A Guide for New Immigrants

Serving Whose Interests?

The Political Economy of Trade in Services Agreements

Routledge Serving Whose Interests? explores the political economy of trade in services agreements from a critical legal perspective. The controversy surrounding the General Agreement on Trade in Services (GATS) and its variants at the regional and bilateral levels can, it is argued, be seen as a clash between two paradigms. For most of the twentieth century, under welfare states and state socialism, these services were viewed from a local and national perspective as embodying a mix of economic, social and cultural dimensions and were managed by the state through strong regulation and direct ownership and delivery. That socially based and state-centred approach has been progressively displaced since the 1980s through neoliberal policies of privatisation, deregulation and liberalisation, the transnationalisation of finance and production, and new technologies. The internationalisation of services markets has thus become a driver of contemporary capitalism. The explicit aim of 'trade in services' agreements is to lock in national regulations and policies that enhance the profitability of international services markets. They are exclusively the tools of contemporary global capitalism, yet are represented as the new pathway for development. It is argued here, however, that there is a fundamental contradiction between the global market model and the intrinsically social nature of services, whether they are social services like education, media and midwifery, or inputs to capitalist production such as finance, transport, energy, and telecommunications. This book examines and draws out these tensions and contradictions through a combination of theoretical analysis and a series of truly global case studies that include the market in internet gambling, education, pensions, electricity privatisation, supermarkets, tourism, oil, culture, temporary migrants, private finance initiatives and call centres. The product of extensive research by an internationally renowned expert in the area, yet written in an accessible manner, Serving Whose Interests? combines a technical and political analysis that will be of interest to informed trade specialists, academics and students working in the areas of international trade and international trade law, and others with interests in the organisation and regulation of the global economy.

Debates on U.S. Immigration

SAGE Publications This issues-based reference work (available in both print and electronic formats) shines a spotlight on immigration policy in the United States. The U.S. is a nation of immigrants. Yet while the lofty words enshrined with the Statue of Liberty stand as a source of national pride, the rhetoric and politics surrounding immigration policy all-too-often have proven far less lofty. In reality, the apparently open invitation of Lady Liberty seldom has been without restriction. Throughout our history, impassioned debates about the appropriate scope and nature of such restriction have emerged and mushroomed, among politicians, among scholars of public policy, among the general public. In light of the need to keep students, researchers, and other interested readers informed and up-to-date on status of U.S. immigration policy, this volume uses introductory essays followed by point/counterpoint articles to explore prominent and perennially important debates, providing readers with views on multiple sides of this complex issue. While there are some brief works looking at debates on immigration, as well as some general A-to-Z encyclopedias, we offer more in-depth coverage of a much wider range of themes and issues, thus providing the only fully comprehensive point/counterpoint handbook tackling the issues that political science, history, and sociology majors are asked to explore and to write about as students and that they will grapple with later as policy makers and citizens. Features & Benefits: The volume is divided into three sections, each with its own Section Editor: Labor & Economic Debates (Judith Gans), Social & Cultural Debates (Judith Gans), and Political & Legal Debates (Daniel Tichenor). Sections open with a Preface by the Section Editor to introduce the broad theme at hand and provide historical underpinnings. Each section holds 12 chapters addressing varied aspects of the broad theme of the section. Chapters open with an objective, lead-in piece (or "headnote") followed by a point article and a counterpoint article. All pieces (headnote, point article, counterpoint article) are signed. For each chapter, students are referred to further readings, data sources, and other resources as a jumping-off spot for further research and more in-depth exploration. Finally, volume concludes with a comprehensive index, and the electronic version includes search-and-browse features, as well as the ability to link to further readings cited within chapters should they be available to the library in electronic format.

Our Time Has Come

How India is Making Its Place in the World

Oxford University Press Over the last 25 years, India's explosive economic growth has vaulted it into the ranks of the world's emerging major powers. India's middle class has grown by leaps and bounds, and the country's sheer scale—possessing what will very soon be the world's largest population and an economy of more than \$2 trillion—means its actions will have a major global impact. While it is clearly on the path to becoming a great power, India has not abandoned all of its past policies: its economy remains relatively protectionist, and it still struggles with the legacy of its longstanding foreign policy doctrine of non-alignment. India's vibrant democracy encompasses a vast array of parties who champion dizzyingly disparate policies. And India isn't easily swayed by foreign influence; the country carefully guards its autonomy, in part because of its colonial past. For all of these reasons, India tends to move cautiously and deliberately in the international sphere. In *Our Time Has Come*, Alyssa Ayres looks at how the tension between India's past and its ongoing integration into the global economy will shape its trajectory. By focusing on how India's unique perspective shapes its approach to global affairs, this new, updated paperback edition of *Our Time Has Come* helps the world make sense of India's rise.

