If you ally habit such a referred **Series China Contemporary Routledge Priorities Strategic Chinas** book that will pay for you worth, acquire the certainly best seller from us currently from several preferred authors. If you want to funny books, lots of novels, tale, jokes, and more fictions collections are as well as launched, from best seller to one of the most current released.

You may not be perplexed to enjoy every books collections Series China Contemporary Routledge Priorities Strategic Chinas that we will no question offer. It is not just about the costs. Its nearly what you dependence currently. This Series China Contemporary Routledge Priorities Strategic Chinas, as one of the most operational sellers here will very be accompanied by the best options to review.

KEY=CHINA - TURNER KARTER

China's Strategic Priorities Routledge The People's Republic of China is the world's most populous state and largest consumer of energy, having demonstrated momentous progress on an unprecedented scale. This global power has increasingly shaped international relations as a result of its population size, economic development and political character. Identifying the most significant new issues and problems that have arisen from China's rapid development, this book examines the evolution of China's contemporary foreign policy and international relations. In doing so, it underlines the global importance of China's management of its own politics and economics, and demonstrates how all nation-states have a vested interest in —and to varying degrees are liable for —the consequences of Chinese actions. The book aims to spark debate by drawing attention to these critical issues; placing them on the scholarly agenda as well as that of the practitioner. It provides factual evidence, progressive findings, justification and a rationale for action, expert analysis, and the resulting policy prescriptions. In addition, the book highlights the liable costs of failing to address China's strategic priorities. This interdisciplinary book draws attention to the most pressing issues that China must address for universal benefit, and will be of great interest to students and scholars of International Relations, Chinese Studies and Political Science. **Routledge Handbook of Chinese Security Routledge Located in the**

center of Asia with one of the largest land frontiers in the world and 14 neighbors whose dispositions could not easily be predicted, China has long been obsessed with security. In this handbook, an internationally renowned team of contributors provide a comprehensive and systematic analysis of contemporary thinking about Chinese national security. Chapters cover the PRC's historical, ideological and doctrinal heritage related to security, its security arrangements and policies targeting key regions and nations of the world, the security aspects of the PRC's ground, air, sea, space and cyber forces, as well as the changing and expanding definition and scope of China's security theory and practice. Routledge Handbook of the Chinese Economy Routledge China's rapid rise to become the world's second largest economy has resulted in an unprecedented impact on the global system and an urgent need to understand the more about the newest economic superpower. The Routledge Handbook of the Chinese Economy is an advanced-level reference guide which surveys the current economic situation in China and its integration into the global economy. An internationally renowned line-up of scholars contribute chapters on the key components of the contemporary economy and their historical foundations. Topics covered include: the history of the Chinese economy from ancient times onwards; economic growth and development; population, the labor market, income distribution, and poverty; legal, political, and financial institutions; and foreign trade and investments. Offering a cutting-edge overview of the Chinese economy, the Handbook is an invaluable resource for academics, researchers, economists, graduate, and undergraduate students studying this ever-evolving field. China's Role and Interests in the Greater Mekong Subregion Logos Verlag Berlin GmbH Differentiated cooperation and GMS cooperation provide a theoretical model and practical example to coordinate the relationship and to promote economic and political cooperation between large and small states for the purpose of economic, political, and social development on the national, regional, and international stages. China's Contemporary Image and Rhetoric Practice Routledge China's Contemporary Image and Rhetoric Practice presents an overview of Chinese diplomatic rhetoric, exploring how the image of China is depicted through a Western lens and introducing a profound shift in domestic perspectives of this image. This reader reveals new sites for Chinese rhetoric to deepen scholarship in the relevant studies of Chinese literature, Chinese discourse analysis, Chinese sociology, Chinese politics and so on. These chapters have been cherry-picked for their contributions to the field, and may facilitate the expanding development of Chinese studies. This book is a valuable reference for scholars, researchers and graduate or postgraduate students in Chinese linguistic and social studies. The Identity of Zhiqing The Lost Generation Routledge Outside China, little is known about the process and implications of the Up to the Mountains and Down to the Countryside (UMDC) Movement, a Chinese state policy from 1967 to 1979 in which more than 16 million secondary school-leavers in different cities were relocated to rural areas. The Movement shaped the lives of

