## Principles of Management

**Principles of Management** is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. Contributing Authors David S. Bright, Wright State University Anastasia H. Cortes, Virginia Tech University Eva Hartmann, University of Richmond K. Praveen Parboteeah, University of Wisconsin-Whitewater Jon L. Pierce, University of Minnesota-Duluth Monique Reece Amit Shah, Frostburg State University Siri Terjesen, American University Joseph Weiss, Bentley University Margaret A. White, Oklahoma State University Donald G. Gardner, University of Colorado-Colorado Springs Jason Lambert, Texas Woman's University Laura M. Leduc, James Madison University Joy Leopold, Webster University Jeffrey Muldoon, Emporia State University James S. O'Rourke, University of Notre Dame

## Records and Information Management, Second Edition

American Library Association As Information Management put it, "On the strength of its currency and coverage alone, Franks' book is poised to take over as the recommended go-to reference for both students and RIM professionals for many years to come." The new second edition cements this work's status as an up-to-date classic, its content updated and expanded to address emerging technologies, most notably blockchain, and evolving standards and practices. Inside, Franks presents complete coverage of the records and information lifecycle model, encompassing paper, electronic (databases, office suites, email), and new media records (blogs, chat messages, and software as a service). Informed by an advisory board of experts in the field and with contributions by noted authorities, the text addresses such key topics as the origins and development of records and information;the discipline of information governance and developing a strategic records management plan;creation/capture and classification;retention strategies, inactive records management, archives, and long-term preservation;access, storage, and retrieval;electronic records and electronic records management systems;the latest on rapidly evolving technologies such as web records, social media, and mobile devices;vital records, disaster preparedness and recovery, and business continuity;monitoring, auditing, and risk management; andeducation and training. This book's authoritative blend of theory and practice makes it a matchless resource for everyone in the archives and records management field. Instructor/trainer extras include a set of ready-to-go, customizable PowerPoint slides to accompany the text. Examination copies are available for instructors who are interested in adopting this title for course use.

## Quality Management in Scientific Research

## Challenging Irreproducibility of Scientific Results

Springer In recent years, the attention of the scientific and social community has not solely been on producing new findings, but increasingly also on the related issues of the reliability, safety, and efficacy of the discoveries made, as well as the efficient and effective use of resources. The adoption of management models and tools can help scientists to improve their research, ensuring valuable, robust and dependable outcomes. Quality disciplines have been widely used for decades in industrial and business fields, building a knowledge base that can be translated and exploited, much to the advantage of scientific research. However, quality references in scientific research are still extremely rare and largely limited to an international guideline and a few sector-specific standards. Despite WHO and EU Commission campaigns, there are still precious few practical texts that offer researchers guidance on quality principles and provide simple tools and methodologies for their daily work. The book, starting from the problem of the reproducibility of scientific results and the substantial contribution that the Quality approach can make to research (Chapter 1), introduces the reader to key principles and basic concepts of Quality and illustrates both general and research-specific quality standards, paving the way for further discussion (Chapter 2). In turn, Chapter 3 presents detailed applications of Quality principles in various aspects of research, from study and ethics to materials and equipment management. Chapters 4 and 5, respectively, are devoted to Quality tools and Quality methodologies, as well as soft skills, all of which are valuable to scientific experimentation and study management. The concepts and practical tools discussed are extensively illustrated with examples from actual applications in scientific research.

## General Practice Nursing: foundational principles

M&K Update Ltd The General Practice Nurse's role has changed enormously over the past few decades. This helpful book gives an up-to-date overview of the GPN's responsibilities, providing relevant information about clinical skills and knowledge, health promotion and screening, and the management and assessment of long-term conditions most commonly presented in primary care. The book is edited by Deborah Duncan, a nurse educator and GPN, and includes contributions from other nurses who are experienced in their fields. It contains a wealth of references and resources, enabling the reader to gain more detailed knowledge of each topic. There are also reader's activities (designed to reinforce the content) scattered throughout the text. Aimed at nurses in England, Scotland, Wales and Northern Ireland, who want to work in primary care, this will be a vital resource for those who are new to General Practice Nursing as well as those returning to it after a long gap. Contents include: • The role of the GPN: Political, professional and economic drivers • Consultation skills • Public health and an introduction to health screening • Cervical cytology • Women's health • Men's health • Immunisation • Travel health • Ear care • Wound care • General principles of long-term conditions • Diabetes • Respiratory conditions • Chronic kidney disease • Coronary heart disease • Cancer as a long-term condition • Dementia • Mental illness as a long-term condition

## Digital Color Management

## Principles and Strategies for the Standardized Print Production

Springer Science & Business Media The use of differing input and output equipment (scanners, monitors, printers, etc.) in computer-aided publishing often results in the unsatisfactory reproduction of color originals in print and online media. This is the first book presenting the basics and strategies for color management in the print publishing workflow with focus on producing according ISO 12647-2 and other standards. The user learns what to expect from color management according to the ICC-standard and how to avoid the

pitfalls. The terminology is oriented on practicing professionals for print production.