How to Open Dna-Driven Genealogy Reporting & Interpreting Businesses

Applying Your Communications Skills To Popular Health or Ancestry Issues In the News

iUniverse Here's how to open your own online DNA-driven genealogy reporting/interpreting service business. You wouldn't do the actual DNA testing. The laboratory you contract with does the testing and sends you reports that you interpret for your clients. As a DNA-driven genealogist, you would prepare illustrated and text-driven reports, colorful CDs, brochures, press kits, covers, Web sites, and guides to interpreting the DNA-for-ancestry-based information. You would interpret tests for deep ancestry to your clients. What verbal skills and any other preparation would you need to empower consumers with knowledge from reports you receive from your partnering DNA-testing laboratory? Would you also interpret reports from genetics counselors testing for predisposition to diseases? Or emphasize only deep ancestry? Would you need a self-taught science background, a genealogy hobby, or only marketing and communications experience? Who does the actual interpreting? How would you contract with DNA laboratories to send reports and other information related to ancestry? You may be a genealogist, a personal historian, or a life story videographer thinking of partnering with a DNA-testing laboratory. Your business would be to make complex information easy to understand and interpret in plain language DNA reports from scientists to genealogy clients and surname groups. The DNA tests could be for ancestry and/or nutritional genomics issues.

Indian Immigrant Women and Work

The American experience

Routledge In recent years, interest in the large group of skilled immigrants coming from India to the United States has soared. However, this immigration is seen as being overwhelmingly male. Female migrants are depicted either as family migrants following in the path chosen by men, or as victims of desperation, forced into the migrant path due to economic exigencies. This book investigates the work trajectories and related assimilation experiences of independent Indian women who have chosen their own migratory pathways in the United States. The links between individual experiences and the macro trends of women, work, immigration and feminism are explored. The authors use historical records, previously unpublished gender disaggregate immigration data, and interviews with Indian women who have migrated to the US in every decade since the 1960s to demonstrate that independent migration among Indian women has a long and substantial history. Their status as skilled independent migrants can represent a relatively privileged and empowered choice. However, their working lives intersect with the gender constraints of labor markets in both India and the US. Vijaya and Biswas argue that their experiences of being relatively empowered, yet pushing against gender constraints in two different environments, can provide a unique perspective to the immigrant assimilation narrative and comparative gender dynamics in the global political economy. Casting light on a hidden, but steady, stream within the large group of skilled immigrants to the United States from India, this book will be of interest to researchers in the fields of political economy, anthropology, and sociology, including migration, race, class, ethnic and gender studies, as well as Asian studies.

Innovation Policy and the Economy 2014

University of Chicago Press The fifteenth volume of *Innovation Policy and the Economy* is the first to focus on a single theme: high-skilled immigration to the United States. The first paper is the product of a long-term research effort on the impact of immigration to the United States of Russian mathematicians beginning around 1990 as the Soviet Union collapsed. The second paper describes how obtaining a degree from a US undergraduate university can open an important pathway for immigrants to participate in the US labor market in IT occupations. The third paper considers the changing nature of postdoctoral positions in science departments, which are disproportionately held by immigrant researchers. The fourth paper considers the role of US firms in high-skilled immigration. The last paper describes how strong growth in global scientific and technological knowledge production has reduced the share of world scientific activity in the United States, increased the immigrant proportion of scientists and engineers at US universities and firms, and fostered cross-border collaborations for US scientists.

Black Identities

West Indian Immigrant Dreams and American Realities

Harvard University Press The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

Urban Policy in the Time of Obama

U of Minnesota Press With his background as a community organizer and as a state legislator representing Chicago's South Side, Barack Obama became America's most "urban" president since Teddy Roosevelt. But what has been his record in dealing with the issues most impacting our metropolitan areas today? Looking past the current administration, what are the future prospects of the nation's cities, and how have they been shaped by our policies in this century? Seeking to answer these questions, the contributors to *Urban Policy in the Time of Obama* explore a broad range of policy arenas that shape, both directly and indirectly, metropolitan areas and urbanization processes. This volume reveals the Obama administration's surprisingly limited impact on cities, through direct policy initiatives such as *Strong Cities, Strong Communities, Promise Neighborhoods, and Choice Neighborhood Initiatives*. There has been greater impact with broader policies that shape urban life and governance, including immigration reform, education, and health care. Closing with Cedric Johnson's afterword illuminating the Black Lives Matter movement and what its broader social context says about city governance in our times, *Urban Policy in the Time of Obama* finds that most of the dominant policies and policy regimes of recent years have fallen short of easing the ills of America's cities, and calls for a more equitable and just urban policy regime. The Economic Imperative for Enacting Immigration Reform

