Law Enforcement Intelligence

A Guide for State, Local, and Tribal Law Enforcement Agencies

Createspace Independent Pub *This intelligence guide was prepared in response to requests from law enforcement executives for guidance in intelligence functions in a post-September 11 world. It will help law enforcement agencies develop or enhance their intelligence capacity and enable them to fight terrorism and other crimes while preserving community policing relationships. The world of law enforcement intelligence has changed dramatically since September 11, 2001. State, local, and tribal law enforcement agencies have been tasked with a variety of new responsibilities; intelligence is just one. In addition, the intelligence discipline has evolved significantly in recent years. As these various trends have merged, increasing numbers of American law enforcement agencies have begun to explore, and sometimes embrace, the intelligence function. This guide is intended to help them in this process. The guide is directed primarily toward state, local, and tribal law enforcement agencies of all sizes that need to develop or reinvigorate their intelligence function. Rather than being a manual to teach a person how to be an intelligence analyst, it is directed toward that manager, supervisor, or officer who is assigned to create an intelligence function. It is intended to provide ideas, definitions, concepts, policies, and resources. It is a primera place to start on a new managerial journey. Every law enforcement agency in the United States, regardless of agency size, must have the capacity to understand the implications of information collection, analysis, and intelligence sharing. Each agency must have an organized mechanism to receive and manage intelligence as well as a mechanism to report and share critical information with other law enforcement agencies. In addition, it is essential that law enforcement agencies develop lines of communication and information-sharing protocols with the private sector, particularly those related to the critical infrastructure, as well as with those private entities that are potential targets of terrorists and criminal enterprises. Not every agency has the staff or resources to create a formal intelligence unit, nor is it necessary in smaller agencies. This document will provide common language and processes to develop and employ an intelligence capacity in SLTLE agencies across the United States as well as articulate a uniform understanding of concepts, issues, and terminology for law enforcement intelligence (LEI). While terrorism issues are currently most pervasive in the current discussion of LEI, the principles of intelligence discussed in this document apply beyond terrorism and include organized crime and entrepreneurial crime of all forms. Drug trafficking and the associated crime of money laundering, for example, continue to be a significant challenge for law enforcement. Transnational computer crime, particularly Internet fraud, identity theft cartels, and global black marketeering of stolen and counterfeit goods, are entrepreneurial crime problems that are increasingly being relegated to SLTLE agencies to investigate simply because of the volume of criminal incidents. Similarly, local law enforcement is being increasingly drawn into human trafficking and illegal immigration enterprises and the often associated crimes related to counterfeiting of official documents, such as passports, visas, driver's licenses, Social Security cards, and credit cards. All require an intelligence capacity for SLTLE, as does the continuation of historical organized crime activities such as auto theft, cargo theft, and virtually any other scheme that can produce profit for an organized criminal entity. To be effective, the law enforcement community must interpret intelligence-related language in a consistent manner. In addition, common standards, policies, and practices will help expedite intelligence sharing while at the same time protecting the privacy of citizens and preserving hard-won community policing relationships.~*

National Strategy for the COVID-19 Response and Pandemic Preparedness

January 2021

Simon and Schuster *The ultimate guide for anyone wondering how President Joe Biden will respond to the COVID-19 pandemic—all his plans, goals, and executive orders in response to the coronavirus crisis. Shortly after being inaugurated as the 46th President of the United States, Joe Biden and his administration released this 200 page guide detailing his plans to respond to the coronavirus pandemic. The National Strategy for the COVID-19 Response and Pandemic Preparedness breaks down seven crucial goals of President Joe Biden's administration with regards to the coronavirus pandemic: 1. Restore trust with the American people. 2. Mount a safe, effective, and comprehensive vaccination campaign. 3. Mitigate spread through expanding masking, testing, data, treatments, health care workforce, and clear public health standards. 4. Immediately expand emergency relief and exercise the Defense Production Act. 5. Safely reopen schools, businesses, and travel while protecting workers. 6. Protect those most at risk and advance equity, including across racial, ethnic and rural/urban lines. 7. Restore U.S. leadership globally and build better preparedness for future threats. Each of these goals are explained and detailed in the book, with evidence about the current circumstances and how we got here, as well as plans and concrete steps to achieve each goal. Also included is the full text of the many Executive Orders that will be issued by President Biden to achieve each of these goals. The National Strategy for the COVID-19 Response and Pandemic Preparedness is required reading for anyone interested in or concerned about the COVID-19 pandemic and its effects on American society.*