## Principles of Management 3.0

### Fundamentals of Collection Development and Management, Fourth Edition

American Library Association Technical Services Quarterly declared that the third edition "must now be considered the essential textbook for collection development and management ... the first place to go for reliable and informative advice." For the fourth edition expert instructor and librarian Johnson has revised and freshened this resource to ensure its timeliness and continued excellence. Each chapter offers complete coverage of one aspect of collection development and management, including numerous suggestions for further reading and narrative case studies exploring the issues. Thorough consideration is given to traditional management topics such as organization of the collection, weeding, staffing, and policymaking; cooperative collection development and management; licenses, negotiation, contracts, maintaining productive relationships with vendors and publishers, and other important purchasing and budgeting topics; important issues such as the ways that changes in information delivery and access technologies continue to reshape the discipline, the evolving needs and expectations of library users, and new roles for subject specialists, all illustrated using updated examples and data; and marketing, liaison activities, and outreach. As a comprehensive introduction for LIS students, a primer for experienced librarians with new collection development and management responsibilities, and a handy reference resource for practitioners as they go about their day-to-day work, the value and usefulness of this book remain unequaled.

### The Principles of Project Management (SitePoint Project Management)

SitePoint The Principles of Project Management lays out clear steps that anyone can follow to get projects done right, and delivered on time. This full color book covers: Why Project Management is important The 6 fundamental truths of project management Getting started: Discovering, Initiating, Planning and Resourcing a project Getting the Job Done: Executing and controlling Keeping it Smooth: Communication, collaboration and managing change Following through: Ongoing support and maintenance, measuring operational success Resources: Review of various tools, recommended reading, professional resources for project management Short, and to the point, this book aims to do to provide a solid foundation for anyone who finds themselves responsible for executing projects. From the Back Cover Every project you manage will be unique. Scope, budgets, team dynamics, and timeframes will differ. As a project manager, the most important factor in achieving project success will be your understanding of The Principles Of Project Management. This book will show you that project management isn't rocket science: using the information contained in this book, you'll deliver projects on time and on budget, again and again. With The Principles Of Project Management you'll: Learn how to start every project on the right foot. Master the planning, execution, and control of your projects. Discover the secrets of effective communication and change management. Identify project warning signals and learn to keep your projects on track. Understand the benefits of using the right tools, resources, and people. Learn how to give a superstar project handover. And much, much more

### Principles and Practice of Pediatric Infectious Diseases E-Book

Elsevier Health Sciences Comprehensive in scope, yet concise and easy to manage, Principles and Practice of Pediatric Infectious Diseases, 6th Edition, by Drs. Sarah S. Long, Charles G. Prober, Marc Fischer, and new editor David Kimberlin, is your go-to resource for authoritative information on infectious diseases in children and adolescents. A veritable "who's who" of global authorities provides the practical knowledge you need to understand, diagnose, and manage almost any pediatric infectious disease you may encounter. Covers the latest aspects of the COVID-19 pandemic, including manifestations, diagnosis, management, and prevention of SARS-CoV-2 infection. Features an easy-access format with high-yield information boxes, highlighted key points, and an abundance of detailed illustrations and at-a-glance tables. Allows quick look-up by clinical presentation, pathogen, or type of host. Highlights expanding antimicrobial resistance patterns and new therapies for viral and fungal infections and resistant bacterial infections. Includes coverage of the latest vaccine products, recommendations, and effectiveness. Reviews emerging healthcare-associated infections, their management, control, and prevention. Contains a new chapter on Chorioamnionitis and Neonatal Consequences.

### Introduction to Climate Change Management

#### Transitioning to a Low-Carbon Economy

Springer Nature This book provides climate students with the basic scientific background to climate change management. Students will learn about international and national approaches to climate change management defined in voluntary initiatives as well as in national law and international agreements. The book describes mitigation and adaptation measures, monitoring and reporting of greenhouse gas emissions, and strategies for achieving a low-carbon economy, including green finance. This book combines theory and practice, introducing students to the conceptual background but also taking a professional and technical approach with case studies and low carbon toolkits. Filled with didactic elements such as concept schemes, tables, charts, figures, examples, as well as questions and answers at the end of the chapters, this book aims to engage critical thinking and the discussion of important topics of our days. The low-carbon strategy is one of the answers to limiting the greenhouse effect on our planet. This strategy is to minimize the overall carbon consumption in the life cycle of the products we consume, from the extraction of raw materials to the end of their life. The future is being built today. This book will guide its readers along the path of imagining and realizing a low-carbon economy."

