Springer Nature **This book explores links and synergies between international trade and two of the most urgent challenges of the 21st century: achieving sustainable energy (i.e., energy that is affordable, secure, and clean) and mitigating climate change. It takes the unique approach of not only examining how international trade can help achieve energy and climate goals, but also the impact of emerging tools and technologies such as smart grids and demand response, and the potential role and impact of citizens and prosumers. The book analyzes energy- and trade-related regulations in a range of jurisdictions to assess how conducive the regulation is towards achieving sustainable energy, and identifies gaps and overlaps in the existing legal framework.**

Justice and Efficiency in Mega-Litigation

Bloomsbury Publishing **Justice and Efficiency in Mega-Litigation** explores the phenomenon of extremely long-running, resource-intensive civil litigation known as 'mega-litigation'. Such litigation challenges the courts to reconcile the objectives of justice and efficiency - for the parties to the case and for the community. Drawing on interviews with judges of the courts of England and Wales, and of Australia, this book shows how judges have responded to these challenges. It situates mega-litigation within broader developments in civil procedure and case management, as well as theoretical debates about the role of courts and the purpose of civil procedure. The book highlights the importance of intensive, creative and flexible case management; focus on the issues in dispute; and, ultimately, each judge's expert intuition.

The Assessment Book

Human Resource Development **Individuals, teams and organizations make decisions everyday intended to improve performance. But, too often, they rush into finding the solution before defining the problem. This book contains seven self-assessments designed to help you define the issue of "what to accomplish" before deciding "how to accomplish it." With these seven assessments, you can collect, analyze and interpret the data necessary to confirm your suspicions before making recommendations. Do you feel there is neglect of the strategic planning process in your organization? Is it time to move into E-learning? Does your corporate culture require change? Avoid jumping to conclusions - gather the facts first and be sure you are headed where you want to end up before selecting how to get there. In nine chapters, the authors present seven self-assessments: Strategic Thinking and Planning; Needs Assessment and Your Organization; Corporate Culture and Your Organization; Evaluation and Your Organization; Performance Improvement Competencies; Performance Motivation to Change; Organizational Readiness for E-learning. Each instrument uses a unique dual response - "what is" and "what should be" - format with performance-related questions. The book includes instructions on how to complete the surveys, decide what the results mean and use the results. Also included is a glossary of terms used that focuses on results and payoffs instead of the process, activities and interventions applied.**

Nature as Measure

The Selected Essays of Wes Jackson

Catapult **An essential and timely collection of wise and compelling essays from one of the longtime leaders of the sustainable agriculture movement in America. Wes Jackson, “a well-known and admired advocate for sustainability especially as it relates to agriculture, has the rare ability to transform his convictions into captivating prose . . . Jackson’s thoughts are still as significant and profound as they were nearly 20 years ago” (Publishers Weekly) and can teach us many things about the land, soil, and conservation, but what most resonates is this: The ecosphere is**

self-regulating, and as often as we attempt to understand it, we are not its builders, and our manuals will often be faulty. The only responsible way to learn the nuances of the land is to study the soil and vegetation in their natural state and pass this knowledge on to future generations. “[A] small book rich in ideas” (The New York Times Book Review), *Nature as Measure* collects Jackson’s essays from *Altars of Unhewn Stone* and *Becoming Native to This Place*, presenting ideas of land conservation and education that are written from the point of view of a man who has practiced what he’s preached and proven that it is possible to partially restore much of the land that we’ve ravaged. Wes Jackson lays the foundation for a new farming economy, grounded in nature’s principles and located in dying small towns and rural communities. Exploding the tenets of industrial agriculture, Jackson seeks to integrate food production with nature in a way that sustains both. His longtime friend Wendell Berry provides an informative, contextual Introduction. “For those concerned about what will be left and how many billion will be starving in twenty years, this is a must read.” —Register of the Kentucky Historical Society “A good introduction to a thinker whose ideas on agriculture are radical both in their technical approach to food production as well as in terms of the economic, social, and cultural context within which it is practiced.” —Review of *Radical Political Economics*