these young people and assigned them a shared group identity: Zhiqing, or the Educated Youth. This book provides new research on Zhiqing, who were born and brought up after the establishment of the People's Republic of China and regarded as a lost generation during the Cultural Revolution. Presenting a remembrance of their tortuous life trajectories, the book investigates their distinctive identity and self-identification. Unlike earlier historical approaches, it does this from a social psychological perspective. It is also unique in its use of first-hand materials, as individuals' memories and reflections collected by in-depth interviews are compiled and presented as Zhiqing's self-portrait. This innovative research offers an informative and profound induction of the topic and also contributes to the development of contemporary Chinese studies by laying the foundation for a specialized Zhiqing study. Combining rich empirical research with a strong theoretical perspective, this book will be invaluable to students and scholars of Chinese history, sociology, anthropology and politics. The Routledge Handbook of Chinese Studies Routledge This Handbook approaches Chinese Studies from an interdisciplinary perspective while attempting to establish a fundamental set of core values and tenets for the subject, in relation to the further development of Chinese Studies as an academic discipline. It aims to consolidate the current findings in Chinese Studies, extract the essence from each affiliated discipline, formulate a concrete set of ideas to represent the 'Chineseness' of the subject, establish a clear identity for the discipline and provide clear guidelines for further research and practice. Topics included in this Handbook cover a wide spectrum of traditional and newly added concerns in Chinese Studies, ranging from the Chinese political system and domestic governance to international relations, Chinese culture, literature and history, Chinese sociology (gender, middle class, nationalism, home ownership, dating) and Chinese opposition and activism. The Handbook also looks at widening the scope of Chinese Studies (Chinese psychology, postcolonialism and China, Chinese science and climate change), and some illustrations of innovative Chinese Studies research methods. The Routledge Handbook of Chinese Studies is an essential reference for researchers and scholars in Chinese Studies, as well as students in the discipline. China's Strategic Partnerships in Latin America Case Studies of China's Oil Diplomacy in Argentina, Brazil, Mexico, and Venezuela, 1991-2015 Lexington Books This study examines how China has developed a diplomatic mechanism to expand its international influence through the establishment of strategic partnerships. These strategic partnerships have sparked a debate among analysts. On the one hand, some optimistic studies applaud the win-win objective of China's foreign policy and portray China as a successful model for developing countries. On the other hand, more skeptical studies depict China as a rising imperial power that represents a competitive threat to Latin America. This book focuses on China's strategic partnerships with Argentina, Brazil, Mexico, and Venezuela within the oil sector. It stresses how Chinese strategic partnerships with each of these four countries have diverged across cases over time