### The Handbook of Board Governance

#### A Comprehensive Guide for Public, Private, and Not-for-Profit Board Members

John Wiley & Sons The revised new edition of the must-read guide for executives—provides comprehensive coverage of topics in corporate governance by leading subject-matter experts The Handbook of Board Governance is the marketing-leading text on public, nonprofit, and private board governance. Providing comprehensive, in-depth coverage, this unique text represents a collaboration of internationally-recognized academics and prominent organization directors, executives, managers, and advisors. Contributors include Ariel Fromer Babcock, Robert Eccles, Alice Korngold, Ellie Mulholland, Michael Useem, Elizabeth Valentine and John Zinkin. Practical, expert guidance enables readers to understand value creation and the strategic role of the board, risk governance and oversight, audit and compensation committee effectiveness, CEO succession planning, and other diverse board duties and responsibilities. Now in its second edition, the Handbook offers substantial updates and revisions reflecting contemporary trends, practices, and developments in board governance. New content includes discussions of pressing issues related to climate change, examination of information technology and cybersecurity challenges, and recent tax legislation that will impact executive compensation. Editor Dr. Richard Leblanc—an award-winning teacher, professor, lawyer, management consultant, and specialist on boards of directors—integrates practical experience and academic rigor to assist readers: Build and strengthen engaged and collaborative leadership in the boardroom Recognize the role and responsibilities of a well-functioning governing board Risk governance, assurance, and the duties of directors Keep pace with new trends in board governance and shareholder responsibility Measure performance and align performance measurement to executive pay Understand information technology governance, sustainability governance, and the different forms of governance Highly relevant to board and committee members regardless of sector or industry, The Handbook of Board Governance, 2nd Edition is an invaluable source of knowledge on all aspects of corporate and organization governance.

## ASTM Standardization News

# Emergency and Disaster Management: Concepts, Methodologies, Tools, and Applications

## Concepts, Methodologies, Tools, and Applications

IGI Global In a world of earthquakes, tsunamis, and terrorist attacks, emergency response plans are crucial to solving problems, overcoming challenges, and restoring and improving communities that have been affected by these catastrophic events. Although the necessity for quick and efficient aid is understood, researchers and professionals continue to strive for the best practices and methodologies to properly handle such significant events. **Emergency and Disaster Management: Concepts, Methodologies, Tools, and Applications** is an innovative reference source for the latest research on the theoretical and practical components of initiating crisis management and emergency response. Highlighting a range of topics such as preparedness and assessment, aid and relief, and the integration of smart technologies, this multi-volume book is designed for emergency professionals, policy makers, practitioners, academicians, and researchers interested in all aspects of disaster, crisis, and emergency studies.

## Managing Knowledge Resources and Records in Modern Organizations

IGI Global Modern organizations and businesses are growing rapidly every day. With these advances comes the need for more progressive forms of knowledge management and record keeping techniques. **Managing Knowledge Resources and Records in Modern Organizations** is a pivotal reference source that discusses the current trends, technologies, and ethics associated with knowledge management. Featuring comprehensive coverage on a spectrum of topics, such as leadership roles in knowledge sharing, knowledge governance, electronic resources for public sector reform, and record keeping for information in public and private sector organizations, this publication is a comprehensive resource for educators, professionals, practitioners, academics, and researchers interested in the latest information on knowledge management for business and organizations.

## Reflections on Ethics and Responsibility

### Essays in Honor of Peter A. French

Springer The original essays in this book address the influential writings of Peter A. French on the nature of responsibility, ethics, and moral practices. French's contributions to a wide spectrum of philosophical discussions have made him a dominant figure in the fields of normative ethics, meta-ethics, applied ethics, as well as legal and political philosophy. Many of French's deepest insights come from identifying and exploring the scope and nature of moral responsibility and human agency as they appear in actual events, real social and cultural practices, as well as in literature and film. This immediacy renders French's scholarship vital and accessible to a wide variety of audiences. The authors, recognized for their own contributions to the understanding of the nature of morality and moral practices offer new and unique positions while exploring, expanding and responding to those of French. The final chapter is written by French, in which he provides both new philosophical insight as well as some reflection on his own work and its influence. This book will appeal to philosophers, as well as advanced students and researchers in the humanities, social sciences, law, and political science.

## Documentation Guidelines for Evaluation and Management Services

American Medical Association Press

### Assessing and Managing Groundwater in Different Environments

CRC Press This collection of papers is a snapshot of modern hydrogeology in which highly technical methods and approaches sit side-by-side with overlapping legal, social, organisational, institutional and governance considerations. Groundwater is integral to many human and environmental systems. Indeed, there appears to be a growing realisation that some of the most pressing physical problems in the field of hydrogeology - over-abstraction, salinization or pollution - can only really be solved by taking a multi-disciplinary approach to the issues that takes all other related professions into account. Whilst a 'technical' solution may be readily deciphered, the larger challenge usually lies in the sustainably-funded and widely-accepted implementation of that measure. This book ranges from discussion and debate on the hot topic of hydraulic fracturing of wells or 'fracking' for shale gas and its potential to disrupt groundwater systems, to the application of highly technical modelling procedures to help solve complex, real world problems. It is a window on the preoccupations of modern hydrogeologists and an insight into the way in which hydrogeological techniques and methods are being holistically adapted to address problems in the real world. This book is targeted at professional hydrogeologists, sociologists, experts in governance, law and policy as well as ecologists and other professionals that nowadays all sit alongside groundwater understanding. The book will also appeal to politicians, resource managers, regulators and others interested in sustainable water supply.