Predictive Policing

The Role of Crime Forecasting in Law Enforcement Operations

Rand Corporation *Predictive policing is the use of analytical techniques to identify targets for police intervention with the goal of preventing crime, solving past crimes, or identifying potential offenders and victims. These tools are not a substitute for integrated approaches to policing, nor are they a crystal ball. This guide assesses some of the most promising technical tools and tactical approaches for acting on predictions in an effective way.*

Proactive Policing

Effects on Crime and Communities

National Academies Press *Proactive policing, as a strategic approach used by police agencies to prevent crime, is a relatively new phenomenon in the United States. It developed from a crisis in confidence in policing that began to emerge in the 1960s because of social unrest, rising crime rates, and growing skepticism regarding the effectiveness of standard approaches to policing. In response, beginning in the 1980s and 1990s, innovative police practices and policies that took a more proactive approach began to develop. This report uses the term "proactive policing" to refer to all policing strategies that have as one of their goals the prevention or reduction of crime and disorder and that are not reactive in terms of focusing primarily on uncovering ongoing crime or on investigating or responding to crimes once they have occurred. Proactive policing is distinguished from the everyday decisions of police officers to be proactive in specific situations and instead refers to a strategic decision by police agencies to use proactive police responses in a programmatic way to reduce crime. Today, proactive policing strategies are used widely in the United States. They are not isolated programs used by a select group of agencies but rather a set of ideas that have spread across the landscape of policing. Proactive Policing reviews the evidence and discusses the data and methodological gaps on: (1) the effects of different forms of proactive policing on crime; (2) whether they are applied in a discriminatory manner; (3) whether they are being used in a legal fashion; and (4) community reaction. This report offers a comprehensive evaluation of proactive policing that includes not only its crime prevention impacts but also its broader implications for justice and U.S. communities.*

Child Protective Services

A Guide for Caseworkers

From the Preface: This manual, Child Protective Services: A Guide for Caseworkers, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice. Readers are encouraged

to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Community Policing Defined

Community Policing Defined provides a detailed description of the elements and subelements that fall under the community policing philosophy. The document describes the range of collaborative partnerships that exist between policing agencies and the individuals and organizations they serve; it outlines the process of how they go about engaging in the proactive and systematic examination of identified problems to develop effective responses; and it illustrates how they align their organizational management, structure, personnel, and information systems to support community partnerships and proactive problem-solving.

Health, Safety, and Wellness Program Case Studies in Law Enforcement

In this publication, the Major Cities Chiefs Association and the U.S. Department of Justice's Officer Safety and Wellness (OSW) Group present four recent case studies that serve as models for safety, health, and wellness programs focused on the physical and psychological health of officers. The OSW Group conducted site visits, assessed programs, and questioned participants to identify practical strategies for reducing the incidence of diabetes, promoting physical fitness, providing rehabilitation services, and addressing other health issues.

Pain Management and the Opioid Epidemic

Balancing Societal and Individual Benefits and Risks of Prescription Opioid Use

National Academies Press Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Toward a New Professionalism in Policing

"In the 1980s, community policing replaced the traditional crime-fighting model of policing, often referred to as "professional policing." Community policing was an improvement over the previous policing paradigm (one that the authors argue was more truly professional than the command-and-control model that it replaced) and represented a great change in how police officers did their jobs. The authors argue that it is now time for a new model for the 21st century, one that they call a "New Professionalism." Their framework rests on increased accountability for police in both their effectiveness and their conduct; greater legitimacy in the eyes of the citizenry; continuous innovation in tactics and strategies for interacting with offenders, victims, and the general public; and national coherence through the development of national norms and protocols for policing. *Governing Science* is one of a series of papers that are being published as a result of the second "Executive Session on Policing and Public Safety," a collaboration of NIJ and Harvard Kennedy School's Program in Criminal Justice Policy and Management."--Publisher's website.