(1991-2015). The study finds that the strategic partnerships are asymmetrical in which China benefits more than four Latin American countries in a variety of aspects. I suggest Latin American countries to push for greater diversification of export agenda toward China, to develop new productive partnerships beyond traditional sectors and to increase the competitiveness of firms. Meanwhile, China's diplomatic actions toward Latin America are more than likely to result in forms of change, particularly across my four country cases, and where strategic partnerships are concerned. **Chinese Naval Strategy in the 21st Century The Turn to Mahan Routledge** Alfred Thayer Mahan has been called America's nineteenth-century 'evangelist of sea power' and the intellectual father of the modern US Navy. His theories have a timeless appeal, and Chinese analysts now routinely invoke Mahan's writings, exhorting their nation to build a powerful navy. Economics is the prime motivation for maritime reorientation, and securing the sea lanes that convey foreign energy supplies and other commodities now ranks near or at the top of China's list of military priorities. This book is the first systematic effort to test the interplay between Western military thought and Chinese strategic traditions vis-à-vis the nautical arena. It uncovers some universal axioms about how theories of sea power influence the behaviour of great powers and examines how Mahanian thought could shape China's encounters on the high seas. Empirical analysis adds a new dimension to the current debate over China's 'rise' and its importance for international relations. The findings also clarify the possible implications of China's maritime rise for the United States, and illuminate how the two powers can manage their bilateral interactions on the high seas. **Chinese Naval Strategy in the 21st Century** will be of much interest to students of naval history, Chinese politics and security studies. **The Routledge Encyclopedia of Modern Asian Educators 1850-2000 Routledge** This handbook is a unique and major resource on modern educators of Asia and their contribution to Asian educational development through the 19th and 20th centuries when modernization started in Asia. In one comprehensive volume, this handbook covers a selection of modern educators from East Asia, South Asia, and Southeast Asia - and their contributions to the development of modern education, practically and theoretically. The diversity of cultures and religion as well as the multilinguistic and ethnic context have made Asian modernization unique and complex. Educational modernization in Asia reflected this historical context in many ways and resulted in the diverse forms of learning, teaching, institutions, and administration. Modern Asian educators compiled in this handbook represent various fields of Asian society: not only educational but cultural and social fields like academia, politics, economics, religion, literature, theatre, fine arts, and civic genres including the media. Through this Handbook, readers may discover the individual modern educators, male and female, and their contributions to Asian educational modernization. All of them were committed to the cause of education for children, youth, adults and in particular women. In addition, this volume has an extraordinarily rich

subject index which can be an excellent guide and introduction to information touching divergent dynamics of educational developments in modern Asia. This insightful volume is perfect for students and researchers working on history of education, comparative education and educational development, particularly for those interested in Asian contexts. China's Strategic Priorities Routledge The People's Republic of China is the world's most populous state and largest consumer of energy, having demonstrated momentous progress on an unprecedented scale. This global power has increasingly shaped international relations as a result of its population size, economic development and political character. Identifying the most significant new issues and problems that have arisen from China's rapid development, this book examines the evolution of China's contemporary foreign policy and international relations. In doing so, it underlines the global importance of China's management of its own politics and economics, and demonstrates how all nation-states have a vested interest in —and to varying degrees are liable for —the consequences of Chinese actions. The book aims to spark debate by drawing attention to these critical issues; placing them on the scholarly agenda as well as that of the practitioner. It provides factual evidence, progressive findings, justification and a rationale for action, expert analysis, and the resulting policy prescriptions. In addition, the book highlights the liable costs of failing to address China's strategic priorities. This interdisciplinary book draws attention to the most pressing issues that China must address for universal benefit, and will be of great interest to students and scholars of International Relations, Chinese Studies and Political Science. China's Maritime Silk Road Initiative and Southeast Asia Dilemmas, Doubts, and Determination Springer Nature This book delves into the political-economy of China's Maritime Silk Road Initiative (MSRI), part of the larger Belt and Road Initiative (BRI), with a focus on Southeast Asia (SEA). It represents the second in a three-part book series on China's MSRI. It discusses the state of the MSRI in various SEA countries such as Indonesia and Myanmar, highlights the international and domestic economic and political factors that shape individual SEA country's embrace of China's scheme, and examines the effects of China's MSRI in individual SEA countries such as Cambodia and Malaysia. It also contemplates the role of third parties such as India and the United States on the behaviors of SEA countries and the implementation of the MSRI. It shows the MSRI is neither a boon nor bust and that the MSRI's progress and effects are contingent on many factors requiring attention by those wanting to understand China's mega initiative. Chinese Foreign Relations Power and Policy of an Emerging Global Force Rowman & Littlefield Publishers With new assertiveness and prominence, China under President Xi Jinping is rightly considered an emerging and aggressive superpower backed by growing economic and impressive military strength. In this meticulous and balanced assessment, Robert G. Sutter traces China's actions under Xi Jinping, including the many challenges they post to the international status quo. He provides a comprehensive analysis of newly prominent