## Financial Management for Nurse Managers and Executives - E-Book

Elsevier Health Sciences Learn how financial management fits into the healthcare organization. **Financial Management for Nurse Managers and Executives, 5th Edition** covers the latest accounting and financial management practices distinctly from the nurse manager's point of view. Topics include how financial management fits into the health care organization, financial accounting, cost analysis, planning and control management of the organization's financial resources, various management tools, and the future of financial management with respect to healthcare reform and international accounting standards. This new edition includes updated information on the Affordable Care Act, Accountable Care Organizations, Value Based Payment, and Team and Population Based Care. Nursing-focused content thoroughly describes healthcare finance and accounting from the nurse manager's point of view. Numerous worksheets and tables including healthcare spreadsheets, budgets, and calculations provide you with specific examples of how to apply financial management principles to nursing practice. **NEW!** Information about the Affordable Care Act details how changes and developments affects coverage for millions of Americans. **NEW!** Value-Based Payment reimbursement information details what nurse executives need to know in order to use this new system **NEW!** Coverage of Accountable Care Organizations provides current information on one of the emerging forms of managed care and how it works within the financial system of healthcare. **NEW!** Team-and Population-Based care information covers how to work with healthcare professionals outside of nursing.

## Digital Curation: Breakthroughs in Research and Practice

## Breakthroughs in Research and Practice

IGI Global The effective use of technology offers numerous benefits in protecting cultural heritage. With the proper implementation of these tools, the management and conservation of artifacts and knowledge are better attained. **Digital Curation: Breakthroughs in Research and Practice** is a critical source of academic knowledge on the preservation, selection, collection, maintenance, and archiving of digital materials. Highlighting a range of pertinent topics such as electronic resource management, digital preservation, and virtual restoration, this publication is an ideal reference source for digital curators, technology developers, IT professionals, academicians, researchers, and graduate-level students interested in the curation and preservation of digital resources.

## Critical Care Nursing

Elsevier Health Sciences Endorsed by the Australian College of Critical Care Nurses (ACCCN) ACCCN is the peak professional organisation representing critical care nurses in Australia Written by leading critical care nursing clinicians, Leanne Aitken, Andrea Marshall and Wendy Chaboyer, the 4th edition of **Critical Care Nursing** continues to encourage and challenge critical care nurses and students to develop world-class practice and ensure the delivery of the highest quality care. The text addresses all aspects of critical care nursing and is divided into three sections: scope of practice, core components and specialty practice, providing the most recent research, data, procedures and guidelines from expert local and international critical care nursing academics and clinicians. Alongside its strong focus on critical care nursing practice within Australia and New Zealand, the 4th edition brings a stronger emphasis on international practice and expertise to ensure students and clinicians have access to the most contemporary practice insights from around the world. Increased emphasis on practice tips to help nurses care for patients within critical care Updated case studies, research vignettes and learning activities to support further learning Highlights the role of the critical care nurse within a multidisciplinary environment and how they work together Additional resources on Evolve An eBook on VitalSource Instructor resources Case Study suggested responses Learning Activity suggested responses Additional Case Study answers Image collection, including tables Student resources Additional Case Studies Weblinks Increased global considerations relevant to international context of critical care nursing alongside its key focus within the ANZ context Aligned to update NMBA RN Standards for Practice and NSQHS Standards An eBook included in all print purchases

## Leadership and Nursing Care Management - E-Book

Elsevier Health Sciences Develop your management and nursing leadership skills! **Leadership & Nursing Care Management, 7th Edition** focuses on best practices to help you learn to effectively manage interdisciplinary teams, client needs, and systems of care. A research-based approach includes realistic cases studies showing how to apply management principles to nursing practice. Arranged by American Organization for Nursing Leadership (AONL) competencies, the text addresses topics such as staffing and scheduling, budgeting, team building, legal and ethical issues, and measurement of outcomes. Written by noted nursing educators Diane L. Huber and Maria Lindell Joseph, this edition includes new Next Generation NCLEX® content to prepare you for success on the NGN certification exam. **UNIQUE!** Organization of chapters by AONL competencies addresses leadership and care management topics by the five competencies integral to nurse executive roles. Evidence-based approach keeps you on the cutting edge of the nursing profession with respect to best practices. Critical thinking exercises at the end of each chapter challenge you to reflect on chapter content, critically analyze the information, and apply it to a situation. Case studies at the end of each chapter present real-world leadership and management vignettes and illustrate how concepts can be applied to specific situations. Research Notes in each chapter summarize current research studies relating to nursing leadership and management. Full-color photos and figures depict concepts and enhance learning. **NEW!** Updates are included for information relating to the competencies of leadership, professionalism, communication and relationship building, knowledge of the healthcare environment, and business skills. **NEW!** Five NGN-specific case studies are included in this edition to align with clinical judgment content, preparing you for the Next Generation NCLEX® (NGN) examination. **NEW** contributors — leading experts in the field — update the book's content.