Selected Fundamentals of Immigration Law

The Economic and Fiscal Consequences of Immigration

National Academies Press *The Economic and Fiscal Consequences of Immigration* finds that the long-term impact of immigration on the wages and employment of native-born workers overall is very small, and that any negative impacts are most likely to be found for prior immigrants or native-born high school dropouts. First-generation immigrants are more costly to governments than are the native-born, but the second generation are among the strongest fiscal and economic contributors in the U.S. This report concludes that immigration has an overall positive impact on long-run economic growth in the U.S. More than 40 million people living in the United States were born in other countries, and almost an equal number have at least one foreign-born parent. Together, the first generation (foreign-born) and second generation (children of the foreign-born) comprise almost one in four Americans. It comes as little surprise, then, that many U.S. residents view immigration as a major policy issue facing the nation. Not only does immigration affect the environment in which everyone lives, learns, and works, but it also interacts with nearly every policy area of concern, from jobs and the economy, education, and health care, to federal, state, and local government budgets. The changing patterns of immigration and the evolving consequences for American society, institutions, and the economy continue to fuel public policy debate that plays out at the national, state, and local levels. *The Economic and Fiscal Consequences of Immigration* assesses the impact of dynamic immigration processes on economic and fiscal outcomes for the United States, a major destination of world population movements. This report will be a fundamental resource for policy makers and law makers at the federal, state, and local levels but extends to the general public, nongovernmental organizations, the business community, educational institutions, and the research community.

Sand and Blood

America's Stealth War on the Mexico Border

Bold Type Books A damning portrait of the U.S.-Mexico border, where militaristic fantasies are unleashed, violent technologies are tested, and immigrants are targeted. Over the past three decades, U.S. immigration and border security policies have turned the southern states into conflict zones, spawned a network of immigrant detention centers, and unleashed an army of ICE agents into cities across the country. As award-winning journalist John Carlos Frey reveals in this groundbreaking book, the war against immigrants has been escalating for decades, fueled by defense contractors and lobbyists seeking profits and politicians--Republicans and Democrats alike--who relied on racist fear-mongering to turn out votes. After 9/11, while Americans' attention was trained on the Middle East and the wars in Iraq and Afghanistan, the War on Terror was ramping up on our own soil--aimed not at terrorists but at economic migrants, refugees, and families from South and Central America seeking jobs, safety, and freedom in the U.S. But we are no safer. Instead, families are being ripped apart, undocumented people are living in fear, and thousands of migrants have died in detention or crossing the border. Taking readers to the Border Patrol outposts, unmarked graves, detention centers, and halls of

power, *Sand and Blood* is a frightening, essential story we must not ignore.

Locating Emerging Media

Routledge Locating Emerging Media focuses on the tensions between the local and global in the design, distribution, and use of emerging media forms, building on scholarship on the cultural geography of new media networks and products and the relationships between the "global" and the "local." Authors consider new media practices, texts, services, software, policies, infrastructures, and design discourses that enrich existing relationships between creative industries and cultures of production, reception, and engagement. This consideration highlights the relationships between global and local perspectives and new media technologies and practices emerging within (and through) the geography and culture of particular places. Areas examined include East Asia, Latin America, Africa, Europe, South Asia, the Pacific Islands, and the Middle East. Through all is the recognition that what is new or emergent around the globe is unique in each locality.

Innovation and Small Firms

MIT Press Utilizing a unique data set, Zoltan Acs and David Audretsch provide a rich empirical analysis of the increased importance of small firms in generating technological innovations and their growing contribution to the U.S. economy. They identify the contributions made by both small and large firms to the innovative process and the manner in which market structure, and the firm-size distribution in particular, responds to technological change. The authors' analysis relies on traditional theories of industrial organization and tests existing hypotheses, many of them previously untested due to data constraints. Innovation and Small Firms brings together two large data bases recently released by the U. S. Small Business Administration - one directly measuring innovative activity for large and small firms, the other providing a detailed census of economic activity for all manufacturing firms and plants across a broad spectrum of industries. Acs and Audretsch describe and evaluate the data bases in the context of the literature on innovation, market structure, and firm size. They present their findings on the presence of small firms, small-firm entry in manufacturing, small-firm growth and flexible technology, and mobility and firm size. They compare static and dynamic measures of small-firm viability and address the relationships between R&D, innovation, and productivity, and analyze the interaction between technological regimes and the role of government in innovation. Zoltan Acs is an Associate Professor of Economics at the Merrick School of Business, the University of

Baltimore. David Audretsch is a Research Fellow at the Wissenschaftszentrum Berlin für Sozialforschung in West Berlin.