Chinese unconventional levers of power and influence in foreign affairs that were previously disguised, hidden, denied or otherwise neglected or unappreciated by specialists. Sutter considers the domestic issues that preoccupy Beijing and the global factors economic and political factors that complicate and constrain as well as enhance China's advance to international prominence. **Contemporary Issues Shaping China's Civil Aviation Policy Balancing International with Domestic Priorities** Routledge The emergence of China as a future major participant in international aviation raises some interesting questions, especially from a strategic policy perspective. The progressive shift from a command to a mixed market economy under the central leadership of the Beijing administration now finds itself faced with the needs to balance a strategic duality in the context of the role of China's civil aviation industry. In a very real sense this situation requires the design and accommodation of a growing role for China's mainstream carriers within the operational context of the need to meet the complex challenges from increasing international market competition. In parallel with such major external pressures, central government must also accommodate domestic priorities with regard to internal economic development. The fruits of economic progress as a function of market reform are commonly understood to have positively reshaped the lives of only a proportion of the national population to date. The need to create greater access to economic growth for the more remote western and northern provinces has required that the rapid development of airports become a factor in the planning and allocation of developmental priorities. To complicate matters further, prevailing requirements of airspace defence remain a major parameter within the larger context of national aviation policy. This book explores the political, economic and strategic issues raised by the inevitable tension between the domestic and international aspects of Beijing's current civil aviation strategy. It also seeks to identify some of the problems that face the industry as a key sector in the larger context of macroeconomic reform and the further pressures now being exerted by China's membership of the WTO. **Chinese Business Landscapes and Strategies** Routledge This key book provides students and practitioners of international business with a comprehensive and informative guide to business in China, featuring a combination of both theoretical/academic and practical perspectives. **Hedging Strategies in Southeast Asia ASEAN, Malaysia, the Philippines, and Vietnam and their Relations with China** Taylor & Francis Introducing a re-conceptualized comprehensive hedging framework, this book analyses the relations of the Association of Southeast Asian Nations (ASEAN), Malaysia, the Philippines, and Vietnam with China in the context of the Belt and Road Initiative (BRI) and the South China Sea dispute. The author argues that ASEAN and the three Southeast Asian governments pursue a hedging strategy towards the rising China. Hedging expands the strategic options of smaller powers which are in Neorealism often restricted to bandwagoning and balancing. A hedging strategy, however, can simultaneously contain both elements of bandwagoning (e.g., in

economics) and balancing (e.g., in security affairs). Even though the four hedging strategies and their implementation vary, in principle they all seek closer economic relations with Beijing, while maintaining strong security relations with Washington. A major innovation of the new hedging concept is the inclusion of the perceptions of the hedger on the risks and opportunities stemming from the relations with the hedging target and of the strategic value of potential hedging partners. The comprehensive hedging concept and the important empirical findings will be of interest to researchers in the fields of International Relations, Security, Political Geography, Economics, History, and Asian Studies. **Chinese and Indian Strategic Behavior Growing Power and Alarm** Cambridge University Press This book offers an empirical comparison of Chinese and Indian international strategic behavior. It is the first study of its kind, filling an important gap in the literature on rising Indian and Chinese power and American interests in Asia. The book creates a framework for the systematic and objective assessment of Chinese and Indian strategic behavior in four areas: (1) strategic culture; (2) foreign policy and use of force; (3) military modernization (including defense spending, military doctrine and force modernization); and (4) economic strategies (including international trade and energy competition). The utility of democratic peace theory in predicting Chinese and Indian behavior is also examined. The findings challenge many assumptions underpinning Western expectations of China and India. **China's Rise in Asia Promises and Perils** Rowman & Littlefield Publishers In this first sustained, single-authored assessment of China's expanding influence in Asia in the postDCold War period, respected analyst Robert Sutter draws on his extensive experience to explore the current debate on China's military and economic rise and its meaning for U.S. interests. Examining in detail China's current and historical relations with the key countries of Asia, he finds a range of motivations underlying China's recent initiatives. Some incline Chinese policy to be cooperative with the United States, others to be competitive and confrontational. Sutter's nuanced study shows that U.S. influence continues to dominate Asia and plays a critical role in determining China's cooperative or confrontational approach. He argues that the Bush administration's policies of firmness and cooperation have encouraged China to stay on a generally constructive track in the region. **Chinese Grand Strategy in the 21st Century According to Plan?** This book examines the state of China's grand strategy in the 21st century, including political, military and economic factors. Over the past two decades, the People's Republic of China (PRC) has attained the second highest gross domestic product in the world, taken a leadership role in East Asian regional organisations and substantially improved its military capabilities. Each of these developments - and many others like them - have attracted attention from scholars, journalists and policymakers. Less frequently acknowledged - but perhaps of greater significance - is the impressive congruence of Beijing's accomplishments. This book highlights how the PRC's successes support one another and pave the way for future