## Sterile Insect Technique

## Principles And Practice In Area-Wide Integrated Pest Management

CRC Press The sterile insect technique (SIT) is an environment-friendly method of pest control that integrates well into area-wide integrated pest management (AW-IPM) programmes. This book takes a generic, thematic, comprehensive, and global approach in describing the principles and practice of the SIT. The strengths and weaknesses, and successes and failures, of the SIT are evaluated openly and fairly from a scientific perspective. The SIT is applicable to some major pests of plant-, animal-, and human-health importance, and criteria are provided to guide in the selection of pests appropriate for the SIT. In the second edition, all aspects of the SIT have been updated and the content considerably expanded. A great variety of subjects is covered, from the history of the SIT to improved prospects for its future application. The major chapters discuss the principles and technical components of applying sterile insects. The four main strategic options in using the SIT — suppression, containment, prevention, and eradication — with examples of each option are described in detail. Other chapters deal with supportive technologies, economic, environmental, and management considerations, and the socio-economic impact of AW-IPM programmes that integrate the SIT. In addition, this second edition includes six new chapters covering the latest developments in the technology: managing pathogens in insect mass-rearing, using symbionts and modern molecular technologies in support of the SIT, applying post-factory nutritional, hormonal, and semiochemical treatments, applying the SIT to eradicate outbreaks of invasive pests, and using the SIT against mosquito vectors of disease. This book will be useful reading for students in animal-, human-, and plant-health courses. The in-depth reviews of all aspects of the SIT and its integration into AW-IPM programmes, complete with extensive lists of scientific references, will be of great value to researchers, teachers, animal-, human-, and plant-health practitioners, and policy makers.

## Encyclopedia of Archival Science

Rowman & Littlefield Here is the first-ever comprehensive guide to archival concepts, principles, and practices. **Encyclopedia of Archival Science** features 154 entries, which address every aspect of archival professional knowledge. These entries range from traditional ideas (like appraisal and provenance) to today's challenges (digitization and digital preservation). They present the thoughts of leading luminaries like Ernst Posner, Margaret Cross-Norton, and Philip Brooks as well as those of contemporary authors and rising scholars. Historical and ethical components of practice are infused throughout the work. Edited by Luciana Duranti from the University of British Columbia and Patricia C. Franks from San José State University, this landmark work was overseen by an editorial board comprised of leading archivists and archival educators from every continent: Adrian Cunningham (Queensland State Archives, Australia), Fiorella Foscarini (University of Toronto and University of Amsterdam), Pat Galloway (University of Texas at Austin), Shadrack Katuu (International Atomic Energy Agency), Giovanni Michetti (University of Rome La Sapienza), Ken Thibodeau (National Archives and Records Administration, US), and Geoffrey Yeo (University College London, UK).

## The Open Handbook of Linguistic Data Management

MIT Press A guide to principles and methods for the management, archiving, sharing, and citing of linguistic research data, especially digital data. "Doing language science" depends on collecting, transcribing, annotating, analyzing, storing, and sharing linguistic research data. This volume offers a guide to linguistic data management, engaging with current trends toward the transformation of linguistics into a more data-driven and reproducible scientific endeavor. It offers both principles and methods, presenting the conceptual foundations of linguistic data management and a series of case studies, each of which demonstrates a concrete application of abstract principles in a current practice. In part 1, contributors bring together knowledge from information science, archiving, and data stewardship relevant to linguistic data management. Topics covered include implementation principles, archiving data, finding and using datasets, and the valuation of time and effort involved in data management. Part 2 presents snapshots of practices across various subfields, with each chapter presenting a unique data management project with generalizable guidance for researchers. The **Open Handbook of Linguistic Data Management** is an essential addition to the toolkit of every linguist, guiding researchers toward making their data FAIR: Findable, Accessible, Interoperable, and Reusable.

## Management of Animal Care and Use Programs in Research, Education, and Testing

CRC Press AAP Prose Award Finalist 2018/19 *Management of Animal Care and Use Programs in Research, Education, and Testing, Second Edition* is the extensively expanded revision of the popular *Management of Laboratory Animal Care and Use Programs* book published earlier this century. Following in the footsteps of the first edition, this revision serves as a first line management resource, providing for strong advocacy for advancing quality animal welfare and science worldwide, and continues as a valuable seminal reference for those engaged in all types of programs involving animal care and use. The new edition has more than doubled the number of chapters in the original volume to present a more comprehensive overview of the current breadth and depth of the field with applicability to an international audience. Readers are provided with the latest information and resource and reference material from authors who are noted experts in their field. The book: - Emphasizes the importance of developing a collaborative culture of care within an animal care and use program and provides information about how behavioral management through animal training can play an integral role in a veterinary health program - Provides a new section on Environment and Housing, containing chapters that focus on management considerations of housing and enrichment delineated by species - Expands coverage of regulatory oversight and compliance, assessment, and assurance issues and processes, including a greater discussion of globalization and harmonizing cultural and regulatory issues - Includes more in-depth treatment throughout the book of critical topics in program management, physical plant, animal health, and husbandry. Biomedical research using animals requires administrators and managers who are knowledgeable and highly skilled. They must adapt to the complexity of rapidly-changing technologies, balance research goals with a thorough understanding of regulatory requirements and guidelines, and know how to work with a multi-generational, multi-cultural workforce. This book is the ideal resource for these professionals. It also serves as an indispensable resource text for certification exams and credentialing boards for a multitude of professional societies Co-publishers on the second edition are: ACLAM (American College of Laboratory Animal Medicine); ECLAM (European College of Laboratory Animal Medicine); IACLAM (International Colleges of Laboratory Animal Medicine); JCLAM (Japanese College of Laboratory Animal Medicine); KCLAM (Korean College of Laboratory Animal Medicine); CALAS (Canadian Association of Laboratory Animal Medicine); LAMA (Laboratory Animal Management Association); and IAT (Institute of Animal Technology).

