Lost Angeles

Edition 7L In Paul Jasmin's hauntingly beautiful new book, *Lost Angeles*, the city takes on a quality of light and personality known only to someone who has experienced it first hand. Here are the "tarnished angels" that hang out on Hollywood Boulevard or in local motel rooms, that have come to L.A. looking for the American dream, Hollywood style, and have quickly discovered it takes more than just desire to succeed. Jasmin combines formally fluid pictures of these youths languishing in dreamlike settings or in erotically charged compositions--clothed and unclothed. His images present the viewer with a personal survey of Los Angeles, of the place and the people who live there, some of whom have realized their dreams, some of whom are still searching. A major figure in the world of photography and an influence on many of today's young artists, Jasmin has included among his subjects his friends, including Sofia Coppola, who along with long-time friend and admirer Bruce Weber, have contributed essays that explore the depths of this truly rarefied vision. They add yet another dimension to his portrait of a town they all love.

Own Your Lemons

How To Make Your IP Profitable

th Digital Books The Second Edition of Own Your Lemons is currently in production and will be available this Fall!

***** A lemon can be many things from a delicious citrus fruit to a dud of a car but most importantly it is something you can own. The idea for Own Your Lemons came to me when I was a freshly faced law student learning the basic of contracts, property law, and family law. As the daughter of Dr. Mary Lemon Brooks nephew I have always been interested in the fundamentals of law and how law connects the world. My first legal fellowship after graduating law school focused on art and entertainment law it was there I learned the fundamentals of intellectual property from renowned entertainment attorney John Renaud of Turner/Time Warner. In this second edition of Own Your Lemons I am delighted to share some of these internal secrets with you. When you first think of intellectual property (IP) what comes to mind? Is it the last commercial you watched on YouTube or the last item you bought in the grocery store? IP plays a large part in the branding and marketing we all see on a daily basis from slogans like "Where's the beef?" and "We have the meats" to characters like "Flo" and "Jake" promoting car insurance and even logos like the Adidas apparel three stripes and Nike's coveted swish mark. Characters, slogans, and logos are the main elements of promotional IP but only a small part of the IP market. The great thing about America's IP market system is owning the product and owning the promotion. Here in the US there are two federal offices which grant intellectual property rights. The US Copyright Office grants a copyright under specific circumstances. A grant of right allows you as the owner to protect your work from being copied and used without your permission. The US Patent and Trademark Office grants patents and trademarks under certain circumstances. Patents, Trademarks and Copyrights are the only types of intellectual property. Now it gets complicated, think of those Flo and Jake characters from your favorite car insurance ad they are people too! State laws in the United States of America grant publicity rights to individuals promoting products. You may be thinking this doesn't make any sense and you are right it doesn't make sense it makes cents. Literally every time your likeness is shown in association with a product or brand someone is making a royalty. Chang ching! As someone interested in owning lemons the cost of manufacturing and marketing can be steep if you don't do your homework first. Building brand quality can take years whereas ideas are one in a million unlike those complicated combinations of slogans, logos, characters, products, and people. For more on IP purchase the digital copy of Own Your Lemons in Google Play Books. *****COMING SOON***** Mind Your Lemons Give Your Lemons

Weapons of Math Destruction

How Big Data Increases Inequality and Threatens Democracy

Broadway Books Longlisted for the National Book Award New York Times Bestseller A former Wall Street quant sounds an alarm on the mathematical models that pervade modern life -- and threaten to rip apart our social fabric We live in the age of the algorithm. Increasingly, the decisions that affect our lives--where we go to school, whether we get a car loan, how much we pay for health insurance--are being made not by humans, but by mathematical models. In theory, this should lead to greater fairness: Everyone is judged according to the same rules, and bias is eliminated. But as Cathy O'Neil reveals in this urgent and necessary book, the opposite is true. The models being used today are opaque, unregulated, and uncontestable, even when they're wrong. Most troubling,

they reinforce discrimination: If a poor student can't get a loan because a lending model deems him too risky (by virtue of his zip code), he's then cut off from the kind of education that could pull him out of poverty, and a vicious spiral ensues. Models are propping up the lucky and punishing the downtrodden, creating a "toxic cocktail for democracy." Welcome to the dark side of Big Data. Tracing the arc of a person's life, O'Neil exposes the black box models that shape our future, both as individuals and as a society. These "weapons of math destruction" score teachers and students, sort resumes, grant (or deny) loans, evaluate workers, target voters, set parole, and monitor our health. O'Neil calls on modelers to take more responsibility for their algorithms and on policy makers to regulate their use. But in the end, it's up to us to become more savvy about the models that govern our lives. This important book empowers us to ask the tough questions, uncover the truth, and demand change. -- Longlist for National Book Award (Non-Fiction) -- Goodreads, semi-finalist for the 2016 Goodreads Choice Awards (Science and Technology) -- Kirkus, Best Books of 2016 -- New York Times, 100 Notable Books of 2016 (Non-Fiction) -- The Guardian, Best Books of 2016 -- WBUR's "On Point," Best Books of 2016: Staff Picks -- Boston Globe, Best Books of 2016, Non-Fiction

EPA 608 Study Guide

HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.