accomplishments, and how these successes seem to be achieved in an unusually coherent and purposeful way. As Beijing's relations with the rest of the world continue to evolve, with events ranging from the ongoing global economic crisis to the turbulence in China's own stock market which may bring the PRC's government under pressure to re-order its priorities, this book assesses China's grand strategy and long-term approach to national policy. It identifies the political, military and economic instruments it is likely to use, the key challenges which it will face, and explores the implications for the global community. This book will be of great interest to students of Chinese politics, foreign policy, strategic studies, international security and IR in general. 'The Chinese Century'? The Challenge to Global Order Springer This book looks ahead to consider the most likely results of the encounter between China and the international system. Environmental, cultural and perceptual matters are considered as well as more traditional economic and military issues. Underpinning the book is the question will the 21st century be 'China's Century', for China and the world? The Domestic Sources of China's Foreign Policy Regimes, Leadership, Priorities and Process Routledge This book offers an accessible, informative and up-to-date systemic analysis of the foreign policy of China. It demonstrates how domestic factors have profoundly shaped China's foreign policy, from the late Mao's era to the reform era, presenting its argument through an in-depth analysis of major cases of Chinese foreign policy. Striking Back The End of Peace in Cyberspace - And How to Restore It Yale University Press Faced with relentless technological aggression that imperils democracy, how can Western nations fight back? Before the cyber age, foreign interference in democratic politics played out in a comparatively narrow arena. The rapid expansion of cyberspace has radically altered this situation. The hacking activities of Russian military agents in the 2016 US presidential election and other major incidents demonstrate the sophisticated offensive strategies pursued by geopolitical adversaries. The West is winning the technology race - yet losing the larger contest over cybersecurity. Lucas Kello reveals the failures of present policy to prevent cyberattacks and other forms of technological aggression. Drawing upon case studies and interviews with decision-makers, he develops a bold new approach: a concentrated and coordinated response strategy that targets adversaries' interests and so recaptures the initiative. Striking Back provides an original solution to national security challenges in our era of intense technological rivalry. Forecasting China's Future Dominance or Collapse? Routledge China's future development is likely to have a huge impact on twenty-first century global outcomes. It is therefore surprising that, thus far, so little attention has been given to comparing and evaluating expert forecasts of China's future in the post-Mao era. This book presents an illuminating and comprehensive summary record of contrasting and competing expert forecasts and judgements about the major issues confronting China within four principal domains - political, economic, environmental, and international. After considering the principal

forecasting methods available to experts, the author comments critically on the degree of success achieved in using those methods and emphasises the confusion created by the polarisation of opinion and by the failure of many experts to accept the high degree of uncertainty that characterises most of the key issues. The book recommends a new approach based on the study of a hierarchy of critical uncertainties and on continuing analysis of opposing expert opinions about these uncertainties. It emphasises the potential for both positive and negative outcomes for these critical uncertainties, and the importance of maximising the potential for positive outcomes through improved analytical and policy frameworks. Providing insights for specialists and non-specialists into the most critical issues that will determine China's future direction, this book will be of particular interest to students and scholars of political, economic, environmental, and international relations issues in China and Asia, as well as to readers in business and government.