## Systemic Risk in the Financial Sector

### Ten Years After the Great Crash

McGill-Queen's Press - MQUP In late 2008, the world's financial system was teetering on the brink of systemic collapse. While the impacts of the global financial crisis would be felt immediately, at every level of the economy, it would also send years-long aftershocks through investment, banking and regulatory circles worldwide. More than a decade after the worst year of the global financial crisis, what has been learned from its harsh lessons? Are governments and regulators more prepared for another financial system failure that would significantly affect the real economy? What may be the potential triggers for such a collapse to occur in the future? *Systemic Risk in the Financial Sector: Ten Years after the Great Crash* draws on some of the world's leading experts on financial stability and regulation to examine and critique the progress made since 2008 in addressing systemic risk. The book covers topics such as central banks and macroprudential policies; fintech; regulators' perspectives from the United States and the European Union; the logistical and incentive challenges that impede standardization and collection; clearing houses and systemic risk; optimal resolution and bail-in tools; and bank leverage, welfare and regulation. Drawing on experts across disciplines — including Howell Jackson, John Geanakoplos, Charles Goodhart, Anat Admati, Roberta Romano and Martin Hellwig — *Systemic Risk in the Financial Sector* is the definitive guide to understanding the global financial crisis, the safeguards being put into place to try to avoid similar crises in the future, and the limitations of those safeguards.

## The 10 Principles of Food Industry Sustainability

John Wiley & Sons Although the food industry is beginning to make headway with its sustainability initiatives, substantially more progress is needed in order to feed the world's growing population sustainably. The challenge is that the topic of sustainability can seem overwhelming and there is limited information that is specific to the food industry. Written by an experienced food industry professional with years of experience in sustainability, *The 10 Principles of Food Industry Sustainability* inspires and informs the progress required to nourish the population, revitalize natural resources, enhance economic development, and close resource loops. The book makes this complex topic approachable and actionable by identifying the most pressing sustainability priorities across the entire food supply chain and showing, with tools and examples, how producers, processors, packers, distributors, marketers and retailers all play a role in advancing improvement. The book begins with an overview of the Principles of sustainability in the food industry: what they are and why they matter. Subsequent chapters focus on each of the Ten Principles in detail: how they relate to the food industry, their global relevance (including their environmental, health, and social impacts), and the best practices to achieve the potential of meaningful and positive progress that the Principles offer. Specific examples from industry are presented in order to provide scalable solutions and bring the concepts to life, along with top resources for further exploration. The Principles, practices, and potential of sustainability in the food industry covered in this book are designed to be motivating and to offer a much-needed and clear way forward towards a sustainable food supply.

## Diabetes in Cardiovascular Disease: A Companion to Braunwald's Heart Disease E-Book

Elsevier Health Sciences *Diabetes in Cardiovascular Disease* is a current, expert resource focusing on the complex challenges of providing cardiovascular care to patients with diabetes. Designed as a companion to *Braunwald's Heart Disease*, this interdisciplinary medical reference book bridges the gap between the cardiology and endocrinology communities of scientists and care providers, and highlights the emerging scientific and clinical topics that are relevant for cardiologists, diabetologists/endocrinologists, and the extended diabetes care team. Access essential coverage of basic and clinical sciences, complemented by an expanded focus on epidemiology, behavioral sciences, health policy, and disparities in health care. Take advantage of a format that follows that of the well-known and internationally recognized *Braunwald's Heart Disease*. Review the best available clinical data and pragmatic recommendations for the prevention and management of cardiovascular complications of diabetes; national/societal intervention strategies to curb the growing prevalence of diabetes; and the current pathophysiological understanding of cardiovascular comorbidities in patients with diabetes. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability.

## Fundamentals of Nursing - E-Book

Elsevier Health Sciences Learn the concepts and skills you need to provide excellent nursing care! *Fundamentals of Nursing, 10th Edition* prepares you to succeed as a nurse by providing a solid foundation in critical thinking, clinical reasoning, nursing theory, evidence-based practice, and patient-centered care in all settings. With illustrated, step-by-step guidelines, this book makes it easy to learn important skills and procedures. Care plans are presented within a nursing process framework, and case studies show how to apply concepts to nursing practice. From an expert author team led by Patricia Potter and Anne Perry, this bestselling nursing textbook helps you develop the understanding and clinical reasoning you need to succeed in the classroom and in your career.

