right maps, we can travel anywhere and never fear losing ourselves.”

Heart of a Lion

A Lone Cat's Walk Across America

Bloomsbury Publishing USA Late one June night in 2011, a large animal collided with an SUV cruising down a Connecticut parkway. The creature appeared as something out of New England's forgotten past. Beside the road lay a 140-pound mountain lion. Speculations ran wild, the wildest of which figured him a ghostly survivor from a bygone century when lions last roamed the eastern United States. But a more fantastic scenario of facts soon unfolded. The lion was three years old, with a DNA trail embarking from the Black Hills of South Dakota on a cross-country odyssey eventually passing within thirty miles of New York City. It was the farthest landbound trek ever recorded for a wild animal in America, by a barely weaned teenager venturing solo through hostile terrain. William Stolzenburg retraces his two-year journey--from his embattled birthplace in the Black Hills, across the Great Plains and the

Mississippi River, through Midwest metropolises and remote northern forests, to his tragic finale upon Connecticut's Gold Coast. Along the way, the lion traverses lands with people gunning for his kind, as well as those championing his cause. Heart of a Lion is a story of one heroic creature pitting instinct against towering odds, coming home to a society deeply divided over his return. It is a testament to the resilience of nature, and a test of humanity's willingness to live again beside the ultimate symbol of wildness.

A New Garden Ethic

Cultivating Defiant Compassion for an Uncertain Future

New Society Publishers In a time of climate change and mass extinction, how we garden matters more than ever: “An outstanding and deeply passionate book.” —Marc Bekoff, author of *The Emotional Lives of Animals* Plenty of books tell home gardeners and professional landscape designers how to garden sustainably, what plants to use, and what resources to explore. Yet few examine why our urban wildlife gardens matter so much—not just for ourselves, but for the larger human and animal communities. Our landscapes push aside wildlife and in turn diminish our genetically programmed love for wildness. How can we get ourselves back into balance through gardens, to speak life's language and learn from other species? Benjamin Vogt addresses why we need a new garden ethic, and why we urgently need wildness in our daily lives—lives sequestered in buildings surrounded by monocultures of lawn and concrete that significantly harm our physical and mental health. He examines the psychological issues around climate change and mass extinction as a way to understand how we are short-circuiting our response to global crises, especially by not growing native plants in our gardens. Simply put, environmentalism is not political; it's social justice for all species marginalized today and for those facing extinction tomorrow. By thinking deeply and honestly about our built landscapes, we can create a compassionate activism that connects us more profoundly to nature and to one another.