The Chinese Cinema Book Bloomsbury Publishing This revised and updated new edition provides a comprehensive introduction to the history of cinema in mainland China, Hong Kong and Taiwan, as well as to diasporic and transnational Chinese film-making, from the beginnings of cinema to the present day. Chapters by leading international scholars are grouped in thematic sections addressing key historical periods, film movements, genres, stars and auteurs, and the industrial and technological contexts of cinema in Greater China.

Modern Chinese Parts of Speech Classification Theory Routledge What is the essence of a part of speech? Why is it difficult to classify parts of speech? What are the bases and criteria for classifying them? How should they be classified? In doing so, how should a conversational word be dealt with? How should nominalization be treated? These are just some of the questions answered in this book. The classification of parts of speech in Chinese is a tough job due to the language's lack of morphological differences. Based on the analysis of nearly 40,000 Chinese characters, this book proposes that, essentially, a part of speech is not of distributional type and that its intrinsic basis is an expressional function and the semantic type. Essentially, large categories such as substantive words, predicate words and modification words are classes of words classified according to their expressional functions. Basic categories such as nouns, verbs and adjectives are classes that combine semantic types with syntactical functions. In classifying parts of speech, the book pays attention not to identifying a single distributive characteristic that is internally universal and externally exclusive but to clustering the grammatical functions that have the same classification value through the "reflection-representation" relationship among distribution, expressional function and semantic type (distribution reflects expressional function and semantic type, which are, in turn, represented as distribution), thereby identifying the classification criteria. It uses distributional compatibility and the correlation principle to analyze which distributional differences represent differences in parts of speech and which do not. In this way, grammatical functions that have

equal classification values are collected into one equivalent function cluster, each of which represents one part of speech. The book uses four strategies to classify parts of speech, namely the homogeneity strategy, the homomorphical strategy, the priority homomorphical strategy and the consolidation strategy. It will be a valuable reference for Chinese linguistic researchers and students as well as Chinese learners.

China and the International Human Rights Regime 1982-2017 Cambridge University Press Rana Siu Inboden examines China's role in the international human rights regime between 1982 and 2017 and, through this lens, explores China's rising position in the world. Focusing on three major case studies - the drafting and adoption of the Convention against Torture and the Optional Protocol to the Convention against Torture, the establishment of the UN Human Rights Council, and the International Labour Organization's Conference Committee on the Application of Standards - Inboden shows China's subtle yet persistent efforts to constrain the international human rights regime. Based on a range of documentary and archival research, as well as extensive interview data, Inboden provides fresh insights into the motivations and influences driving China's conduct and explores China's rising position as a global power.

Power and Restraint in China's Rise Columbia University Press Conventional wisdom holds that China's rise is disrupting the global balance of power in unpredictable ways. However, China has often deferred to the consensus of smaller neighboring countries on regional security rather than running roughshod over them. Why and when does China exercise restraint—and how does this aspect of Chinese statecraft challenge the assumptions of international relations theory? In **Power and Restraint in China's Rise**, Chin-Hao Huang argues that a rising power's aspirations for acceptance provide a key rationale for refraining from coercive measures. He analyzes Chinese foreign policy conduct in the South China Sea, showing how complying with regional norms and accepting constraints improves external perceptions of China and advances other states' recognition of China as a legitimate power. Huang details how member states of the Association of Southeast Asian Nations have taken a collective approach to defusing tension in maritime disputes, incentivizing China to support regional security initiatives that it had previously resisted. Drawing on this empirical analysis, Huang develops new theoretical perspectives on why great powers eschew coercion in favor of restraint when they seek legitimacy. His framework explains why a dominant state with rising ambitions takes the views and interests of small states into account, as well as how collective action can induce change in a major power's behavior. Offering new insight into the causes and consequences of change in recent Chinese foreign policy, this book has significant implications for the future of engagement with China.