## The Royal Marsden Manual of Clinical Nursing Procedures

John Wiley & Sons Nationally recognised as the definitive guide to clinical nursing skills, *The Royal Marsden Manual of Clinical Nursing Procedures* has provided essential nursing knowledge and up-to-date information on nursing skills and procedures for over 30 years. Now in its 9th edition, this full-colour manual provides the underlying theory and evidence for procedures enabling nurses to gain the confidence they need to become fully informed, skilled practitioners. Written with the qualified nurse in mind, this manual provides up-to-date, detailed, evidence-based guidelines for over 200 procedures related to every aspect of a person's care including key information on equipment, the procedure and post-procedure guidance, along with full colour illustrations and photos. Following extensive market research, this ninth edition: contains the procedures and changes in practice that reflect modern acute nursing care includes thoroughly reviewed and updated evidence underpinning all procedures is organised and structured to represent the needs of a patient along their care pathway integrates risk-management into relevant chapters to ensure it is central to care contains revised procedures following 'hands-on' testing by staff and students at Kingston University is also available as an online edition

## Report on Torres Strait Fisheries Research Protocols

### A Guide for Researchers

UTS ePRESS At its 45th meeting in 2008, the Torres Strait Scientific Advisory Committee (TSSAC) set down for discussion the need for guiding protocols that researchers adopt when working in the Torres Strait (45.6.1). The Committee considered the current processes and procedures for fisheries research in the Torres Strait, and discussed approaches developed for other organisations. At the following meeting members agreed to commission a review of current approaches and the development of a single source web-based document that would provide guiding protocols for adoption by researchers when working in the Torres Strait. This book is the result of the commissioned work.

## Opportunistic Spectrum Sharing and White Space Access

### The Practical Reality

John Wiley & Sons Details the paradigms of opportunistic spectrum sharing and white space access as effective means to satisfy increasing demand for high-speed wireless communication and for novel wireless communication applications This book addresses opportunistic spectrum sharing and white space access, being particularly mindful of practical considerations and solutions. In Part I, spectrum sharing implementation issues are considered in terms of hardware platforms and software architectures for realization of flexible and spectrally agile transceivers. Part II addresses practical mechanisms supporting spectrum sharing, including spectrum sensing for opportunistic spectrum access, machine learning and decision making capabilities, aggregation of spectrum opportunities, and spectrally-agile radio waveforms. Part III presents the ongoing work on policy and regulation for efficient and reliable spectrum sharing, including major recent steps forward in TV White Space (TVWS) regulation and associated geolocation database approaches, policy management aspects, and novel licensing schemes supporting spectrum sharing. In Part IV, business and economic aspects of spectrum sharing are considered, including spectrum value modeling, discussion of issues around disruptive innovation that are pertinent to opportunistic spectrum sharing and white space access, and business benefits assessment of the novel spectrum sharing regulatory proposal Licensed Shared Access. Part V discusses deployments of opportunistic spectrum sharing and white space access solutions in practice, including work on TVWS system implementations, standardization activities, and development and testing of systems according to the standards. Discusses aspects of pioneering standards such as the IEEE 802.22 "Wi-Far" standard, the IEEE 802.11af "White-Fi" standard, the IEEE Dynamic Spectrum Access Networks Standards Committee standards, and the ETSI Reconfiguration Radio Systems standards Investigates regulatory and regulatory-linked solutions assisting opportunistic spectrum sharing and white space access, including geo-location database approaches and licensing enhancements Covers the pricing and value of spectrum, the economic effects and potentials of such technologies, and provides detailed business assessments of some particularly innovative regulatory proposals The flexible and efficient use of radio frequencies is necessary to cater for the increasing data traffic demand worldwide. This book addresses this necessity through its extensive coverage of opportunistic spectrum sharing and white space access solutions. Opportunistic Spectrum Sharing and White Space Access: The Practical Reality is a great resource for telecommunication engineers, researchers, and students.

## The Official (ISC)2 Guide to the CCSP CBK

John Wiley & Sons Globally recognized and backed by the Cloud Security Alliance (CSA) and the (ISC)2 the CCSP credential is the ideal way to match marketability and credibility to your cloud security skill set. The Official (ISC)2® Guide to the CCSP® CBK® is your ticket for expert insight through the 6 CCSP domains. You will find step-by-step guidance through real-life scenarios, illustrated examples, tables, best practices, and more. Sample questions help you reinforce what you have learned and prepare smarter. Easy-to-follow content guides you through • Major topics and subtopics within the 6 domains • Detailed description of exam format • Exam registration and administration policies Reviewed by cloud security experts, and developed by (ISC)2, this is your study guide to fully preparing for the CCSP and reaffirming your unique cloud security skills. Get ready for the next step in your career with Official (ISC)2 Guide to the CCSP CBK.