The Changing Environment for Policing, 1985-2008

Our thesis is that policing in the mid-1980s was perceived to be in crisis and there was a strong sense that fundamental changes were needed in the way it was delivered. In contrast, police are considered to be performing well 20 years later by both practitioners and outside observers. Crime has been falling for almost 18 years and any new challenges, including terrorism, appear to be manageable without the invention of new strategies for the delivery of police services. Past experience contains the lessons needed for the future. In our view, this assessment may be mistaken, not because existing policies are defective in controlling crime but because the institutions that provide public safety are changing in profound ways that are not being recognized.

The Future of the Public's Health in the 21st Century

National Academies Press The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. *The Future of the Public's Health in the 21st Century* reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Interim Report of the President's Task Force on 21st Century Policing

CreateSpace Trust between law enforcement agencies and the people they protect and serve is essential in a democracy. It is key to the stability of our communities, the integrity of our criminal justice system, and the safe and effective delivery of policing services. In light of the recent events that have exposed rifts in the relationships between local police and the communities they protect and serve, on December 18, 2014, President Barack Obama signed an Executive Order establishing the Task Force on 21st Century Policing. In establishing the task force, the President spoke of the distrust that exists between too many police departments and too many communities—the sense that in a country where our basic principle is equality under the law, too many individuals, particularly young people of color, do not feel as if they are being treated fairly. "When any part of the American family does not feel like it is being treated fairly, that's a problem for all of us," said the President. "It's not just a problem for some. It's not just a problem for a particular community or a particular demographic. It means that we are not as strong as a country as we can be. And when applied to the criminal justice system, it means we're not as effective in fighting crime as we could be." These remarks underpin the philosophical foundation for the Task Force on 21st Century Policing: to build trust between citizens and their peace officers so that all components of a community are treating one another fairly and justly and are invested in maintaining public safety in an atmosphere of mutual respect. Decades of research and practice tell us that the public cares as much about how police interact with them as they care about the outcomes that legal actions produce. People are more likely to obey the law when they believe those who are enforcing it have the right—the legitimate authority—to tell them what to do.² Building trust and legitimacy, therefore, is not just a policing issue. It involves all components of the criminal justice system and is inextricably bound to bedrock issues affecting the community such as poverty, education, and public health. The mission of the task force was to examine how to foster strong, collaborative relationships between local law enforcement and the communities they protect and to make recommendations to the President on how policing practices can promote effective crime reduction while building public trust. The president selected members of the task force based on their ability to contribute to its mission because of their relevant perspective, experience, or subject matter expertise in policing, law enforcement and community relations, civil rights, and civil liberties.

Implementing Community Policing

Over time, the community policing reform movement has come to mean many different things to different people. In fact, the community policing movement has wrestled with tension between philosophical ambiguity and implementation specificity for years. So what is community policing? What does it look like? What does it mean when a police agency says that it practices community policing? This report explores these questions by examining the implementation of community policing in 12 local police agencies across the nation, drawing conclusions from tangible and visible phenomena about what "community policing" means to the agencies claiming to practice it. It describes and analyzes the experiences of local law enforcement agencies and the lessons learned as they work to define, make sense of, and implement community policing, and synthesizes what was learned in eight community policing topic-specific chapters. While there is no one-size-fits-all approach to implementing community policing or any other innovation, this report offers police officials at all levels, from patrol officers to police chiefs, ideas that can be used in their own organizations to help implement effective community policing throughout the United States.