China's Naval Power An Offensive Realist Approach Ashgate Publishing, Ltd. The rapid modernization of the Chinese Navy is a well-documented reality of the post-Cold War world. In two decades, the People's Liberation Army Navy has evolved from a backward force composed of obsolete platforms

into a reasonably modern fleet whose growth is significantly shaking the naval balance in East Asia. The rationale behind China's contemporary rise at sea remains, however, difficult to grasp and few people have tried to see how the current structure of the international system has shaped Chinese choices. This book makes sense of Chinese priorities in its naval modernization in a 'robust' offensive realist framework. Drawing on Barry Posen's works on sources of military doctrine, it argues that the orientation of Beijing's choices concerning its naval forces can essentially be explained by China's position as a potential regional hegemon. Yves-Heng Lim highlights how a rising state develops naval power to fulfil its security objectives, a theoretical perspective that goes farther than the sole Chinese case. China's Policymaking for Regional Economic Cooperation Springer Using first-hand interview data, Yang Jiang reveals the key trends of China's trade and financial politics after its WTO accession. In particular, she highlights the influence of competing domestic interests, government agencies and different ideas on China's foreign economic policy. Growth of Chinese Naval Power Priorities, Goals, Missions, and Regional Implications Institute of Southeast Asian Interpreting China as a Regional and Global Power Nationalism and Historical Consciousness in World Politics Springer This collection discusses China's contemporary national and international identity as evidenced in its geopolitical impact on the countries in its direct periphery and its functioning in organizations of global governance. This contemporary identity is assessed against the background of the country's Confucian and nationalist history. China's New Global Strategy The Belt and Road Initiative (BRI) and Asian Infrastructure Investment Bank (AIIB), Volume I Routledge Rising as a global power and regarding the existing world order unjust and unreasonable enough to meet the interests of both itself and other emerging powers, China has demanded reform to global governance, and taken new initiatives using its new quotient of wealth and influence to draw countries into its orbit. This comprehensive volume focuses on the two most important of these initiatives: the Belt and Road Initiative (BRI), launched in 2013 to strengthen China's connectivity with a large part of the world through infrastructure and economic development; and the Asian Infrastructure Investment Bank (AIIB), created in 2015, which represented China's effort in the reconstruction of the international development rules. This book explores how these two initiatives are central to China's emerging global strategy. The authors examine China's geopolitical and geo-economic motivations and domestic political dynamics in launching these two initiatives. They also investigate the responses from the major foreign partners involved in both initiatives. This book will be of great interest to students, academics and researchers of China's emerging global strategy. It comprises articles originally published in the Journal of Contemporary China. Comprehensive Global Competence for World-Class Universities in China Context, Concept, Model and Evaluation Springer Nature This book proposes the new concept of "comprehensive global competence" in order to explore how to advocate, cultivate, and

implement global competence at China's higher education institutions. The concept essentially refers to an organizational, cross-cultural capacity involving students, faculty members, administrators, and staff in a multidimensional learning domain that values, shapes, and promotes global competitiveness at higher education institutions. Unlike the other literature available, which has largely approached defining global competence it from four perspectives: an adaptation-change mode, an input-output mode, a willingness-tolerance mode, and a learning-competence mode, this book draws on the theoretical framework put forward in "Dimensions of Learning" (Marzano, 1992) in order to explain the meaning, implications, and justification of the concept of comprehensive global competence. Specifically, Marzano's Dimensions of Learning Model offers a comprehensive research-oriented framework on learning cognition and the learning process. With the help of this resource, the book discusses in detail the conceptual, practical, and strategic aspects of creating comprehensive global competence. Japan's Asian Diplomacy Power Transition, Domestic Politics, and Diffusion of Ideas Springer Nature This book provides a comprehensive analysis of Japan's Asian diplomacy under Prime Minister Shinzō Abe. Under the Kantei-centred policymaking system, Shinzō Abe has implemented assertive foreign policies with a slogan of 'diplomacy taking a panoramic perspective of the world'. The analyses in the book cover the traditional and emerging fields of national security and international political economy. While its empirical examination is based on field-specific research, it also incorporates the analysis of Japan's bilateral relations with China, the US, India, and others. In addition, the book provides a solid, theory-driven analysis of Japan's external policy and relations. In an independent chapter, this work sets up integrative theoretical frameworks for empirical analyses by relying on key concepts drawn from the three international relations theories of realism, liberalism and constructivism. Going forward, research in this book also explores the development of key regional affairs. Maritime security and space security are two of major security-related affairs, in which the states in East Asia and the Asia-Pacific have to engage, including the development of the TPP (TPP-11) and RCEP, as well as infrastructure development and development cooperation, which are crucial in relation to China's initiatives in the BRI and AIIB. Lastly, the book provides valuable references to regionalism in East Asia and the Asia-Pacific by analyzing regional integration/cooperation through free trade agreements and the development of regional connectivity. This includes the evolution of cooperation and conflict within key regional frameworks such as the East Asia Summit and APEC, as well as key regional visions such as the Free and Open Indo-Pacific. It also takes into account the possible influence of ideational factors such as norms, principles, and rules on the development of regional cooperation. China's Strategic Multilateralism Investing in Global Governance Cambridge University Press Applying insights from cutting-edge theories of international cooperation, this study brings new