## Model Rules of Professional Conduct

American Bar Association The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

## Standards for Internal Control in the Federal Government

Government Printing Office This key resource is often referred to as the "Green Book". Federal policymakers and program managers are continually seeking ways to better achieve agencies' missions and program results, in other words, they are seeking ways to improve accountability. A key factor in helping achieve such outcomes and minimize operational problems is to implement appropriate internal control. Effective internal control also helps in managing change to cope with shifting environments and evolving demands and priorities. As programs change and as agencies strive to improve operational processes and implement new technological developments, management must continually assess and evaluate its internal control to assure that the control activities being used are effective and updated when necessary. The Federal Managers' Financial Integrity Act of 1982 (FMFIA) requires the General Accounting Office (GAO) to issue standards for internal control in government. The standards provide the overall framework for establishing and maintaining internal control and for identifying and addressing major performance and management challenges, and areas at greatest risk of fraud, waste, abuse and mismanagement. This report explores the Five Standards for Internal Control as identified by GAO for policymakers and program managers: - Control Environment - Risk Assessment - Control Activities - Information and Communications - Monitoring These standards apply to all aspects of an agency's operations: programmatic, financial, and compliance. However, they are not intended to limit or interfere with duly granted authority related to developing legislation, rule-making, or other discretionary policy-making in an agency. These standards provide a general framework. In implementing these standards, management is responsible for developing the detailed policies, procedures, and practices to fit their agency's operations and to ensure that they are built into and an integral part of operations. ## Guiding Principles on Business and Human Rights

### Implementing the United Nations "Protect, Respect and Remedy" Framework

United Nations Publications "This publication contains the 'Guiding Principles on Business and Human Rights: Implementing the United Nations Protect, Respect and Remedy Framework', which were developed by the Special Representative of the Secretary-General on the issue of human rights and transnational corporations and other business enterprises. The Special Representative annexed the Guiding Principles to his final report to the Human Rights Council (A/HRC/17/31), which also includes an introduction to the Guiding

Principles and an overview of the process that led to their development. The Human Rights Council endorsed the Guiding Principles in its resolution 17/4 of 16 June 2011."--P. iv.

## Koenig and Schultz's Disaster Medicine Comprehensive Principles and Practices

Cambridge University Press As societies become more complex and interconnected, the global risk for catastrophic disasters is increasing. Demand for expertise to mitigate the human suffering and damage these events cause is also high. A new field of disaster medicine is emerging, offering innovative approaches to optimize disaster management. Much of the information needed to create the foundation for this growing specialty is not objectively described or is scattered among multiple different sources. This definitive work brings together a coherent and comprehensive collection of scientific observations and evidence-based recommendations with expert contributors from around the globe. This book identifies essential subject matter, clarifies nomenclature, and outlines necessary areas of proficiency for healthcare professionals handling mass casualty crises. It also describes in-depth strategies for the rapid diagnosis and treatment of victims suffering from blast injuries or exposure to chemical, biological, and radiological agents.

## The Art and Science of Personalising Care with Older People with Diabetes

Springer This unique book is intended for all health professionals caring for older people with diabetes such as specialist and general nurses, doctors, primary care practitioners and dietitians. Although there is an increasing body of work about personalised care, no publications were identified that encompass the focus and scope of the proposed book. The global population is ageing and increasing age is a key risk factor for diabetes. Older people with diabetes are often vulnerable, have complex care needs and often have cognitive changes, which makes personalising care challenging for health professionals. Thus, this is an internationally relevant book filling a gap in the current literature. This is a practical and updated book that will use an engaging and easy to read narrative style. It challenges readers to reflect in and on their practice. It encompasses people with diabetes' and authors' stories, which are known to have a special interest to readers, make it easier to apply the information to practice, enhance learning, and hence the relevance and value of the book. It is relevant to advocacy organisations as well as managers and service planners. Researchers and scientists may find relevant information on grant and ethics applications, research protocols, plain language statements for potential participants and operationalising research protocols.

## Research Handbook on Shadow Banking

### Legal and Regulatory Aspects

Edward Elgar Publishing Research Handbook on Shadow Banking brings together a range of international experts to discuss shadow banking activities, the purposes they serve, the risks they pose to the financial system and implications for regulators and the regulatory perimeter. Including discussions specific to the UK, European Union, US, China and Singapore, this book offers high level and theoretical perspectives on shadow banking and regulatory risks, as well as more detailed explorations of specific markets in shadow banking.

## Modernizing Sanitary and Phytosanitary Measures in CAREC

### An Assessment and the Way Forward

Asian Development Bank This publication assesses the plant health, animal health, and food safety measures of member countries of the Central Asia Regional Economic Cooperation (CAREC) Program. The assessment covers laws and procedures governing the oversight and application of sanitary and phytosanitary measures, laboratory infrastructure, and border services management. CAREC members include Afghanistan, Azerbaijan, the People's Republic of China, Georgia, Kazakhstan, the Kyrgyz Republic, Mongolia, Pakistan, Tajikistan, Turkmenistan, and Uzbekistan.