understanding to China's approach to contemporary global challenges. **China and East Asian Strategic Dynamics The Shaping of a New Regional Order** Lexington Books **China and East Asian Strategic Dynamics: the Shaping of a New Regional Order**, edited by Mingjiang Li and Dongmin Lee, examines how China's remarkable economic growth and its proactive diplomatic efforts in recent years have not only shored up its importance in global issues, but also induced a transformation of the strategic dynamics in East Asia. Given that the rise of China is has been a prominent issue in politics and economics worldwide, this edited collection is essential for a wide audience of policy-makers, academics, and students alike. **India as an Asia Pacific Power** Routledge "This book provides a comprehensive assessment of India's international relations in the Asia Pacific region. It charts the development of India's increasingly important role as a major world power, discusses India's international relations strategy and examines India's relationship with each of the major countries of East and Southeast Asia."--Publisher's description. **China's Emergent Political Economy Capitalism in the Dragon's Lair** Routledge This edited volume represents the first collaborative effort to explicitly view China's rapid international ascent as associated with the same process that catapulted Great Britain, the United States, Germany, and Japan to international prominence - the emergence of a capitalist political economy. Each chapter therefore applies the capitalist lens to analyze aspects of China's monumental social, economic, and political transition. Topics addressed range from examinations of China's industrial capitalism and its new multinational corporations to studies of China's changing polity, state-media relations, and foreign policy. With contributors writing from highly varied backgrounds each chapter approaches the subject from a slightly different perspective, but the underlying findings show considerable common ground. China is developing a unique form of capitalism by combining elements rooted in Chinese history, such as the prevalence of networked forms of capital and the continued dominance of the state, with the growing influence of global capital, including the rapid adaptation of recent organizational and technological innovations. Concluding chapters draw out what capitalism in the dragon's lair implies for our 21st century world, cautioning that China's rise is likely to challenge the present world order along both political and economic dimensions. **The Belt and Road Initiative in Asia, Africa, and Europe** Taylor & Francis This book examines the progress and reception of China's Belt and Road Initiative (BRI) in key subregions of Asia, Africa and Europe. Through its exploration of the patchwork of distinctive sub regions of each continent, the book analyses how well the BRI accommodates sub regional variation as it attempts to integrate Asia, Africa, and Europe under Chinese auspices. Individual chapters focus on how developing subregions experience BRI relations with China, while others focus on how liberal powers seek to compete with China's BRI agenda. The contributions also gauge the impact of the COVID-19 pandemic on the BRI in regional settings and point to its future implications. Offering a panoramic view of the vast

mosaic of Asian, African, and European sub regions targeted by the BRI, this book will be of interest to scholars and students of International Relations and Global Political Economy as well as Chinese politics and those with an interest in the Belt and Road Initiative more broadly. Chinese and Indian Merchants in Modern Asia Networking Businesses and Formation of Regional Economy BRILL Chinese and Indian Merchants in Modern Asia studies overseas Chinese and Indian merchants and their impacts on the emerging global economy from the nineteenth to twentieth centuries, focusing on their networking and interactions with the empires and the states.
